

# Table of Contents

Chapter 1. Reliability and the Die .....	7
Chapter 2. Reliability and Internal Construction .....	1
Chapter 3. Reliability and the Finished Package .....	11
Chapter 4. MIL-STD-883 .....	18
Chapter 5. MIL-M-38510 .....	34
Chapter 6. The Specification Development Process .....	46
Chapter 7. Reliability and the Hybrid Device .....	52
Chapter 8. Reliability and VLSI/VHSIC Devices .....	61
Chapter 9. Reliability and the Radiation Environment .....	68
Chapter 10. Reliability and Electrostatic Discharge .....	76
Chapter 11. Reliability and the Discrete Device .....	80
Chapter 12. Reliability and Standardization .....	94
Chapter 13. Quality Assurance and Reliability Engineering .....	103
Chapter 14. Reliability and Documentation .....	110
Chapter 15. Reliability and the Commercial Grade Device .....	117
Chapter 16. European Reliability Programs .....	122
Chapter 17. Reliability and the Cost of Semiconductor Ownership .....	129
Chapter 18. Reliability Testing at National Semiconductor .....	136
Chapter 19. The Total Military/Aerospace Standardization Program .....	139
Chapter 20. 883B/RETSTM Products from National Semiconductor .....	142
Chapter 21. MILS/RETSTM Products from National Semiconductor .....	151
Chapter 22. 883/RETSTM Hybrids from National Semiconductor .....	162
Chapter 23. MIL-M-38510 Class B Products from National Semiconductor .....	170
Chapter 24. Radiation Hardened Technology from National Semiconductor .....	179
Appendix A Wafer Fabrication .....	192
Appendix B Semiconductor Assembly and Packaging .....	202
Appendix C Semiconductor Packages .....	207
Appendix D Glossary of Terms .....	213
Appendix E Key Government Agencies .....	229
Appendix F AN/ Numbers and Acronyms .....	233
Appendix G Bibliography .....	251
Appendix H MIL-M-38510 and DESC Drawing Cross Listing .....	265
Subject Index .....	279
