PREFACE xvii

1	INSTRUMENTATION SYSTEM FUNDAMENTALS	1
1.1	Introduction, 1	
1.2	Measurement Systems, 1	
1.2.1	Measurand, 2	
1.2.2	Basic Electronic Measuring System, 2	
1.2.3	Multiple-Data Measuring Systems, 3	
1.3	Telemetry Systems, 5	
1.3.1	Carrier Modulation, 5	
1.3.2	Multiplexing, 7	
1.3.3	Modulation Methods for TDM Data, 9	
1.4	Data Conditioning, Processing, and Display, 11	
1.4.1	Analog Data, 11	
1.4.2	Digital Data, 12	
1.4.3	Data Processing, 14	
1.5	Control Systems, 15	
2	TRANSDUCER FUNDAMENTALS	17
2.1	Transducer Terminology, 17	
2.2	Transduction Principles, 21	
2.3	General Transducer Characteristics, 26	
2.4	Design Characteristics, 26	
2.4.1	Measurand Characteristics, 26	

- 2.4.2 Electrical Design Characteristics, 27
- 2.4.3 Mechanical Design Characteristics, 30
- 2.5 Performance Characteristics, 31
 - 2.5.1 Static Characteristics, 32
 - 2.5.2 Dynamic Characteristics, 43
 - 2.5.3 Environmental Characteristics, 47
- 2.6 Reliability Characteristics, 54

3 CRITERIA FOR TRANSDUCER SELECTION 56

- 3.1 Measurement Considerations, 57
- 3.2 Data System Considerations, 57
- 3.3 Transducer Design Criteria, 58
- 3.4 Availability Factors, 59
- 3.5 Cost Factors, 59
- 3.6 Location of Processor (“Smart Sensors”), 60

4 TRANSDUCER PERFORMANCE TESTS 61

- 4.1 Electrical Tests, 63
 - 4.1.1 Voltage Measurement, 64
 - 4.1.2 Current Measurement, 65
 - 4.1.3 Frequency and Pulse-Count Measurement, 65
 - 4.1.4 Digital Output Measurement, 66
 - 4.1.5 Voltage Ratio Measurement, 66
 - 4.1.6 Resistance Measurement, 67
 - 4.1.7 Capacitance and Inductance Measurement, 68
 - 4.1.8 Output Impedance Tests, 69
 - 4.1.9 Output Noise Tests, 69
 - 4.1.10 Loading-Error Tests, 70
 - 4.1.11 Resolution and Threshold Tests, 72
 - 4.1.12 Excitation Tests, 74
 - 4.1.13 Voltage-Breakdown Test, 74
 - 4.1.14 Insulation-Resistance Test, 74
- 4.2 Calibrations, 75
- 4.3 Dynamic Tests, 76
- 4.4 Environmental Tests, 78
 - 4.4.1 Temperature Tests, 79
 - 4.4.2 Temperature Shock and Temperature Gradient Tests, 80
 - 4.4.3 Acceleration Tests, 81
 - 4.4.4 Vibration Tests, 81
 - 4.4.5 Shock Tests, 83
 - 4.4.6 Atmospheric Environmental Tests, 84
 - 4.4.7 Special Environmental Tests, 84
 - 4.4.8 Combined Environmental Tests, 85
- 4.5 Life Tests, 85

- 5 DISPLACEMENT TRANSDUCERS AND MOTION SENSORS 86**
- 5.1 Basic Definitions, 86
 - 5.2 Units of Measurement, 87
 - 5.2.1 The International System of Units (SI), 87
 - 5.2.2 SI Units for Displacement, 87
 - 5.2.3 Other Units for Displacement Compatible with the SI, 87
 - 5.2.4 Conversion Factors, 88
 - 5.3 Sensing Methods, 88
 - 5.4 Design and Operation, 90
 - 5.4.1 Capacitive Displacement Transducers, 90
 - 5.4.2 Inductive Displacement Transducers, 91
 - 5.4.3 Reluctive Displacement Transducers, 93
 - 5.4.4 Potentiometric Displacement Transducers, 100
 - 5.4.5 Strain-Gage Displacement Sensors, 102
 - 5.4.6 Vibrating-Wire Displacement Sensors, 103
 - 5.4.7 Electro-Optical Displacement Sensors, 103
 - 5.4.8 Angular and Linear Encoders, 106
 - 5.4.9 Radar, Lidar, and Sonar Distance Sensors, 113
 - 5.4.10 Position-Sensing Switches, 116
 - 5.5 Transducer Characteristics, 121
 - 5.6 Application Notes, 123
- 6 TACHOMETERS AND VELOCITY TRANSDUCERS 126**
- 6.1 Basic Definitions, 126
 - 6.2 Units of Measurement, 126
 - 6.3 Sensing Methods, 127
 - 6.4 Design and Operation, 129
 - 6.4.1 Electromagnetic Linear-Velocity Transducers, 129
 - 6.4.2 Other Linear-Velocity Sensing Devices, 130
 - 6.4.3 Electromagnetic Tachometer Generators, 131
 - 6.4.4 Toothed-Rotor Electromagnetic Tachometers, 132
 - 6.4.5 Electro-Optical Tachometers, 136
 - 6.4.6 Other Types of Angular-Speed Transducers, 137
 - 6.5 Transducer Characteristics, 139
 - 6.6 Application Notes, 140
- 7 ACCELEROMETERS 141**
- 7.1 Basic Definitions, 141
 - 7.2 Units of Measurement, 143
 - 7.3 Sensing Method, 143
 - 7.4 Design and Operation, 144
 - 7.4.1 Capacitive Accelerometers, 144

- 7.4.2 Piezoelectric Accelerometers, 145
- 7.4.3 Potentiometric Accelerometers, 148
- 7.4.4 Reluctive Accelerometers, 150
- 7.4.5 Servo Accelerometers, 151
- 7.4.6 Strain-Gage Accelerometers, 153
- 7.4.7 Vibrating-Element Accelerometers, 154
- 7.4.8 Acceleration Switches, 155
- 7.5 Accelerometer Characteristics, 155
- 7.6 Application Notes, 156

8 GYROS AND OTHER ATTITUDE SENSORS 158

- 8.1 Basic Definitions, 158
- 8.2 Units of Measurement, 159
- 8.3 Sensing Methods, 159
 - 8.3.1 Inertial-Reference Sensing, 159
 - 8.3.2 Gravity-Reference Sensing, 159
 - 8.3.3 Magnetic-Reference Sensing, 160
 - 8.3.4 Optical-Reference Sensing, 160
 - 8.3.5 Radio-Reference Sensing, 161
 - 8.3.6 Flow-Stream-Reference Sensing, 161
- 8.4 Design and Operation, 161
 - 8.4.1 Attitude Gyros, 161
 - 8.4.2 Attitude-Rate Gyros, 164
 - 8.4.3 Rate-Integrating Gyros, 167
 - 8.4.4 Gravity-Referenced Attitude Transducers, 167
 - 8.4.5 Compass-Type Sensors, 169
 - 8.4.6 Angle-of-Attack Transducers, 170
 - 8.4.7 Celestial-Reference Attitude Sensors, 170
 - 8.4.8 Radio Navigation Sensors, 171
- 8.5 Sensor Characteristics, 171
- 8.6 Application Notes, 172

9 STRAIN GAGES 173

- 9.1 Basic Definitions, 173
- 9.2 Units of Measurement, 174
- 9.3 Sensing Methods, 175
- 9.4 Design and Operation, 176
 - 9.4.1 Metal-Wire Strain Gages, 176
 - 9.4.2 Metal-Foil Strain Gages, 176
 - 9.4.3 Deposited-Metal Strain Gages, 178
 - 9.4.4 Semiconductor Strain Gages, 180
 - 9.4.5 Special-Application Gages, 181

- 9.5 *Strain-Gage Characteristics*, 183
- 9.6 *Application Notes*, 184
 - 9.6.1 *Gage Installation*, 184
 - 9.6.2 *Strain-Measurement Circuits*, 185
 - 9.6.3 *Typical Applications*, 189

10 FORCE TRANSDUCERS (LOAD CELLS) 190

- 10.1 *Basic Definitions*, 190
- 10.2 *Units of Measurement*, 191
 - 10.2.1 *SI Units*, 191
 - 10.2.2 *Conversion Factors*, 191
- 10.3 *Sensing Methods*, 191
- 10.4 *Design and Operation*, 193
 - 10.4.1 *Capacitive Force Transducers*, 193
 - 10.4.2 *Reluctive Force Transducers*, 194
 - 10.4.3 *Strain-Gage Force Transducers*, 195
 - 10.4.4 *Piezoelectric Force Transducers*, 197
 - 10.4.5 *Vibrating-Element Force Transducers*, 199
- 10.5 *Transducer Characteristics*, 201
- 10.6 *Application Notes*, 202

11 TORQUE TRANSDUCERS 204

- 11.1 *Basic Definitions*, 204
- 11.2 *Units of Measurement*, 205
 - 11.2.1 *SI Units*, 205
 - 11.2.2 *Conversion Factors*, 205
- 11.3 *Sensing Methods*, 205
- 11.4 *Design and Operation*, 207
 - 11.4.1 *Reluctive Torque Transducers*, 207
 - 11.4.2 *Photoelectric Torque Transducers*, 208
 - 11.4.3 *Electromagnetic and Inductive Phase-Displacement Torque Transducers*, 211
 - 11.4.4 *Strain-Gage Torque Transducers*, 211
- 11.5 *Tranducer Characteristics*, 216
- 11.6 *Application Notes*, 216

12 FLOWMETERS 218

- 12.1 *Basic Definitions*, 218
- 12.2 *Units of Measurement*, 219
- 12.3 *Sensing Methods*, 219
 - 12.3.1 *Differential-Pressure Flow Sensing*, 219
 - 12.3.2 *Mechanical Flow Sensing*, 221

- 12.3.3 Thermal Flow Sensing, 222
- 12.3.4 Magnetic Flow Sensing, 223
- 12.3.5 Oscillating-Fluid Flow Sensing, 224
- 12.3.6 Ultrasonic Flow Sensing, 225
- 12.3.7 Special Mass-Flow Sensing Methods, 225
- 12.4 Design and Operation, 228
 - 12.4.1 Differential-Pressure Flowmeters, 228
 - 12.4.2 Turbine Flowmeters, 228
 - 12.4.3 Annular-Rotor Flowmeters, 230
 - 12.4.4 Rotating-Cup Anemometers, 231
 - 12.4.5 Propeller-Type Flowmeters, 231
 - 12.4.6 Positive-Displacement Flowmeters, 232
 - 12.4.7 Target Flowmeters, 234
 - 12.4.8 Thermal Flowmeters, 234
 - 12.4.9 Magnetic Flowmeters, 239
 - 12.4.10 Oscillating-Fluid Flowmeters, 242
 - 12.4.11 Ultrasonic Flowmeters, 244
- 12.5 Flowmeter Characteristics, 247
- 12.6 Application Notes, 248
 - 12.6.1 Installation Precautions, 248
 - 12.6.2 Data System Considerations, 249
 - 12.6.3 Typical Applications, 249

- 13 HUMIDITY AND MOISTURE SENSORS 251**
 - 13.1 Basic Definitions, 251
 - 13.2 Units of Measurement, 252
 - 13.3 Sensing Methods, 252
 - 13.3.1 Hygrometric Sensing Methods, 252
 - 13.3.2 Psychrometric Sensing Methods, 254
 - 13.3.3 Dew-Point Sensing Methods, 255
 - 13.3.4 Remote Moisture-Sensing Methods, 257
 - 13.4 Design and Operation, 258
 - 13.4.1 Hygrometers, 258
 - 13.4.2 Psychrometers, 261
 - 13.4.3 Dew-Point Sensors, 263
 - 13.5 Transducer Characteristics, 266
 - 13.6 Application Notes, 268

- 14 LIQUID LEVEL SENSORS 269**
 - 14.1 Basic Definitions, 269
 - 14.2 Units of Measurement, 269
 - 14.3 Sensing Methods, 270
 - 14.3.1 Pressure Methods of Level Sensing, 270

- 14.3.2 Level Sensing by Weighing, 272
- 14.3.3 Buoyancy Level Sensing, 273
- 14.3.4 Conductivity Level Sensing, 274
- 14.3.5 Capacitive Level Sensing, 274
- 14.3.6 Heat-Transfer Level Sensing, 274
- 14.3.7 Photoelectric Level Sensing, 275
- 14.3.8 Damped-Oscillation Level Sensing, 276
- 14.3.9 Ultrasonic Level Sensing, 277
- 14.3.10 Nucleonic Level Sensing, 278
- 14.3.11 Microwave Level Sensing, 279
- 14.3.12 Superconductive Cryogenic Level Sensing, 280
- 14.3.13 Variable-Coupling Liquid-Metal Level Sensing, 280
- 14.4 Design and Operation, 281
 - 14.4.1 Float-Type Level Sensors, 281
 - 14.4.2 Conductivity Level Sensors, 282
 - 14.4.3 Capacitive Level Sensors, 283
 - 14.4.4 Heat-Transfer Level Sensors, 284
 - 14.4.5 Photoelectric Level Sensors, 285
 - 14.4.6 Vibrating-Element Point-Level Sensors, 285
 - 14.4.7 Ultrasonic Level Sensors, 286
 - 14.4.8 Nucleonic Level Sensors, 289
- 14.5 Transducer Characteristics, 292
- 14.6 Application Notes, 293

15 PRESSURE TRANSDUCERS 294

- 15.1 Basic Definitions, 294
- 15.2 Units of Measurement, 295
- 15.3 Sensing Methods, 298
 - 15.3.1 Pressure Sensing and Referencing, 298
 - 15.3.2 Diaphragms, 298
 - 15.3.3 Capsules, 302
 - 15.3.4 Bellows, 302
 - 15.3.5 Straight Tubes, 303
 - 15.3.6 Bourdon Tubes, 303
- 15.4 Design and Operation, 305
 - 15.4.1 Capacitive Pressure Transducers, 305
 - 15.4.2 Inductive Pressure Transducers, 307
 - 15.4.3 Reluctive Pressure Transducers, 308
 - 15.4.4 Potentiometric Pressure Transducers, 311
 - 15.4.5 Resistive Pressure Transducers, 314
 - 15.4.6 Strain-Gage Pressure Transducers, 315
 - 15.4.7 Servo-Type Pressure Transducers, 319
 - 15.4.8 Piezoelectric Pressure Transducers, 321

- 15.4.9 Vibrating-Element Pressure Transducers, 322
- 15.4.10 Pressure Switches, 325
- 15.5 Transducer Characteristics, 326
- 15.6 Application Notes, 328

16 SOUND-MEASURING MICROPHONES 331

- 16.1 Basic Definitions, 331
- 16.2 Units of Measurement, 333
- 16.3 Sensing Method, 333
- 16.4 Design and Operation, 334
 - 16.4.1 Condenser Microphones, 334
 - 16.4.2 Piezoelectric Microphones, 337
 - 16.4.3 Piezoelectric Hydrophones, 337
- 16.5 Microphone Characteristics, 338
- 16.6 Application Notes, 341
 - 16.6.1 Sound-Pressure Measurements, 341
 - 16.6.2 Sound-Level Measurements, 342
 - 16.6.3 Underwater Sound Detection, 344
 - 16.6.4 Ultrasonics, 344

17 VACUUM SENSORS 346

- 17.1 Basic Definitions, 346
- 17.2 Units of Measurement, 346
- 17.3 Sensing Methods, 347
 - 17.3.1 Pressure-Diaphragm Vacuum Sensing, 347
 - 17.3.2 Thermal-Conductivity Vacuum Sensing, 347
 - 17.3.3 Ionization Vacuum Sensing, 348
 - 17.3.4 Gas-Analysis Vacuum Sensing, 354
- 17.4 Design and Operation, 355
 - 17.4.1 Capacitance Manometers, 355
 - 17.4.2 Pirani Gages, 357
 - 17.4.3 Thermocouple Gages, 358
 - 17.4.4 Hot-Cathode Ion Gages, 359
 - 17.4.5 Cold-Cathode Ion Gages, 364
- 17.5 Transducer Characteristics, 364
- 17.6 Application Notes, 365

18 VISCOMETERS AND DENSITOMETERS 367

- 18.1 Basic Definitions, 367
- 18.2 Units of Measurement, 367
- 18.3 Sensing Methods and Transducer Designs, 368
 - 18.3.1 Viscosity Sensing, 368
 - 18.3.2 Density Sensing, 369

- 18.4 Transducer Characteristics, 370
- 18.5 Application Notes, 370

19 THERMOMETERS 372

- 19.1 Definitions and Related Laws, 372
 - 19.1.1 Basic Definitions, 372
 - 19.1.2 Related Laws, 374
- 19.2 Units of Measurement and Temperature Scales, 376
- 19.3 Sensing Methods, 377
 - 19.3.1 Thermoelectric Temperature Sensing, 378
 - 19.3.2 Resistive Temperature Sensing Using Conductors, 383
 - 19.3.3 Resistive Temperature Sensing Using Semiconductors, 386
 - 19.3.4 Oscillating-Crystal Temperature Sensing, 388
 - 19.3.5 Capacitive Temperature Sensing, 389
 - 19.3.6 Experimental Temperature-Sensing Methods, 389
- 19.4 Design and Operation, 390
 - 19.4.1 Thermocouple Thermometers, 390
 - 19.4.2 Platinum Resistance Thermometers, 394
 - 19.4.3 Thermistor Thermometers, 401
 - 19.4.4 Germanium Resistance Thermometers, 403
 - 19.4.5 Diode Thermometers, 404
 - 19.4.6 Capacitance Thermometers, 404
 - 19.4.7 Acoustical and Noise Thermometers, 405
 - 19.4.8 Temperature Switches, 405
- 19.5 Transducer Characteristics, 406
 - 19.5.1 Mechanical Design Characteristics, 407
 - 19.5.2 Electrical Design Characteristics, 409
 - 19.5.3 Performance Characteristics, 410
 - 19.5.4 Environmental Characteristics, 413
- 19.6 Application Notes, 413
 - 19.6.1 Selection Criteria, 413
 - 19.6.2 Measurement Circuits, 417
 - 19.6.3 Typical Applications, 421

20 RADIATION PYROMETERS 423

- 20.1 Basic Definitions, 423
- 20.2 Units of Measurement, 423
- 20.3 Sensing Methods, 423
- 20.4 Design and Operation, 427
 - 20.4.1 Optics, 427
 - 20.4.2 Detectors, 430

- 20.4.3 Electronics, 430
- 20.4.4 Pyrometer Configurations, 432
- 20.5 Transducer Characteristics, 436
- 20.6 Application Notes, 437

21 HEAT FLUX SENSORS 438

- 21.1 Basic Definitions, 438
- 21.2 Units of Measurement, 438
 - 21.2.1 Units and Conversion Factors, 438
 - 21.2.2 The Solar Constant, 439
- 21.3 Sensing Methods, 440
- 21.4 Design, Operation, and Applications, 440
 - 21.4.1 Calorimeters, 440
 - 21.4.2 Radiometers, 443
 - 21.4.3 Surface Heat-Flow Sensors, 446

22 OPTICAL DETECTORS 447

- 22.1 Basic Definitions, 447
- 22.2 Units of Measurement, 450
- 22.3 Sensing Methods, 451
 - 22.3.1 Photovoltaic Detection, 451
 - 22.3.2 Photoconductive Detection, 451
 - 22.3.3 Photoconductive-Junction Detection, 453
 - 22.3.4 Photoemissive Detection, 454
 - 22.3.5 Photoelectromagnetic Detection, 454
 - 22.3.6 Thermoelectric Detection, 454
 - 22.3.7 Bolometric Detection, 455
 - 22.3.8 Pyroelectric Detection, 455
 - 22.3.9 Pressure-Actuated Photoelectric Detection, 455
- 22.4 Design and Operation, 456
 - 22.4.1 Photovoltaic Optical Detectors, 456
 - 22.4.2 Photoconductive Optical Detectors, 460
 - 22.4.3 Photoconductive-Junction Optical Detectors, 464
 - 22.4.4 Photoemissive Optical Detectors, 466
 - 22.4.5 Photoelectromagnetic Optical Detectors, 469
 - 22.4.6 Thermoelectric Optical Detectors, 470
 - 22.4.7 Bolometer Optical Detectors, 471
 - 22.4.8 Pyroelectric Optical Detectors, 472
 - 22.4.9 Golay-Type Detectors, 473
- 22.5 Detector Characteristics, 474
 - 22.5.1 Performance Characteristics Terminology, 474
 - 22.5.2 Specification Characteristics, 476
- 22.6 Application Notes, 478
 - 22.6.1 Optical Detection Systems, 478
 - 22.6.2 Typical Applications, 485

23	NUCLEAR RADIATION DETECTORS	487
23.1	Definitions and Related Items,	487
23.1.1	Basic Definitions,	487
23.1.2	Related Fundamental Constants,	490
23.1.3	Related Laws,	490
23.2	Units of Measurement,	491
23.3	Sensing Methods,	492
23.3.1	Radiation Detection Using Ionization,	492
23.3.2	Radiation Detection Using Scintillation,	494
23.3.3	Electron Detection,	494
23.4	Design and Operation,	495
23.4.1	Ionization Chambers,	495
23.4.2	Proportional Counters,	497
23.4.3	Geiger Counters,	499
23.4.4	Semiconductor Detectors,	500
23.4.5	Scintillation Counters,	503
23.4.6	Electron Multipliers,	504
23.4.7	Neutron Detectors,	507
23.5	Detector Characteristics,	509
23.6	Application Notes,	510
23.6.1	Signal Conditioning and Display,	510
23.6.2	Selection Criteria,	512
23.6.3	Typical Applications,	513
24	TRANSDUCERS FOR ELECTRICITY AND MAGNETISM	514
24.1	Basic Definitions and Units of Measurement,	514
24.2	Sensing Methods, Transducers, and Other Sensing Devices,	517
24.2.1	Voltage Transducers,	517
24.2.2	Current Transducers,	518
24.2.3	Power Transducers,	520
24.2.4	Electrostatic-Charge Sensors,	522
24.2.5	Frequency- and Time-Sensing Devices,	523
24.2.6	Magnetic-Flux-Density Sensors,	524
