Nº 1 413

	Preface	xi
1	**Basic Operational Amplifier Circuits**	1
1.1	General Characteristics of Operational Amplifiers	3
1.2	The Ideal Amplifier Model	3
1.3	The Summer-Inverter	7
1.4	The Inverting Summer-Integrator	12
1.5	The General Inverting Amplifier	23
1.6	The Noninverting Amplifier	27
1.7	The Differential Amplifier	31
1.8	The Combined Inverting and Noninverting Amplifier	34
1.9	Simple First-Order Transfer Functions	40
1.10	Miscellaneous Linear Applications	47
	References and Bibliography	55
	Problems	55
2	**Performance Limitations: The Nonideal Amplifier**	71
2.1	The General Nonideal Linear Model	73
2.2	Closed-Loop Gain, Output Impedance, and Input Impedance	76
2.3	Closed-Loop Stability; Bode Plot Methods; Compensation	91

2.4	Common-Mode Effects	96
2.5	DC Offsets and Temperature Drift	101
2.6	Amplifier Internal Noise Effects	107
2.7	Large-Signal Limitations	118
2.8	Output Power Boosting	121
2.9	Power Supplies, Grounding, and Shielding	124
2.10	Components: Resistors and Capacitors	128
	References and Bibliography	130
	Problems	130
3	**Nonlinear Circuit Applications**	141
3.1	General Nonlinear Design Approach	142
3.2	Feedback Limiters and Comparators	150
3.3	Additional Piecewise-Linear Functions	171
3.4	Logarithmic Operators	195
3.5	Multipliers, Dividers, and Applications	203
3.6	Waveform Generation	219
	References and Bibliography	236
	Problems	236
4	**Active *RC* Filters**	257
4.1	General Design and Evaluation Techniques—Sensitivity	258
4.2	Second-Order Low-Gain-Amplifier Filters	266
4.3	Second-Order Infinite-Gain-Amplifier Filters	278
4.4	High-Q Filters	289
4.5	Cascade Realization of High-Order Filters—Tuning	295
4.6	Gyrator Filters and Negative-Impedance Converters	307
4.7	Generalized Impedance Converter Filters	315
	References and Bibliography	323
	Problems	324
5	**Electronic Switching Circuits**	329
5.1	Introduction	329
5.2	Ideal Switches and Real Switching Circuits	330
5.3	Diode Switching Circuits	332
5.4	Bipolar-Transistor Switches	334
5.5	Junction Field-Effect Transistor (JFET) Switches	337
5.6	Metalized-Oxide-Semiconductor Field-Effect Transistor (MOSFET) Switches and CMOS Integrated Circuits	341
5.7	Some Improved Switching Circuits	344
5.8	Sample-Hold Circuits	345
5.9	Integrator Mode Control and Related Switching Circuits	349
	References and Bibliography	354

6	**Digital-to-Analog and Analog-to-Digital Converters**	357
6.1	Digital Representation of Voltages; Simple Conversion Circuits	357
6.2	Practical Digital-to-Analog Converters; Voltage-Ladder Circuits	360
6.3	Current-Switching DACs	371
6.4	Static-Error Specifications	373
6.5	A Discussion of DAC Settling Time; Spikes and Glitches	373
6.6	Analog-to-Digital Conversion	376
6.7	Parallel-Comparator and Cascade-Encoder ADCs	376
6.8	Ramp-Comparator Converters	380
6.9	Integrating Converters	380
6.10	Analog-to-Digital Converters Using Digital-to-Analog Feedback	382
6.11	Specifications and Comparison of Analog-to-Digital Converters	384
	References and Bibliography	387
	Problems	388
	Index	389
