

CONTENTS

№1 424

	PREFACE	xiii
	ACKNOWLEDGMENTS	xvii
1	HOSPITAL ORGANIZATION AND ADMINISTRATION	1
	The Hospital as a System	1
	Clinical Engineering	3
	Intensive Care Areas	5
	Conclusion	8
2	ELECTRONICS FOR BIOMEDICAL INSTRUMENTATION	10
	Electron-Tube Characteristics	11
	Vacuum-Tube Diodes	13
	Triode Vacuum Tubes	13
	Graphical Analysis of Electron-Tube Performance	18
	The Bipolar Transistor	20
	Operational Amplifier	26

3	FUNDAMENTALS OF MEDICAL INSTRUMENTATION	45
	The Instrumentation System	46
	Performance Characteristics of Medical Instrumentation Systems	48
	Linearity in Medical Transducer and Instrumentation Systems	50
	Nonlinear Static Characteristics	51
	Dynamic Response of Instruments	53
	Zero-Order Systems	54
	First-Order Systems	55
	Second-Order Systems	57
	Transducers	60
	Measurement due to Change in Resistivity	65
	Capacitive Transducer	74
4	BIOELECTRIC POTENTIALS AND ELECTROCARDIOGRAPHY	83
	The Cell as a Bioelectric Generator	83
	Mathematical Models of Cell Resting Potential	85
	Generation of an Action Potential	86
	Electrical Activity of the Heart	90
	Mechanical Events in the Cardiac Cycle	91
	Action Potentials of the Heart and Formation of the ECG	93
	Electrocardiography: An Electrical Assessment of Cardiac Performance	96
	Vector Cardiography	101
5	ELECTROCARDIOGRAPHIC INSTRUMENTATION SYSTEMS	107
	The Theory of Electrodes	107
	Electrode-Electrolyte Interface	108
	Circuit Model Representation of the ECG Electrode	111
	The Biopotential Amplifier	114
	Operating Specifications for Differential Amplifiers	117
	Control of Factors That Reduce ECG Performance	118
	Performance Criteria for ECG Systems	124
	Performance Function Testing of Electrocardiographic Monitors and Direct-Writing Systems	126
	Performance Test Procedures for CMRR	130

6	MEASUREMENT AND MONITORING OF BLOOD PRESSURE	135
	Indirect Measurement of Blood Pressure	136
	Direct Measurement of Blood Pressure	139
	Blood Pressure Monitoring Systems: Direct Measurement	142
	Dynamic Response of Blood Pressure Monitoring Systems	145
	Performance Testing of Blood Pressure Monitoring Systems	153
	Relationship between Direct and Indirect Blood Pressure Measurement	155
7	ELECTRONIC PACEMAKER SYSTEMS	159
	Heart Block	160
	Pacemaker Construction	160
	Pacing Modes of Operation	160
	Pacing Leads and Electrodes	163
	Pacemaker System	164
	Engineering Design Considerations	165
	Pacemaker Refractory Period	170
	Electromagnetic Interference	171
	Programmable Pacemakers	171
	Inspection and Performance Testing of Cardiac Pacemakers	176
8	THE RESPIRATORY SYSTEM AND THE MEASUREMENT OF PULMONARY MECHANICS	183
	The Respiratory System	183
	Elements of Respiratory Physiology	184
	Resistance and Compliance of the Lungs	186
	Pulmonary Function Tests and Measurements	188
	Measurement of Lung Capacities and Volumes	190
	Measurement of Volume of Thoracic Gas	194
	Measurement of Airway Resistance	197
	Brief History of Respirators	200
	Performance and Safety Testing of Spirometers and Plethysmographs	200
9	MEDICAL ULTRASOUND SYSTEMS	207
	Intensity of Ultrasound Waves	208
	Ultrasound Attenuation	209

Characteristic Impedance	209
Wave Behavior at Boundary between Two Media	210
Ultrasound Transducers	214
Characteristic Impedance of Matching Material	218
Diagnostic Uses of Ultrasound	220
Multielement Transducer Systems	230
Safety Considerations of Diagnostic Ultrasound	232
Equipment Performance Testing	233

10 ENGINEERING PRINCIPLES OF MEDICAL X-RAY SYSTEMS 237

X-Ray Systems	237
X-Ray Production	238
X-Ray Power Supplies	245
Theory of Design of X-Ray Tubes	252
X-Ray Tube Anode Design	261
Heat-Loading Characteristics of X-Ray Tubes As Given by Tube Rating Charts	269
Rectification: The Approximation of Constant Potential Voltage, Current, and Power Relationships at the X-Ray Tube	279
High-Voltage Cables in X-Ray Systems	289
Three-Phase Power for X-Ray Generation	296
Three-Phase Rectification System	301
Voltage-Phase Relationships in the Secondaries of the Transformer	306
Power Calculation and Heat Loading in A Three-Phase System	307
Comparative Advantages of Three-Phase and Single-Phase Anode Voltages	309
X-Ray Switches and Timing Methods for Exposure Control	312
X-Ray Computed Tomography	320
Performance Standards for Medical X-Ray Equipment	336

11 ENGINEERING ASPECTS OF RADIATION 345

Interaction of Radiation with Matter	345
Definitions of Interactions	346
Mechanisms of Radiation Interaction with Matter	347
The Linear Attenuation Coefficient	351
Half-Value Layer	354

	Mass Attenuation Coefficient	356
	Measurement of Radiation Exposure	358
	X-Ray Shielding	362
12	ENGINEERING PRINCIPLES OF NUCLEAR DETECTION AND MEDICAL IMAGING SYSTEMS	376
	Instrumentation for the Detection and Measurement of Nuclear Radiation for Medical Usage	376
	Characteristics of Electrical Signals from Detector Output	382
	Electronic Pulse-Height Analyzer	386
	The Anger Scintillation Camera	395
	Operational Characteristics of Scintillation Cameras	403
13	DEFIBRILLATION AND CARDIOVERSION	412
	AC Defibrillators	413
	DC Defibrillators	415
	Synchronized Operation: Cardioversion	420
	Performance Testing of Defibrillators	421
14	ELECTROSURGICAL SYSTEMS	429
	History of Electrosurgery	432
	Theory of Operation: Active-Device Oscillators	432
	The Spark Gap Oscillator	435
	Hazards Associated with Electrosurgery	437
	Output Circuit Design	438
	Performance and Safety Testing of Electrosurgical Units	441
15	HOSPITAL ELECTRICAL SUPPLY AND POWER SYSTEMS	447
	Hospital Electrical Systems	447
	General Power and Lighting Systems	449
	Hospital Wiring Systems	450
	Codes: Hospital Construction and Operation	451
	Electrical Safety in the Hospital	452
	Isolated Power Systems	465
	Line Isolation Monitor	468

Performance Testing of Isolated Power Systems	479
Isolated Power in Patient Care Areas	483

16 ELECTRICAL PERFORMANCE AND SAFETY TESTING OF ELECTROMEDICAL EQUIPMENT 489

Mechanical Testing of Electrical Outlets	490
Electrical Testing of Electrical Outlets	491
Testing of Electromedical Equipment	491
Electrical Safety Test Procedures	492
Performance Testing	496
Tagging of Medical Equipment	498

17 CODES AND STANDARDS THAT PERTAIN TO THE CLINICAL ENGINEER 501

Safe Use of Electricity in Patient Care Areas of Hospitals	505
The Occupational Safety and Health Act	506
FDA Medical Device Regulation	506
Conclusion	508

INDEX 511
