

Series Foreword	v
Preface.....	vii

– Biomaterials for musculo-skeletal and dental applications –

Section 1. Hydroxylapatite and other calcium–phosphorus based materials

Sintered hydroxyapatite for a percutaneous device H. Aoki, Y. Shin, M. Akao, T. Tsuji, T. Togawa, Y. Ukegawa, R. Kikuchi	1
Implants of hydroxylapatite in the cricoid F.C.P.M. Adriaansen, H.L. Verwoerd-Verhoef, R.O. van der Heul, C.D.A. Verwoerd.....	5
Composition, structures and properties of calcium phosphates of biological interest J.C. Heughebaert, G. Bonel	9
Cooperative dipolar movements in synthetic apatites and human tooth enamel A. Lamure, E. Plaino, C. Lacabanne, N. Hitmi, C. Rey, G. Bonel, R.A. Young.....	15
Integration of synthetic apatite of various pore size and density in bone B.A. Rahn, J. Neff, A. Leutenegger, R. Mathys, S.M. Perren	21
Biological performance of B-Whitlockite C.A. van Blitterswijk, H.K. Koerten, J.J. Grote	27
Calcium–aluminum phosphate for biological applications M. Heughebaert, G. Daculsi, J.C. Heughebaert, F. D'Yvoire	33
Bone regeneration with collagen-apatite B.D. Katthagen, H. Mittelmeier	39
Observation on bone-formation sequence elicited by the implantation of bone gelatine together with calcium phosphate compounds J.M. Rueger, H.R. Siebert, H. Schmidt, A. Pannike	45
Inorganic–organic combinations for bone repair J.E. Lemons	51

Section 2. Alloys

Surface characterisation of titanium and Ti-alloys P.A. Maeusli, P.R. Bloch, V. Geret, S.G. Steinemann	57
The electrochemical behaviour of titanium and titanium alloys with respect to their use as surgical implant materials J.P. Simpson	63
Development of a vital, high-strength titanium–aluminium–niobium alloy for surgical implants M. Semlitsch, F. Staub, H. Weber	69
Development of Fe–Cr–Al alloy with alpha alumina layer diffused on the surface H. Oonishi, H. Okabe, T. Ike, E. Tsuji, T. Nabeshima	75

Section 3. Other materials

Mechanical properties of carbon fibre reinforced polysulfone plates for internal fracture fixation L. Claes, W. Huttner, R. Weiss	81
Surface Chemistry and material science aspects of glassy carbon implants W. Durr, H. Newesely.....	87
Facial bone augmentation using Bioglass in dogs J. Wilson, G.E. Merwin, L. Rodgers, R.G. Martin, D.B. Spilman.....	93

Fluoride bioglasses	
L.L. Hench, D.B. Spilman, D.R. Nollelli	99
High strength all-ceramic dental jacket crowns	
P.M. Marquis, V. Piddock, H.J. Wilson	105
Per mucosal dental implants of dense hydroxylapatite, evaluation and prognosis of their retention in alveolar bone	
C. de Putter, G.L. de Lange, K. de Groot	111
Correction of resorption defects in the anterior maxillary region with hydroxylapatite	
F.L.J.A. de Wijs, G.L. de Lange, C. de Putter, K. de Groot	117
Dimensional behaviour of dental composites due to polymerization shrinkage and water sorption	
U. Soltesz, P. Bath, B. Klaiber	123
Morphometric comparison of histologic bone reactions after implantation of mono- and polycrystalline aluminumoxide pins	
W. Wagner, H. Rixecker, U.W. Wahlmann	129
Longterm implantation of a polyethylene ligament/tendon allograft in sheep: mechanical and histological studies	
J.M. Rueger, H.R. Siebert, K. Wagner, A. Pannike	135
Comparison of antigen extracted, lyophilized and glutaraldehyde fixed bovine xenograft: a preliminary study	
J.R. Parsons, J.C. Tauro, J.L. Ricci, H. Alexander, A.B. Weiss	141
A Porous composite for reconstruction of meniscus lesions	
J.W. Leenslag, A.J. Pennings, R.P.H. Veth, H.K.L. Nielsen, H.W.B. Jansen	147
In vivo evaluation of hydroxyapatite reinforced polyethylene composites	
W. Bonfield, C. Doyle, K.E. Tanner	153
– Biomaterials for soft tissues, cardiovascular devices and drug delivery –	
Current status of biomaterials in ophthalmology	
M.F. Refojo	159
Deposits and adsorption of tear proteins on polyvinylpyrrolidone-CO-methylmethacrylate soft contact lenses	
T. Bilbault, A.M. Gachon, B. Dastugue	171
Reconstruction of a human living skin equivalent in vitro	
B. Coulomb, P. Saiag, B. Bertaux, C. Lebreton, M. Heslan, E. Bell, L. Dubertret	177
Interaction of collagen with polyethylene and with polymaleic acid-grafted polyethylene polymer surfaces: in situ adsorption-desorption studies	
M. Deyme, A. Baszkin, M.M. Boissonnade, G. Albrecht	183
Small diameter blood vessel prostheses from polyethers	
J.G.F. Bots, L. van der Does, A. Bantjes	189
Hemocompatibility of bulk-heparinized material in dog and human	
R. Eloy, J. Belleville, J. Baguet, M.C. Risoan, C. Pusineri	195
Heparine-like treated tubes: preparation and characterization	
V. Migonney, C. Fougnot, M. Jozefowicz	201
Plasma treatment of the inner surface of polymer tubes for the improvement of their anticoagulant properties	
B. Jansen, H. Steinhauser, W. Prohaska	207
Hemocompatibility and biological course of carbon-ceramic composites in vascular surgery	
E. Chignier, M. Comtat, J.R. Monties, B. Butazzoni, G. Dureau, R. Eloy	213
Bovine collagen membrane used as microvascular substitute in rats	
E. Chignier, A. Huc, C. Gleizal, R. Gimeno, R. Eloy	217
New fibrin containing thermoplastic elastomers for cardiovascular applications	
P. Giusti, G. Soldani, M. Palla, M. Paci	221

In vitro and in vivo degradation of poly-L-lactide fibers K. Jamshidi, S.H. Hyon, T. Nakamura, Y. Ikada, Y. Shimizu, T. Teramatsu.....	227
Further clinical applications of bioresorbable PLA 37.5 GA 25 and PLA 50 polymers for limited bone augmentation and bone replacement M. Chanavaz, F. Chabot, M. Donazzan, M. Vert.....	233
The degradation of ¹⁴ C labelled polymers by enzymes D.F. Williams, R. Smith, C. Oliver.....	239
Synthesis of polydepsipeptides by ring-opening polymerization J. Helder, F.E. Kohn, S. Sato, J.W.A. van den Berg, J. Feijen	245
The release of drugs from acrylic resin I.M. Brook, D.J. Lamb, R. van Noort.....	251
Resorbable pins for the refixation of osteochondral fragments L. Claes, C. Burri, H. Kiefer, W. Mutschler.....	257
– Blood–biomaterials interactions –	
The influence of substratum surface free energy on spreading of various celltypes on polymers J.M. Schakenraad, H.J. Busscher, C.H. Wildevuur, J. Arends.....	263
Studies of endothelial cells adhesion to glutaraldehyde or carbodiimide cross-linked proteins J.L. Duval, M.F. Sigot-Luizard, M. Sigot.....	269
A modification of an in vitro method for assessment of blood compatibility R. Karwath, H. Wolf	275
In vitro assessment of the platelet response to haemodialysis membranes M. Travers, J.M. Courtney, J.P. Paul, J.T. Douglas, G.D.O. Lowe, C.D. Forbes	281
Comparison of platelet deposition between hollow fibers and flat plate membrane oxygenators (M.O.) A. Lautier, J. Awad, J.P. Gille, E. Wirquin, T. Dehe.....	287
High spatial resolution imaging of labelled blood cells or proteins on artificial materials C. Baquey, N. More, B. Basse-Cathalinat, A. Beziade, D. Ducassou	293
Inhibition of complement activation by modifying reactive surfaces M.P. Carreno, D. Labarre, M. Kazatchkine, M. Jozefowicz	299
Substituted dextrans with potent anticoagulant and anticomplementary activities B. Crepon, F. Maillet, M.D. Kazatchkine, J. Jozefonvicz	305
Microstructure of polyether-segmented polyamides and its role in antithrombogenicity N. Yui, K. Kataoka, T. Okano, Y. Sakurai, K. Sanui, N. Ogata	309
Leukocyte deposition and protein adsorption on cuprophan and polyacrylonitrile hemodialysis membranes M.C. Tanzi, S. Scuri, R. Fumero, G. Cairo, C. Barozzi.....	315
Adsorption of human antibodies to factor VIII:C by various derivatives of insoluble polystyrene H. Messaïkeh, N. Belattar, D. Gulino, Y. Sultan, J. Jozefonvicz	321
– Biocompatibility evaluation –	
Characterization of the in vivo cellular response to selected polymers C.A. Behling, M. Spector	327
Tissue tolerance to irradiated PTFE-grafted polyethylene M. Heller, P. Christel, G. Gaussens, P. Dallant, A. Meunier, L. Sedel	331
Cell interactions with mixed calcium phosphate (TCP and HAP) and alumina solid phases: an ultrastructural study G. Daculsi, I. Orly, M. Gregoire, M. Heughebaert, D.J. Hartmann, B. Kerebel	337
Biocompatibility studies of ¹⁴ C labelled carbon–carbon composites N. More, C. Baquey, M.F. Harmand, R. Duphil, F. Rouais, M. Trinquécoste, A. Marchand	343

Effect of a glycoprotein monomolecular layer on the integration of titanium implants in bone T. Albrektsson, T. Arnebrant, K. Larsson, T. Nylander, L. Sennerby	349
Role of fibronectin in the susceptibility of biomaterial implants to bacterial infections P. Vaudaux, P. Lerch, M.I. Velazco, U.E. Nydegger, F.A. Waldvogel	355
Human differentiated cell cultures: 'in vitro' models for characterization of cell-biomaterial interface M.F. Harmand, L. Bordenave, R. Duphil, R. Jeandot, D. Ducassou	361
Testing procedures for surface reactive biomaterials U. Gross, W. Roggendorf, H.J. Schmitz, V. Strunz	367
Study of proteins cross-linking on dacron vascular prosthesis R. Warocquier-Clerout, M. Legendre, P. Frayssinet, M.F. Sigot-Luizard	373
Cellular interactions with synthetic polymer surfaces: surface modification of polystyrene for cell culture K.D. Thomas, B.J. Tighe, M.J. Lydon	379
Collagen formation in tissue culture in relation to orthopaedic implant metals E.J. Evans, I.T. Thomas	385
The effect of implantable metals on enzyme kinetics D.F. Williams, H. Crowley	391
Quantitative evaluation of biocompatibility of vanadium free titanium alloys S.M. Perren, V. Geret, D. Meier, B.A. Rahn	397
Model of the metal-tissue connection of implants made of titanium or tantalum H.P. Tummler, R. Thull	403
Adhesion of bone to titanium S.G. Steinemann, J. Eulenberger, P.A. Maeusli, A. Schroeder	409
Immunological aspects of contact hypersensitivity to Ni-Cr dental alloys K.J.J. Vreeburg, K. de Groot, C.K.H. v.d. Burg, R.J. Scheper	415
- Bone and joints characterization and replacement -	
A new approach to the structure and mechanical properties of compact bone A. Ascenzi, S. Carando, M. Portigliatti Barbos	419
Human skeletal system loading patterns associated with activities of daily living A. Cappozzo	429
Cortical bone response to orthopaedic implant rigidity: an experimental study P. Dallant, A. Meunier, G. Guillemin, P. Christel, J.M. Crolet, L. Sedel	441
Mechanical properties of trabecular bone in repetitive axial loading F. Linde, I. Hvid, N.C. Jensen	447
The frequency and temperature dependence of longitudinal ultrasonic velocities in bovine bone J.L. Katz, R.L. Maharidge, H.S. Yoon	453
Time-dependent and cycle-dependent bone fracture W.E. Caler, D.R. Carter	459
A computerised knee joint simulator F. Pelisse, F. Marie	465
Biological fixation of various titanium and carbon implants in cancellous bone: biomechanical and histomorphological evaluation H. Kiefer, L. Claes, C., Burri, K. Kuglmeier	471
Enhanced stabilization of orthopaedic implants with spherical hydroxylapatite particulate J.R. Parsons, J.L. Ricci, P. Liebrecht, R. Salisbury, H. Alexander	477
The effects of collagen on tissue growth into a porous polyethylene ingrowth model J.A. Longo, A.M. Weinstein, A.K. Hedley	483
Applicability of the proof-test concept to ceramic hip-joint heads G. Kleer, U. Soltész, D. Siegele	489

Examination of retrieved hip-prostheses: wear of alumina–alumina components J.M. Dorlot, P. Christel, L. Sedel, J. Witvoet, P. Boutin	495
Release of trace elements from ceramic–metal endoprotheses of the hip joint F. Loer, J. Zilkens, E. Schmidt, M. Nolte, M. Reich, R. Michel	501
Surface strain analysis of UHMWPE total hip acetabular cups in a quasi-static loading model Th. Mittlmeier, W. Plitz, H. Schmotzer	507
Biomechanical studies on fixations of an artificial hip joint acetabular socket by means of 2D–FEM H. Oonishi, M. Tatsumi, A. Kawaguchi	513
Per mucosal dental implants: the relationship between bone anchorage and the quality of surrounding gingival tissues G.L. de Lange, C. de Putter, R. de Vos, R. de Laat, K. de Groot	519
Creep behaviour of composite bone cement A. Castaldini, A. Cavallini	525
Authors index	531
Subject index	534
