

Preface .....	v
General characteristics and classifications of implant material J.E. Lemons (Birmingham, AL, U.S.A.) .....	1
Biological requirement for biomaterials. I. Cytotoxicity of biomaterials, in Vitro. II. Cell adhesion to biomaterials, in Vitro H. Kawahara (Osaka, Japan) .....	15
Structure and mechanical properties of articular cartilage V.C. Mow and W.M. Lai (Troy, NY, U.S.A.) .....	39
Histophysiology of bone remodelling and bone repair R.K. Schenk (Bern, Switzerland) .....	75
Structural and mechanical behaviors of tendons and ligaments S.L.-Y. Woo and W.H. Akeson (San Diego, CA, U.S.A.) .....	95
Bone response to grafts and implants R.K. Schenk (Bern, Switzerland) .....	123
Biomechanical and biomaterial aspects of bone and joint implant failure E.Y.S. Chao (Rochester, MN, U.S.A.) .....	137
Materials for hard tissue replacement H. Kawahara (Osaka, Japan) .....	167
Clinical results of metal and plastic implants in total hip replacement W.H. Harris (Boston, MA, U.S.A.) .....	207
Biomechanical considerations of metal and composite materials for bone fracture fixation plates S.L.-Y. Woo, W.H. Akeson and R.D. Coutts (San Diego, CA, U.S.A.) .....	223
Metallic corrosion and biodegradation in In-Vitro and In-Vivo environments J.E. Lemons (Birmingham, AL, U.S.A.) .....	245
The systematic transport of cobalt, chromium and nickel ions after artificial joint replacement R. Shiba (Kobe, Japan) .....	253
Bioceramics for restoration of maxillofacial bone defects – from biology and dentistry perspective – S. Yanagisawa (Nihon, Japan) .....	257

VIII

Bone ingrowth study of glass ceramic as an orthopaedic implant material  
R. Shiba (Kobe, Japan) . . . . . 273

Aluminium oxide ceramic-titanium alloy materials for total hip replacement  
P. Christel, A. Meunier, J.-M. Crolet, L. Sedel and J. Witvoet (Paris, France) . . . . 277

The application of bone ingrowth materials in musculoskeletal maxillomandibular  
and craniofacial reconstructions  
E.Y.S. Chao (Rochester, MN, U.S.A.) . . . . . 289

Optimization of bony ingrowth for fixation of total hip replacements  
W.H. Harris (Boston, MA, U.S.A.) . . . . . 321

Carbon implants with fine rahmen surface layer  
S. Yanagisawa (Nihon, Japan) . . . . . 333
