|                           |       |
|---------------------------|-------|
| List of Figures . . . . . | xi    |
| List of Tables . . . . .  | xv    |
| Series Foreword . . . . . | xvii  |
| Preface . . . . .         | xix   |
| Acknowledgments . . . . . | xxvii |

## **SECTION I—Kinematic and Force Analysis of Articulated Hands**

—J.K. Salisbury, Jr.

|                        |   |
|------------------------|---|
| Nomenclature . . . . . | 2 |
|------------------------|---|

### **Chapter 1 Introduction**

|  |   |
|--|---|
| 1.0 Robots - Fact and Fiction . . . . .  | 3 |
| 1.1 Overview of Existing Hands . . . . . | 4 |
| 1.2 Preview . . . . .                    | 5 |

### **Chapter 2 Contact - Freedom and Constraint**

|  |    |
|--|----|
| 2.0 Introduction . . . . .                                 | 9  |
| 2.1 Contact . . . . .                                      | 11 |
| 2.2 Types of Contact Between Bodies . . . . .              | 12 |
| 2.3 Effect of Single Contacts Between Bodies . . . . .     | 14 |
| 2.4 Screws, Twists and Wrenches . . . . .                  | 15 |
| 2.5 Geometry of Contact Twist and Wrench Systems . . . . . | 19 |

### **Chapter 3 Number Synthesis of Hands**

|  |    |
|--|----|
| 3.0 Introduction . . . . .                   | 25 |
| 3.1 Mobility and Connectivity . . . . .      | 26 |
| 3.2 Enumeration of Hand Mechanisms . . . . . | 27 |

### **Chapter 4 Contacts in Groups**

|  |    |
|--|----|
| 4.0 Introduction . . . . .                     | 33 |
| 4.1 Constraint by Groups of Contacts . . . . . | 34 |
| 4.1.1 3-Freedom Contact . . . . .              | 34 |
| 4.1.2 4-Freedom Contact . . . . .              | 36 |
| 4.1.3 5-Freedom Contact . . . . .              | 37 |

### **Chapter 5 Complete Restraint and Internal Forces**

|                                  |    |
|----------------------------------|----|
| 5.0 Introduction . . . . .       | 39 |
| 5.1 Algebraic Approach . . . . . | 40 |

|  |  |     |
|--|--|-----|
| 5.2  | Geometric Approach . . . . .                               | 44  |
| <b>Chapter 6</b>   | <b>Force Application and Velocity Analysis</b>             |     |
| 6.0  | Introduction . . . . .                                     | 49  |
| 6.1  | The Grip Transform, $G$ . . . . .                          | 50  |
| 6.2  | Control and Sensing of External and Internal Forces .      | 51  |
| 6.3  | Control and Sensing of Velocities . . . . .                | 52  |
| <b>Chapter 7</b>   | <b>Stiffness Control and Sensing</b>                       |     |
| 7.0  | Introduction . . . . .                                     | 55  |
| 7.1  | Review of Force Control . . . . .                          | 56  |
| 7.2  | Stiffness Control . . . . .                                | 59  |
| 7.3  | Stiffness Sensing . . . . .                                | 63  |
| 7.4  | Conclusions . . . . .                                      | 64  |
| <b>Chapter 8</b>   | <b>Force Error Analysis</b>                                |     |
| 8.0  | Introduction . . . . .                                     | 65  |
| 8.1  | Effect of Structural Stiffness on Force Accuracy . . . . . | 65  |
| 8.2  | Force Error Propagation . . . . .                          | 68  |
| 8.3  | Isotropic Points in a Two-link Mechanism . . . . .         | 69  |
| 8.4  | Isotropic Points in a Three-link Mechanism . . . . .       | 74  |
| 8.5  | Conclusions . . . . .                                      | 76  |
| <b>Chapter 9</b>   | <b>Conclusions</b>   |     |
| 9.0  | Review . . . . .   | 77  |
| 9.1  | Stanford/JPL Hand . . . . .                                | 78  |
| 9.2  | The Future . . . . .                                       | 87  |
| <b>References</b>  |  | 90  |
| <b>Appendix</b>  |  | 94  |
| <i>Active Stiffness Control of a Manipulator</i>                 |  |     |
| <i>in Cartesian Coordinates</i> . . . . .                        |  | 95  |

| <i>Design and Control of an Articulated Hand</i> . . . . .       |  | 151 |

**SECTION II—*Manipulator Grasping and Pushing Operations***

—M.T. Mason

|                   |  |     |
|-------------------|--|-----|
| <b>Chapter 1</b>  | <b>Introduction</b>                    | 171 |
| 1.1               | Analysis of an Example Grasping Motion | 172 |
| 1.2               | Discussion                             | 179 |
| 1.3               | Overview                               | 183 |
| 1.4               | Previous Work                          | 184 |
| <b>Chapter 2</b>  | <b>Theory of Pushing</b>               | 189 |
| 2.1               | Friction of Planar Motion              | 192 |
| 2.2               | Pushing with Fixed or Rolling Contact  | 201 |
| 2.3               | Pushing with Sliding Contact           | 221 |
| 2.4               | Undetermined Contact Mode              | 236 |
| 2.5               | On Quasi-static Analysis               | 244 |
| <b>Chapter 3</b>  | <b>Application</b>                     | 253 |
| 3.1               | Automatic Orientation                  | 253 |
| 3.2               | Automatic Planning of Grasping         | 261 |
| 3.3               | Verification of Grasping               | 263 |
| <b>Chapter 4</b>  | <b>Conclusion</b>                      | 271 |
| <b>Table 1</b>    |  | 273 |
| <b>Appendix</b>   |  | 275 |
| <b>References</b> |  | 287 |
| <b>Index</b>      |  | 295 |
