Useful Physical Constants and Conversion Factors   xiii

## 1 INTRODUCTION   1

## 2 THE WAVE EQUATION AND ITS SOLUTIONS   5

- 2.1 Derivation of the Wave Equation   5
  - 2.2 Solutions to the Wave Equation   10
  - 2.3 The Wave Nature of the Solutions   11
- Problems   18

## 3 IMPEDANCE, POWER, AND REFLECTION   21

- 3.1 Introduction   21
  - 3.2 Impedance of a Medium   21
  - 3.3 Power Density   24
  - 3.4 Reflection of Waves at Interfaces   26
    - 3.4.1 Angles of Reflection and Transmission   26
    - 3.4.2 Magnitudes of Reflected and Transmitted Waves   29
    - 3.4.3 Powers of Reflected and Transmitted Waves   34
- Problems   38

## 4 ACOUSTICAL PROPERTIES OF BIOLOGICAL TISSUES   43

- 4.1 Introduction   43
  - 4.2 Survey of Biological Tissues   43
    - 4.2.1 The Cell   44
    - 4.2.2 Tissue Types   45
  - 4.3 Attenuation in Tissues   53
  - 4.4 Viscosity Relaxation in Tissues   59
  - 4.5 Values of Acoustic Parameters for Biological Tissue   60
- Problems   64

## **5 TRANSDUCERS, BEAM PATTERNS, AND RESOLUTION 69**

- 5.1 Introduction 69
  - 5.2 Electrical Excitation of Piezoelectric Transducers 70
    - 5.2.1 Continuous Wave Excitation 72
    - 5.2.2 Pulsed Excitation and Axial Resolution 82
  - 5.3 Beam Patterns 89
    - 5.3.1 Near-Field Pattern (On-Axis) of a Circular Transducer 91
    - 5.3.2 Far-Field Pattern of an Ultrasound Transducer 94
  - 5.4 Width of Beam in Near Field and Far Field 102
  - 5.5 Focusing with Lenses, and Lateral Resolution 104
  - 5.6 Linear Arrays 112
- Problems 118

## **6 DIAGNOSTIC IMAGING CONFIGURATIONS 123**

- 6.1 Introduction 123
  - 6.2 A-Mode 124
    - 6.2.1 Signal Conditioning 129
    - 6.2.2 Applications of A-Mode 133
  - 6.3 B-Mode 135
    - 6.3.1 Compound B-Scanners 140
    - 6.3.2 Applications of B-Mode 141
  - 6.4 Real-Time B-Scanners 143
    - 6.4.1 Mechanical Scanners 144
    - 6.4.2 Electronic Scanners 146
  - 6.5 M-Mode 158
  - 6.6 C-Mode 160
    - 6.6.1 Acoustic Holography and Synthetic Aperture 163
    - 6.6.2 Ultrasonic Computerized Tomography 165
  - 6.7 Other Medical Uses of Ultrasound 166
    - 6.7.1 Surgery with Ultrasound 166
    - 6.7.2 Heat Production and Hyperthermia 167
    - 6.7.3 Ultrasonic Microscope 169
- Problems 169

## **7 DOPPLER AND OTHER ULTRASONIC FLOWMETERS 175**

- 7.1 Introduction 175
- 7.2 The Doppler Principle 176
  - 7.2.1 Vector Formulation 179
  - 7.2.2 Examples of Doppler Configurations 181
- 7.3 CW Doppler Flowmeters 185
  - 7.3.1 Audible-Output Instruments 188
  - 7.3.2 Analog-Output Instruments 190
  - 7.3.3 Spectrum-Output Instruments 192
- 7.4 Doppler Imagers 192
  - 7.4.1 CW Transverse Scanners 194
  - 7.4.2 Pulsed Doppler Flowmeters 196
  - 7.4.3 Duplex Scanners 200

- 7.5 Transit Time Flowmeter 203  
7.6 Vortex Flowmeter 207  
Problems 208

## **8 THE SAFETY AND MEASUREMENT OF ULTRASOUND 213**

- 8.1 Introduction 213  
8.2 Possible Mechanisms of Damage 214  
8.3 Measuring Ultrasound Exposure Levels 215  
    8.3.1 Measurement Techniques 218  
8.4 Safety Standards 220  
Problems 223
