BIBLIOTECA

Nº 1 5 1 2

INTRODUCTION

Chapter 1

Structural Considerations of Plastic Materials 3
G. W. Hastings

PROPERTIES

Chapter 2

Molecular Structure Determination and Characterization 21
J. W. A. van den Berg and J. Schuijjer

Chapter 3

The Relationship Between the Mechanical Properties of Polymers and their
Structure..... 57
N. J. Mills

SELECTED APPLICATIONS

Chapter 4

Polymers of Natural Origin as Biomaterials. 1. Fibrin 91
G. Kerényi

Chapter 5

Polymers of Natural Origin as Biomaterials. 2. Collagen and Gelatin..... 111
M. Parkany

Chapter 6

Bioresorbable Plastic Materials for Bone Surgery 119
M. Vert, P. Christel, F. Chabot, and J. Leray

Chapter 7

Polymer Membranes..... 143
J. M. Courtney, J. D. S. Gaylor, H. Klinkmann, and M. Holtz

Chapter 8

Polymeric Inserts and Implants for the Controlled Release of Drugs 181
N. B. Graham and D. A. Wood

Chapter 9

Modifications to Polymer Surfaces to Improve Blood Compatibility 215
C. Fougnot, D. Labarre, J. Jozefonvicz, and M. Josefowicz

Chapter 10

Tissue Reactions with Silicone Rubber Implants (Morphological, Microchemical,
and Clinical Investigations in Humans and Laboratory Animals)..... 239
G. Mikuz, G. Hoinkes, A. Propst, and P. Wilflingseder

Index 253
