

FRONTIERS OF CHAOS	1
<i>Special Sections</i>	
1 Verhulst Dynamics	23
2 Julia Sets and Their Computergraphical Generation	27
3 Sullivan's Classification of Critical Points	53
4 The Mandelbrot Set	56
5 External Angles and Hubbard Trees	63
6 Newton's Method for Complex Polynomials: Cayley's Problem	93
7 Newton's Method for Real Equations	103
8 A Discrete Volterra-Lotka System	125
 MAGNETISM AND COMPLEX BOUNDARIES	 129
<i>Special Sections</i>	
9 Yang-Lee Zeros	139
10 Renormalization	142
