Nº 1 641

Preface	v
Section 1: General Systems	
Chapter 1. Behavior of Linear Systems	3
1.1. Introduction	3
1.2. Natural System Response of the Second-Order Linear System	7
1.3. Forced Excitation in Linear Second-Order Systems	10
1.4. Time Constants	12
1.5. Transient Response and Risetime	14
1.6. References	16
Chapter 2. Nonlinear Phenomena	17
2.1. Introduction	17
2.2. Simple Saturation	17
2.3. Hysteresis	18
2.4. Deadband	20
2.5. Harmonic Distortion	21
2.6. References	21
Section 2: Transducers	
Chapter 3. Principles of Transducer Operation	25
3.1. Introduction	25
3.2. Variable Impedance Devices	26
3.2.1. Variable Resistance Devices	27

3.2.2.	Variable Capacitance Devices	30
3.2.3.	Variable Inductance, Magnetic, and Faraday-Law Devices	36
3.3.	Piezoelectric and Ferroelectric Devices	42
3.4.	Thermoelectric Devices	43
3.5.	Photoelectric Devices	44
3.5.1.	Light Sources	53
3.6.	Fiber Optics	54
3.7.	Summary	56
3.8.	References	56
Chapter 4. Applications of Transducers		57
4.1.	Introduction	57
4.2.	Measurement of Displacement	57
4.3.	Force Measurements	65
4.3.1.	Load Cell	66
4.3.2.	Piezoelectric Crystal	66
4.3.3.	Variable Resistance Element	66
4.3.4.	Further Discussion of Piezoresistive Devices	68
4.4.	Temperature Transducers	69
4.5.	Fluid Flow Measurements	71
4.6.	Measurement of Acceleration, Shock, and Vibration	72
4.7.	Electromagnetic Dosimeter	73
4.8.	Hall-Effect Devices	74
4.9.	Magnetostrictive Devices	75
4.10.	Example of a Compound Transducer	76
4.11.	References	77
Chapter 5. Specific Transducers for Medical and Environmental Applications		78
5.1.	Introduction	78
5.2.	Clinical Pressure Measurements	78
5.3.	Blood Cell Counter	83
5.4.	Hemoglobinometer (Hematocrit Determination)	84
5.5.	Oximetry—A Colorimetric Transducer	86
5.6.	Piezoelectric Transducers	86
5.7.	Clinical Thermometer	88
5.8.	Respiratory Monitoring	88
5.9.	Environmental Monitoring	89
5.10.	Explosive Limit Detector	89
5.11.	Measurement of Stack-Plume Effluent	91

5.12. Particle Concentration Meter	94
5.13. Laser Particulate Spectrometer	96
5.14. Portable Drug Detection System.	97
5.15. Noise Measurements	100
5.16. Light Measurement	103
5.17. Summary	104
5.18. References	104

Chapter 6. Electrodes 105

6.1. Introduction	105
6.2. Metallic Electrodes	106
6.3. Electrode Interface Considerations	109
6.4. Microelectrodes	116
6.4.1. Electrode Pulling	118
6.4.2. Pipet Filling	120
6.5. Ion-Selective and Reference Electrodes	121
6.5.1. The Silver-Silver Chloride Electrode.	124
6.5.2. Fabrication of Ag-AgCl Electrodes	125
6.5.3. The Calomel Electrode	127
6.5.4. Salt Bridges	128
6.5.5. Reference Potential Cells—Standard Cells	130
6.5.6. Potentiometer for Voltage Measurements.	131
6.6. pH Electrodes and pH Meters	133
6.6.1. The Glass Electrode	133
6.6.2. pH Meter	136
6.6.3. Ion-Specific Electrodes	136
6.6.3.1. Calibration Curves	139
6.6.3.2. Use Extension of Existing Electrodes	140
6.6.4. The Glass Membrane Electrode	140
6.6.4.1. Calibration	140
6.6.4.2. Correction for pH	142
6.7. The Oxygen Electrode—A Polarographic Electrode	143
6.8. The CO ₂ Electrode	145
6.9. Other Techniques	146
6.10. References	147

Section 3: Amplifiers and Signal Conditioning

Chapter 7. Preamplifiers for Use with Transducers and Bioelectrodes 151

7.1. Preamplifier Input Considerations	152
7.1.1. Special Considerations for Microelectrodes	154

7.2.	Dynamic Response of Preamplifiers	157
7.2.1.	Amplifier Gain	158
7.2.2.	Bandwidth	160
7.2.3.	Gain-Bandwidth Product.	160
7.2.4.	Transient Response and Risetime	161
7.3.	AC-, DC-, and Chopper-Stabilized Preamplifiers	164
7.3.1.	AC Preamplifiers	165
7.3.2.	DC Preamplifiers	167
7.3.3.	DC Offset	167
7.3.4.	Chopper Preamplifiers	169
7.4.	Active Components in Preamplifiers	173
7.5.	Differential Amplifier	174
7.5.1.	Common Mode Signal.	175
7.6.	Operational Amplifiers	176
7.7.	Electrometer Preamplifiers	182
7.7.1.	Negative-Input-Capacitance Preamplifier	183
7.7.2.	General Properties of Some Electrometer Devices	187
7.8.	Logarithmic Amplifiers	190
7.9.	Feedback	194
7.10.	Isolation Networks	197
7.11.	Noise	198
7.12.	References	201

Chapter 8. Detectors for Transducer Systems **202**

8.1.	Variable Capacitance and Inductance Devices	202
8.1.1.	Oscillating Detector or Autodyne Circuit	203
8.1.2.	The Linear Discriminator Circuit	204
8.2.	Unbalanced-Bridge Detection Systems	206
8.3.	Impedance Matching	209
8.4.	References	212

Section 4: Recording and Display

Chapter 9. Display and Recording Systems **215**

9.1.	Chart Recorders and Plotters	216
9.2.	Tape Recording Devices	219
9.2.1.	Tape Configurations.	222
9.2.2.	Tape Transport Considerations	223

9.3. Alphanumeric Displays	226
9.4. Summary	230
9.5. References	231
Chapter 10. Instrumentation Systems	232
10.1. Spectrophotometers	232
10.2. Instrumentation for Avalanche Prediction Measure- ments	239
10.3. Measurement of Stack Emissions	244
10.4. Communication Prosthesis	249
10.5. Thermography	251
10.6. X-Ray Intensification and Isotope Scanners	252
10.7. Multispectral Imaging	254
10.8. Temperature Sensor	255
10.9. Conclusion	256
10.10. References	257
Section 5: Telemetry	
Chapter 11. Telemetry Systems	261
11.1. Introduction	261
11.2. The Basic Telemetry System	262
11.3. Basic Design Considerations	264
11.3.1. Range	264
11.3.2. Power Consumption	264
11.3.3. Physical Size	265
11.3.4. Weight	265
11.3.5. Radio Frequency of Operation	266
11.3.6. Lifetime	266
11.3.7. Environment	267
11.3.8. Transmission Medium	267
11.3.9. Subject Animal	268
11.4. Variables to be Monitored	268
11.5. Basic Circuits—Historical Discussion	268
11.6. Current Design Trends	276
11.7. Antenna Considerations	279
11.8. Two-Stage Telemetry Systems	283
11.9. Modulation Techniques	283
11.10. Some Receiver Considerations	285
11.11. Summary	286
11.12. References	286

Section 6: Practical Matters

Chapter 12. Some Practical Matters	291
12.1. Grounding	291
12.1.1. Safety Aspects	291
12.1.2. Patient Isolators	293
12.1.3. Ground Monitors	297
12.1.4. Ground Potential Differences	300
12.1.5. Ground Loops	301
12.2. Electrical Shielding	302
12.3. Electrosurgery Apparatus (ESA)	303
12.4. Equipment Selection	306
12.5. References	307
Appendix	308
Problems	319
Index	327
