# CONTENTS

## SECTION 1: PHYSIOLOGICAL PROCESSES

Modeling the Cardiac Function Curve 3
*R.L. Summers, J.-P. Montani*

Numerical Model of Fibrous and Ovoid Structure: Application to the Cardiac System 13
*C. Oddou, M. Boulos, J. Ohayon, B. Crozatier*

Physiological Response Induced by the Environment Model (PRIEM) 23
*P. Campbell, R. Cheng, B. Fraser*

Modelling Cellular Aging-Variable Cell Cycle Length Models: The Concept of Cellular Chronons 35
*M. Witten*

A Computer Prediction of Splice Sites in Human Genome 47
*B.V.B. Reddy, M. Deshpande, M.W. Pandit*

Boundary Macroelements and Finite Elements in Biological Morphometrics: A Preliminary Computational Comparison 61
*M.E. McAlarney, G. Dasgupta, M.L. Moss, L. Moss-Salentijn*

## SECTION 2: COMPUTATIONAL FLUID DYNAMICS

Structural Complexity Effects in a Two-Dimensional Model of Myocardium 75
*L.J. Leon, D. Gagnon, F.A. Roberge*

Lung Sound Recording, Analysis and Real-Time Presentation Using a Micro-Computer 87
*M. Nissan, N. Gavriely*

New Method of Analysis of Epigastric Impedance Measurement for Assessment of Gastric Emptying and Motility 97
*K. Chitsakul, M. Bouchoucha, J.W. Lee, P.-H. Cugnenc*

Comparison of Different Methods to Measure Velocity of Peristaltic Contractions 109
*J.W. Lee, M. Bouchoucha, K. Chitsakul, P.-H. Cugnenc*

The Proximal Nephron in Three Dimensions: A Transport Simulation Approach 121
*C.W. Li, C.J. Lumsden*

Computer Simulation of Single Needle Dialysis Systems 133
*D. De Wachter, P. Verdonck, R. Verhoeven, R. Hombrouckx, V. Vercruysse*

Simulation of Blood Flow in the Left Ventricle: The Effect of Papillary Muscle Geometry on Mitral Valve Function 145
*C.C. Vesier, R.A. Levine, A.P. Yoganathan*

A Hydraulic Review of the Calculation of the Mitral Valve Area 157
*P. Verdonck, P. Segers, C. Fronteau, R. Verhoeven, J. Vandenbogaerde, E. Germonprez*

A Finite Element Model of White Blood Cells 169
*C. Dong, R. Skalak*

Modelling, Simulation and Identification of Aortic Coarctation 181
*M. Karlsson, P. Krus, J. Engvall*

Dynamic Instability and Chaos in Spherical Cells in a Fluid Medium in Ultrasonic Fields 193
*N. Akkas, T. Tokdemir, E. Karaesmen*

**SECTION 3: ORTHOPAEDICS/BONE MECHANICS**

A Boundary Element Method Model for Bone Ingrowth at the Bone-Implant Interface 207
*A.M. Sadegh, G.M. Luo, S.C. Cowin*

A Boundary Element Method Investigation of Different Frictional Boundary Conditions on Bone Ingrowth 219
*G.M. Luo, S.C. Cowin, A.M. Sadegh*

Finite Element Analysis and Mechanical Verification of an Orthotropic Femoral Implant Model 231
*C.G. Lewis, D.J. Leone, M.D. Nowak*

CAO: Computersimulation of Adaptive Growth in Bones and Trees 243
*C. Mattheck, H. Huber-Betzer*

Calculations of the Natural Frequencies for a Human Femur 253
*R.T. Hart, D.A. Dulitz*

An Appropriate Instrument for General Screening of Knee Injuries 259
*D.A. Barr, G. Mulvenna, M. Timoney, P. Maginn, W.G. Kernohan, R.A.B. Mollan*

Computer-aided Surgical Simulation System for Hip Joint Plastic Surgery 271
*T. Yasuda, X. Zhou, S. Yokoi, J-i. Toriwaki, R -i. Izumida*

Three-Dimensional Behaviour Analysis of a Moving Object by Successive Shape Modelling 283
*J. Doi, T. Miyake*

Computersimulation of the Remodeling of Trabecular Bone 291
*A. Baumgartner, C. Mattheck*

A Viscoelastic Model for the Mastication Process 297
*N.A.S. Mohamed, M.A.S. Mohamed*

**SECTION 4: ELECTRICAL AND MAGNETICAL SIMULATION**

Boundary Element Modelling of Electrode Sensitivity Maps 313
*K. Henneberg, R. Plonsey*

Simulation of Reentry Processes in a Heart Muscle Using a Massively Parallel Computer 325
*B.Ja. Kogan, W.J. Karplus, H.S. Karagueuzian, S.S. Khan*

A Study of Propagation of Impulses in a Bundle of Cardiac Fibers Using a Boundary Element Model 337
*H. Hogues, L.J. Leon*

Simulating the Behaviour of Small Unmyelinated Nerve Fibres 349
*D.R.L. Scriven, A. Blumsohn*

**SECTION 5: IMAGE PROCESSING**

A Statistically Reliable and Computationally Efficient Quantitative Medical Imaging Algorithm for the Measurement of Local Cerebral Blood Flow with Positron Emission Tomography 365
*D. Feng, Z. Wang*

CENTRO DE MEDIOS
BIBLIOTECA

## SECTION 6: ROLE OF COMPUTERS IN BIOMEDICINE AND THE LIFE SCIENCES

High Performance Computational Medicine 375
*M. Witten*

Some Experiences of Developing and Using Computer Simulations of Animal Experiments in Teaching Undergraduates 387
*D. Dewhurst*

Some Applications of the Boundary Element Method in Biomedicine 401
*C.A. Brebbia, J.M.W. Baynham*

## SECTION 7: DATA ACQUISITION AND ANALYSIS

Computerized Analysis of Data from the Alkaline Elution Technique for Measuring DNA Damage 415
*K.D. Held, R.D. Ciskowski*

An Assessment of the Factors in the Redesign of a Cardiovascular Operating Room's Patient Physiological Monitoring System 425
*E.M. Backensto*
