PREFACE

Part I	GENERAL CONSIDERATIONS	
	Chapter 1 Biocompatibility: Definitions and Issues	3
	Chapter 2 Introduction to the Biological Environment	7
Part II	MATERIAL RESPONSE:	
	FUNCTION AND DEGRADATION OF MATERIALS IN VIVO	
	Chapter 3 Swelling and Leaching	17
	Chapter 4 Corrosion and Dissolution	27
	Chapter 5 Reactions of Biological Molecules with Biomaterial Surfaces	45
	Chapter 6 Mechanics of Materials: Deformation and Failure	53
	Chapter 7 Friction and Wear	70
Part III	HOST RESPONSE:	
	BIOLOGICAL EFFECTS OF IMPLANTS	
	Chapter 8 The Inflammatory Process	87
	Chapter 9 Coagulation and Hemolysis	102
	Chapter 10 Adaptation	116
	Chapter 11 Chemical and Foreign-Body Carcinogenesis	128
	Chapter 12 Allergic Foreign-Body Response	148
	Chapter 13 Mineral Metabolism	158
	Chapter 14 Systemic Distribution and Excretion	169
	Chapter 15 Effects of Degradation Products on Remote Organ Function	187

Part IV	METHODS OF TEST FOR BIOLOGICAL PERFORMANCE	
Chapter 16	In Vitro Test Methods	195
Chapter 17	In Vivo Implant Models	206
Chapter 18	Qualification of Implant Materials	222
Chapter 19	Standardization and Regulation of Implant Materials	233
		245
INDEX
