- vii *Conference Committee*
ix *Introduction*

SESSION 1 INNOVATIVE TECHNOLOGY IN SURGICAL, MEDICAL, AND DIAGNOSTIC LASER APPLICATIONS

- 2 **Technical trends in medical lasers [1650-01]**
D. M. Harris, Laser Concepts International, Inc.
- 4 **Measurement of isotopic ratio by tunable diode laser spectroscopy [1650-03]**
B. A. Hare, J. A. Rallis, Laser Photonics, Inc.
- 12 **Phototherapies: photosensitized inactivation of viral and protozoan infectious agents and potential application in blood banking [1650-04]**
M. M. Judy, J. L. Matthews, F. M. Sogandares-Bernal, J. T. Newman, Baylor Univ. Medical Ctr.; T. C. Chanh, Southwest Foundation for Biomedical Research; A. J. Marengo-Rowe, Baylor Univ. Medical Ctr.

SESSION 2 IMAGE-GUIDED MEDICAL LASER SYSTEMS

- 20 **Near "real" time magnetic resonance images as a monitoring system for interstitial laser therapy: experimental protocols [1650-05]**
D. J. Castro, K. Farahani, UCLA School of Medicine; J. Soudant, Hospital de la Pitie (France); A. A. Zwarun, R. B. Lufkin, UCLA School of Medicine.
- 33 **Relationship of magnetic moment of metallic alloys to image artifact during magnetic resonance imaging [1650-06]**
A. A. Zwarun, E-Z-EM, Inc.; A. J. Bourdillon, T. M. Button, SUNY/Stony Brook; M. Chaparali, SUNY/Buffalo; D. J. Castro, UCLA School of Medicine.
- 39 **Intelligent surgical laser system configuration and software implementation [1650-07]**
C. T. Hsueh, J. F. Bille, Intelligent Surgical Lasers, Inc.
- 48 **Comparison of bare fiber and contact diffuser tip inductions of interstitial laser lesions: assessment of reproducibility using magnetic resonance imaging [1650-28]**
K. Farahani, D. J. Castro, R. B. Lufkin, UCLA School of Medicine.

SESSION 3 MEDICAL LASER SYSTEMS

- 54 **High-average-power CTH:YAG for the medical environment [1650-09]**
S. P. Wright, E. J. Adamkiewicz, P. F. Moulton, Schwartz Electro-Optics, Inc.
- 59 **cw holmium for medical applications: a preliminary study [1650-10]**
R. A. Kirschner, D. DeBias, C. Greene, E. Brown, C. Dimitriu, A. C. Keszeli, A. Kirschner, Philadelphia College of Osteopathic Medicine.

(continued)

- 61 **Laser zona dissection using short-pulse ultraviolet lasers [1650-11]**
 J. Neev, Beckman Laser Institute and Medical Ctr.; Y. Tadir, M.D., Beckman Laser Institute and Medical Ctr. and Univ. of California/Irvine Medical Ctr.; P. D. Ho, W. E. Whalen, Beckman Laser Institute and Medical Clinic; R. H. Asch, T. Ord, Univ. of California/Irvine Medical Ctr.; M. W. Berns, Beckman Laser Institute and Medical Clinic.
- 70 **Electronic endoscopic microscopy for medical laser applications [1650-12]**
 R. A. Kirschner, F. J. Brown, A. Kirschner, Philadelphia College of Osteopathic Medicine; A. C. Keszeli, Sigma Dynamics, Inc.
- 73 **High-average-power solid state deep-UV lasers for medical applications [1650-13]**
 J. T. Lin, M. Hwang, LaserSight, Inc.; C. M. Penney, J. R. Unternahrer, M. J. Kukla, General Electric Co.
- 78 **Pulse-stretched Alexandrite laser for improved optical fiber reliability for laser lithotripsy [1650-14]**
 D. Simons, E. C. Koschmann, Laser Photonics, Inc.
- 86 **New concept for a modular multiwavelength solid state laser for medical applications [1650-16]**
 E. Steiger, N. Maurer, DSM Steiger Medizintechnik GmbH (Germany).
- 95 **Multipurpose two-wavelength surgical laser [1650-29]**
 V. S. Bukreev, M. I. Ivanov, V. I. Konov, A. M. Prokhorov, A. D. Saveljev, S. N. Sergeev, I. A. Shcherbakov, M. I. Timoshechkin, General Physics Institute (Russia).

SESSION 4 EX-VIVO LASER TREATMENTS

- 102 **Immunophototherapy for the treatment of AIDS and AIDS-related infections [1650-17]**
 K. J. Schlager, Biotronics Technologies, Inc.
- 114 **Autologous bone marrow transplantation by photodynamic therapy [1650-18]**
 K. S. Gulliya, Baylor Univ. Medical Ctr.
- 118 **Use of 8-methoxypsoralen and long-wavelength ultraviolet radiation for decontamination of platelet concentrates [1650-19]**
 L. Corash, M.D., Univ. of California/San Francisco School of Medicine; L. Lin, G. Wieseahn, G. Cimino, Steritech, Inc.
- 129 **Photosensitized inactivation of infectious agents for sterilization of red blood cell concentrates and whole blood [1650-20]**
 M. M. Judy, J. L. Matthews, F. M. Sogandares-Bernal, J. T. Newman, Baylor Univ. Medical Ctr.; T. C. Chanh, Southwest Foundation for Biomedical Research; A. J. Marengo-Rowe, Baylor Univ. Medical Ctr.

SESSION 5 MEDICAL LASER ERGONOMICS AND SAFETY

- 136 **Ergonomics of medical lasers: operator's viewpoint [1650-21]**
 D. W. Rogers, H. M. Jobes, J. R. Hinshaw, R. J. Lanzafame, M.D., Rochester General Hospital.
- 147 **Integrated systems: a physician's perspective [1650-23]**
 D. E. Ott, M.D., Mercer Univ.

- 150 **Role of a biomedical laser specialist [1650-24]**
W. G. Janssen, Abbott Northwestern Hospital.
- 156 **State laser regulations: Arizona's approach and experience [1650-27]**
K. L. Barat, Arizona Radiation Regulatory Agency.
- 158 *Addendum*
- 159 *Author Index*
