- vii Conference Committee
- ix Introduction

SESSION 1 THREE-DIMENSIONAL IMAGE PRESENTATION

- 2 **Integrated presentation of 3-D data derived from multisensor imagery and anatomical atlases using a parallel processing system [1653-01]**
P. E. Undrill, G. G. Cameron, Univ. of Aberdeen (UK); M. J. Cookson, C. Davies, London Hospital Medical College (UK); N. L. Robinson, CNS Software Ltd. (UK); A. Hill, T. F. Cootes, C. J. Taylor, A. Thornham, Univ. of Manchester (UK); J. Wysocki, H. M. Liddell, Univ. of London (UK); D. Parkinson, Active Memory Technology Ltd. (UK).
- 17 **Generating a linear octree from voxel data for a connected object [1653-02]**
R. Shu, M. S. Kankanhalli, National Univ. of Singapore (Singapore).
- 26 **Methodology for three-dimensional reconstruction of intravascular ultrasound images [1653-03]**
E. Maurincomme, I. E. Magnin, Lab. Traitement du Signal et Ultrasons/INSA (France); G. Finet, Hopital Cardio-Vasculaire et Pneumologique (France); R. Goutte, Lab. Traitement du Signal et Ultrasons/INSA (France).
- 35 **Shell rendering: fast volume rendering and analysis of fuzzy surfaces [1653-04]**
J. K. Udupa, D. Odhner, Univ. of Pennsylvania.

SESSION 2 IMAGE CAPTURE

- 46 **Performance characteristics of asymmetric zero-crossover screen-film systems [1653-05]**
P. C. Bunch, Eastman Kodak Co./Health Sciences Div.
- 66 **Radiographic equalization using computer-controlled filter wheels [1653-06]**
J. M. Boone, Thomas Jefferson Univ.
- 76 **CCD array for measuring spread functions [1653-07]**
J. A. Seibert, Univ. of California/Davis; J. M. Boone, Thomas Jefferson Univ.; S. M. Burns, Univ. of California/Davis.
- 86 **Three-dimensional distortion model for magnetic resonance images [1653-08]**
L. A. DeSoto, D. R. Haynor, M.D., Y. Kim, Univ. of Washington.
- 94 **Preprocessing functions for computed radiography images in a PACS environment [1653-09]**
M. F. McNitt-Gray, E. Pietka, H. K. Huang, UCLA School of Medicine.

SESSION 3 QUALITY ASSURANCE

- 104 **Radiology quality assurance: a clinical perspective [1653-10]**
R. L. Arenson, M.D., Univ. of California/San Francisco.

(continued)

- 107 **Automated quality assurance of a CT scanner video frame grabber [1653-11]**
A. H. Rowberg, M.D., J. Lian, Univ. of Washington.
- 111 **Image quality issues with viewing and printing in a network environment [1653-12]**
M. A. Durkin, H. J. Oosterwijk, J. E. Przybylowicz, Eastman Kodak Co./Health Sciences Div.
- 117 **PACS software testing [1653-13]**
S. Kishore, S. S. Khalsa, E. Feingold, S. B. Seshadri, Univ. of Pennsylvania Medical Ctr.; R. L. Arenson, M.D., Univ. of California/San Francisco.
- 126 **Optimizing the display function of display devices [1653-14]**
T. Ji, H. Roehrig, Univ. of Arizona; H. R. Blume, Philips Medical Systems North America; J. Guillen, Univ. of Arizona.

SESSION 4 CLINICAL IMAGE PRESENTATION

- 142 **Test of radiologist performance in interpreting bedside chest examinations on a workstation [1653-15]**
M. T. Freedman, M.D., S. B. Lo, M. C. Nelson, M.D., K. Reagan, M.D., S. C. Horii, M.D., S. K. Mun, Georgetown Univ. Hospital.
- 159 **Simultaneous and sequential display of ICU AP-chest images [1653-16]**
D. Gur, W. F. Good, J. L. King, Univ. of Pittsburgh.
- 164 **Comparison of clinical findings between intensity-windowed versus CLAHE presentations of chest CT images [1653-17]**
B. M. Hemminger, R. E. Johnston, K. Muller, D. Taylor, M. Mauro, M. Schiebler, E. Pisano, Univ. of North Carolina/Chapel Hill.
- 177 **Medical facial surface scanner [1653-19]**
M. W. Vannier, M.D., G. Bhatia, P. K. Commean, T. Pilgram, B. Brunsten, Mallinckrodt Institute of Radiology/Washington Univ.
- 185 **3DVIEWNIX: a data-, machine-, and application-independent software system for multidimensional data visualization and analysis [1653-20]**
J. K. Udupa, H. M. Hung, D. Odhner, R. C. Goncalves, Univ. of Pennsylvania.

SESSION 5 IMAGE COMPRESSION I

- 194 **Hybrid coding for split gray values in radiological image compression [1653-53]**
S. B. Lo, B. H. Krasner, S. K. Mun, S. C. Horii, M.D., Georgetown Univ. Hospital.
- 203 **Subband directional vector quantization in radiological image compression [1653-22]**
N. M. Akrouf, C. Diab, R. Prost, R. Goutte, M. Amiel, Lab. Traitement du Signal et Ultrasons/INSA (France).
- 213 **Combined vector quantization and adaptive histogram equalization [1653-23]**
P. C. Cosman, Stanford Univ.; E. A. Riskin, Univ. of Washington; R. M. Gray, Stanford Univ.
- 219 **Image coding for archiving mammograms [1653-24]**
A. Baskurt, I. E. Magnin, Lab. Traitement du Signal et Ultrasons/INSA (France); A. Bremond, Hospital Edouard-Herriot (France).

SESSION 6 IMAGE COMPRESSION II

- 232 **Effect of data compression on diagnostic accuracy in digital hand and chest radiography [1653-52]**
J. W. Sayre, D. R. Aberle, M. I. Boechat, T. R. Hall, H. K. Huang, B. K. Ho, P. Kashfian, G. Rahbar, UCLA School of Medicine.
- 241 **Subjective evaluation of compressed image quality [1653-25]**
H. S. Lee, A. H. Rowberg, M.D., M. S. Frank, H. Choi, Y. Kim, Univ. of Washington.
- 252 **Effect of block size on image quality for compressed chest radiographs [1653-26]**
J. Chen, M. J. Flynn, Henry Ford Hospital.
- 261 **Toward multidimensional medical image coding [1653-27]**
V. Chamero, R. Di Paola, INSERM U-66 (France).

SESSION 7 WORKSTATION USER INTERFACE

- 274 **Time and motion studies of medical imaging workstations [1653-28]**
M. W. Vannier, M.D., R. Walkup, T. Pilgram, C. F. Hildebolt, Mallinckrodt Institute of Radiology/Washington Univ.; W. Rüger, Siemens Medical Engineering (FRG).
- 281 **Adaptive image workstation based on explicit models of diagnostic information requirements [1653-29]**
T. Wendler, R. Grewer, K. J. Mönnich, J. Schmidt, H. Svensson, Philips GmbH (FRG).
- 293 **Use of invisible windows for PACS workstation menus [1653-30]**
A. H. Rowberg, M.D., J. Ramey, S. Heyano, Univ. of Washington.
- 297 **Intelligent interface to model the radiologist's requirements for primary image interpretation [1653-31]**
K. Maloney, T. W. Ovitt, M.D., M. V. Parra, Univ. of Arizona.

SESSION 8 WORKSTATIONS

- 310 **Remote consultation with a multiple-screen FilmPlane radiology workstation [1653-32]**
D. V. Beard, B. M. Hemminger, P. Brown, R. Perry, R. Thompson, Univ. of North Carolina/Chapel Hill.
- 316 **High-resolution diagnostic workstation development: initial clinical experience [1653-33]**
M. M. Frost, J. C. Honeyman, D. Siker, E. V. Staab, M.D., Univ. of Florida.
- 323 **Streamlined design of a radiology workstation for clinical applications [1653-34]**
A. Gamboa-Aldeco, L. L. Fellingham, Cemax, Inc.; C. G. Ullrich, M.D., Carolinas Medical Ctr.
- 337 **Development of a prototypical PACS workstation based on the IBM RS6000 and the X window system [1653-35]**
D. K. Yee, D. R. Haynor, M.D., H. Choi, S. W. Milton, Y. Kim, Univ. of Washington.
- 349 **Integrated diagnostic support system [1653-36]**
Y. Imamura, Y. Imai, IBM Japan Ltd. (Japan).

(continued)

POSTER SESSION

- 360 **Effect of vector quantization on ultrasound tissue characterization [1653-28]**
B. H. Krasner, S. B. Lo, B. S. Garra, M.D., S. K. Mun, Georgetown Univ. Hospital.
- 374 **Comparison of detectability in pulsed versus continuous fluoroscopy: a simulation study [1653-38]**
R. Aufrichtig, C. W. Thomas, G. W. Gilmore, D. L. Wilson, Case Western Reserve Univ.
- 379 **Applying a visual language for image processing as a graphical teaching tool in medical imaging [1653-39]**
J. J. Birchman, S. L. Tanimoto, A. H. Rowberg, M.D., H. Choi, Y. Kim, Univ. of Washington.
- 391 **Parallel disk arrays provide an architecture for high-performance acquisition and archival storage for medical imaging [1653-40]**
R. J. Clouthier, Storage Concepts, Inc.
- 399 **Video comparator system for early detection of cutaneous malignant melanoma [1653-41]**
E. R. Craine, B. L. Craine, M.D., Western Research Co., Inc.
- 410 **Design of user interface in medical imaging: lessons of 3-D application definition [1653-42]**
P. Jannin, G. Mével, CERIU/Lab. SIM (France); Y. Gandon, INSERM/Lab. SIM (France); E. Cordonnier, CERIU/Lab. SIM (France).
- 422 **UWGSP4: an imaging and graphics superworkstation and its medical applications [1653-43]**
J. Jong, H. W. Park, K. S. Eo, M. H. Kim, P. Zhang, Y. Kim, Univ. of Washington.
- 434 **Applications of 2-D and 3-D compression algorithms to ultrasound images [1653-44]**
J. I. Koo, H. S. Lee, Y. Kim, Univ. of Washington.
- 443 **Appearance of bony lesions on 3-D CT reconstructions: a case study in variable renderings [1653-45]**
N. J. Mankovich, UCLA Medical Ctr./Olive View; S. C. White, UCLA School of Dentistry.
- 451 **Automatic removal of unexposed background in digital radiographs [1653-47]**
M. F. McNitt-Gray, S. L. Eldredge, J. Tagawa, H. K. Huang, UCLA School of Medicine.
- 458 **Cost-effective programmable display controller for medical imaging [1653-48]**
D. A. Ortendahl, Univ. of California/San Francisco; M. Minaise, Toshiba America Medical Imaging; M. A. Thompson, Univ. of California/San Francisco; A. Li, Toshiba America Medical Imaging; V. Gold, Peritek Corp.
- 466 **Ongoing evaluation of PACS in a clinical setting [1653-49]**
M. Trefler, E. Russell, M.D., Univ. of Miami School of Medicine.
- 470 **Realistic display of volumes [1653-50]**
R. Yagel, Ohio State Univ.
- 477 **Imaging characteristics of CRT multiformat printers [1653-51]**
K. Yip, Eastman Kodak Co./Health Sciences Div.
- 495 **Wavelet-based tool for medical image compression [1653-54]**
A. Manduca, Mayo Clinic and Foundation.
- 504 *Addendum*
- 505 *Author Index*
