

Contents

1 Gas Physics, 1

- States of matter, 1
- Changes of state, 1
- Sublimation, 3
- Evaporation, 3
- Gas vs vapor, 5
- Kinetic theory, 5
- Gas pressure measurement, 5
- Pressure equivalents, 6
- Characteristics of gases, 8
- Gas laws, 9
 - Boyle's law, 9
 - Charles' law, 10
 - Gay-Lussac's law, 11
 - Universal gas law, 11
 - Dalton's law, 12
- Diffusion, 13
 - Fick's law, 13
 - Graham's law, 13
 - Henry's law, 13
- Gas flow, 14
 - Bernoulli's principle, 15
 - Torricelli's law, 15
 - Venturi's principle, 17
 - Pitot principle, 17
- Avogadro's law, 18
- Poiseuille's law, 19
- Reynolds' number, 20

2 Primary Systems: Cylinders and Piping Systems, 21

- Cylinders, 21
 - Cylinder marks and codes, 21
 - DOT subdivisions, 23
 - Cylinder specifications, 23
 - Cylinder valves, 26
 - Safety systems, 26
 - Recommendations and regulations, 28
 - Procedure for set-up of an oxygen cylinder, 31
 - Estimating the duration of a cylinder supply, 31
- Liquified gas systems, 31
 - Bulk systems, 32
 - Recommendations and regulations, 33
 - Portable liquid systems, 35
 - Recommendations and regulations, 36
 - Calculating the duration of supply, 37
- Supply systems, 37

- Continuous system, 37
- Alternating system, 37
- Recommendations and regulations, 39
- Medical air supply, 39
- Piping systems, 40
 - Structural recommendations and regulations, 40
 - Zoning recommendations and regulations, 40
 - Testing recommendations and regulations, 41
- Station outlets, 42
 - DISS recommendations and regulations, 42
- DISS design, 42
 - Quick-connect recommendations and regulations, 44
 - Quick-connect design, 44
- Compressors, 44
 - Piston compressors, 44
 - Diaphragm compressors, 46
 - Rotary compressors, 46
- Oxygen concentrators, 47
 - Membrane concentrators, 47
 - Molecular sieve, 47

3 Gas Regulation, Administration, and Controlling Devices, 50

- Reducing valves, 50
- Flowmeters, 53
 - Thorpe-tube flowmeters, 54
 - Kinetic flowmeters, 55
 - Examples of flowmeters, 55
- Flow restrictors, 57
 - Fixed restrictor, 57
 - Adjustable restrictor, 58
- Regulators, 58
 - Bourdon regulator, 58
 - Thorpe tube/reducing valve flowmeter, 59
 - Flow restrictor/regulators, 60
- Administration devices, 60
 - Simple mask, 60
 - Partial-rebreathing mask, 62
 - Nonrebreathing mask, 62
 - Rebreathing mask, 64
 - Air-entrainment mask, 64
 - Nasal catheter, 64
 - Nasal cannula, 64
 - Other devices, 65
- Tents, 65
 - Child adult mist tent, 66
 - Open-top tents, 67

- Incubators, 67
- Hoods, 68
- Oxygen-controlling devices, 68
 - Oxygen adders, 68
 - Entrainment devices, 69
 - Precision metering devices, 72
 - Oxygen controllers (blenders), 75
- Summary, 77

4 Humidifiers and Nebulizers, 79

- Humidity, 79
 - Measuring humidity, 79
- Humidity therapy, 81
- Humidifiers, 82
 - Simple humidifiers, 82
 - Heated humidifiers, 84
 - Heated wire circuits, 88
 - Condensing humidifiers, 88
 - Room humidifiers, 89
 - Summary, 89
- Aerosol, 89
 - Methods of measuring aerosols, 89
 - Factors affecting particle deposition, 91
 - Using aerosols therapeutically, 92
- Nebulizers, 93
 - Pneumatic nebulizers, 93
 - Centrifugal nebulizers, 101
 - Ultrasonic nebulizers, 101
 - Aerosol for humidification with controlled oxygen, 104
- Summary, 106

5 Artificial Airways, 108

- Pharyngeal airways, 108
 - Nasopharyngeal airways, 108
 - Oropharyngeal airways, 108
- Esophageal airways, 110
 - Esophageal obturator airway, 110
 - Esophageal gastric tube airway, 110
- Endotracheal and tracheostomy tubes, 110
 - Tube cuffs, 112
 - Types of cuffs, 112
 - Special tubes, 115

6 Manual Resuscitators, 120

- Standards, 120
- Spring-loaded valves, 121
 - Early AMBU (Air-Mask-Bag-Unit) model, 121
 - Ohio Hope, 124
 - Penlon infant resuscitator, 125
 - The Air Viva, 125
 - Ohio Hope II, 125
 - Vital Signs Stat Blue resuscitator, 127
- Duckbill/diaphragm valves, 127
 - Laerdal resuscitators, 127
 - Life Saver II, 128
 - Inspiron and Life Design Systems disposable units, 130

- Diaphragm/leaf valves, 130
 - Puritan manual resuscitator (PMR), 130
 - AIRbird, 133
 - Hudson Lifesaver and Robertshaw Bag resuscitators, 133
- New AMBU models, 134
- Summary of self-inflating bags, 136
- Gas-powered resuscitators, 137

7 Bedside Measuring and Monitoring Devices, 139

- Oxygen analyzers, 139
 - Physical analyzers, 139
 - Electrical analyzers, 140
 - Chemical analyzers, 141
 - Electrochemical analyzers, 142
 - Mass spectrometry, 143
- Blood gas electrodes, 143
 - pH electrode, 143
 - Pco₂ electrode, 143
 - Po₂ electrode, 144
- Transcutaneous electrodes, 144
 - Transcutaneous oxygen electrodes, 144
 - Transcutaneous carbon dioxide electrodes, 144
- Oximeters, 145
- Capnographs, 145
- Bedside measuring devices, 146
 - Volume-collecting devices, 146
 - Flow-sensing devices, 150

8 Introduction to Ventilators, 156

- Classification of ventilators, 156
 - Types of pressure gradients, 156
 - Starting inspiration, 157
 - Ending inspiration, 158
 - Drive mechanisms, 158
 - Controlling rate and I:E ratio, 163
- Negative-pressure ventilators, 166
 - Iron lung, 166
 - Cuirass, 168
- Manually limited and fluidic positive pressure devices (SIMV), 169
 - Manually limited devices, 169
 - Fluidic devices, 169
- Ventilatory modes, 172
 - Control, 172
 - Assist, assist/control, 173
 - Intermittent mandatory ventilation (IMV), 173
 - Synchronized intermittent mandatory ventilation (SIMV), 174
 - Mandatory minute volume (MMV), 175
 - Pressure support, 175
 - Pressure control, 176
 - Airway pressure release ventilation (APRV), 176
 - High-frequency ventilation (HFV), 176
 - Inverse I:E ventilation, 179
- Ventilatory modifications, 179
 - Inspiratory hold (plateau), 179
 - Negative end-expiratory pressure (NEEP), 179

- Expiratory retard, 179
- Positive end-expiratory pressure (PEEP), 179
- Continuous-flow ventilation (CFV), 184
- Continuous positive airway pressure (CPAP), 184
- CPAP units, 185
 - Bourns infant CPAP unit, 185
 - Bird neonatal CPAP generator, 187
 - CPAP units for sleep apnea, 188

9 Bird Respirators, 190

- Bird Mark 7, 190
 - Cycling mechanism, 190
 - Inspiratory phase, 191
 - Expiratory time control, 192
 - Summary of controls, 194
- Bird Mark 8, 197
- Bird Mark 9, 202
- Bird Mark 10, 202
- Bird Mark 14, 202
- Bird Mark 6, 202
- Bird Mark 1, 205
- Minibird II, 206
- Therapybird, 207
- Bird Mark 2, 210
- IMVbird, 211
- Second generation bird respirators, 213
 - Mark 7A, 214
 - Mark 8A, 216
 - Bird ventilator with demand CPAP, 217
- Summary, 217

10 Bennett Respirators, 219

- Therapy models, 219
 - Diluter regulator, 219
 - Bennett valve, 219
 - Basic function, 220
 - Air dilution—100% system, 222
 - Model comparison and flow characteristics, 222
- PR-2, 225
 - Pressure switch, 225
 - Accumulators system, 230
 - Peak flow system, 233
- PR-1, 233
 - AP series, 236
 - Bennett circuits, 239
 - Summary, 241

11 Piston Ventilators, 243

- Mörch ventilator, 243
 - Drive mechanism and flow characteristics, 245
 - Volume control, 245
 - Rate mechanism, 245
 - I:E ratio, 245
 - Oxygen system, 245
 - Humidification system, 245
- Emerson 3-PV ventilator, 245

- Drive mechanism and flow characteristics, 246
- Volume control, 246
- Rate and I:E ratio mechanisms, 246
- Auto mechanism, 247
- Oxygen system, 247
- Sigh system, 247
- Humidification system, 248

Emerson IMV ventilator, 248

- Rate system, 249
 - Other systems, 251
- ### Engström 150 and 200 series, 251
- Drive mechanism and flow characteristics, 253
 - Volume control and oxygen system, 253
 - Rate mechanism, 254
 - I:E ratio, 254
 - Assist mechanism, 254
 - Other systems, 254

Engström 300 series, 254

- Volume control and oxygen system, 256
- Rate mechanism, 256
- I:E ratio, 256
- Expiratory resistance and PEEP control, 256
- Other systems, 256
- IMV and CPAP systems, 259

Gill 1 respirator, 260

- Drive mechanism and flow characteristics, 261
- Volume control, 262
- Rate mechanism, 262
- I:E ratio, 262
- Assist and sensitivity mechanism, 262
- Oxygen system, 264
- Sigh-system, 264
- Pressure limit system, 264
- Inflation hold control, 264
- PEEP and NEEP systems, 264
- Nebulizer system, 264
- Other systems, 264

Searle Volume Ventilator Adult (VVA), 265

- Drive mechanism and flow characteristics, 265
- Volume control and oxygen system, 268
- Rate mechanism, 268
- I:E ratio, 268
- Assist and sensitivity mechanisms, 268
- Pressure limit system, 268
- Inflation hold control, 269
- Sigh system, 269
- PEEP system, 269
- Nebulizer system, 269
- Humidity system, 269
- Intermittent demand ventilation (IDV) system, 270
- Expiratory spirometer system, 270

12 Bellows Ventilators, 275

- Air Shields ICV-10 Ventilator, 276
 - Drive mechanism and flow and volume characteristics, 276
 - Rate and I:E ratio, 277
 - Assist and sensitivity mechanism, 277
 - Oxygen system, 277

- Humidity system, 277
 - Bennett MA-1 Ventilator, 278
 - Drive mechanism and flow characteristics, 281
 - Volume control, 281
 - Rate mechanism, 282
 - I:E ratio, 282
 - Assist and sensitivity mechanism, 283
 - Oxygen system, 283
 - Pressure limit system, 284
 - Sigh system, 284
 - Nebulizer system, 284
 - PEEP, CPAP, and NEEP systems, 284
 - Expiratory resistance system, 286
 - Humidity and monitoring systems, 286
 - Bennett MA-2 Ventilator, 286
 - Drive mechanism and flow characteristics, 288
 - Volume control, 289
 - Rate mechanism, 289
 - Assist and sensitivity mechanisms, 289
 - Other systems, 290
 - PEEP system, 290
 - Plateau control, 291
 - IMV mode, 291
 - Humidity system, 292
 - Monitoring and indicator systems, 292
 - Bennet MA-2 + 2 Ventilator, 293
 - Ohio 560 Ventilator, 294
 - Drive mechanism and flow characteristics, 294
 - Volume control, 296
 - Rate mechanism and I:E ratio, 297
 - Assist and sensitivity mechanism, 298
 - Oxygen system, 300
 - Sigh system, 300
 - PEEP system, 300
 - Inflation hold system, 300
 - NEEP system, 300
 - Pressure-relief system, 301
 - Humidification system, 303
 - Other systems, 303
 - Ohio Critical Care Ventilator-2 with SIMV (CCV-2, SIMV), 306
 - Drive mechanism and flow characteristics, 306
 - Volume control, 306
 - Rate and I:E ratio mechanisms, 306
 - Assist and sensitivity mechanisms, 307
 - Pressure limit system, 307
 - Oxygen system, 307

 - Monitoring and alarm systems, 439
- LifeCare PLV-100, 439
 - Drive mechanism and flow characteristics, 439
 - Volume control, 439
 - Rate mechanism and I:E ratio, 439
 - Oxygen system, 439
 - SIMV/IMV system, 439
 - PEEP/CPAP system, 441
- Monitoring and alarm systems, 441
- LifeCare PLV-102, 441
 - Drive mechanism and flow characteristics, 441
 - Volume control, 441
 - Rate mechanism and I:E ratio, 441
 - Oxygen system, 441
 - Sigh system, 441
 - SIMV/IMV system, 443
 - PEEP/CPAP system, 443
 - Monitoring and alarm systems, 443
- Puritan-Bennett M25A and M25B (formerly Thompson), 443
 - Drive mechanism and flow characteristics, 443
 - Volume control, 446
 - Rate mechanism and I:E ratio, 446
 - Oxygen system, 446
 - IMV system, 446
 - PEEP/CPAP system, 446
 - Monitoring and alarm systems, 446
- Puritan-Bennett Companion 2800, 446
 - Drive mechanism and flow characteristics, 446
 - Volume control, 446
 - Rate mechanism and I:E ratio, 447
 - Oxygen system, 447
 - Sigh system, 447
 - SIMV/IMV system, 447
 - PEEP/CPAP system, 447
 - Monitoring and alarm systems, 447
- BEAR 33, 448
 - Drive mechanism and flow characteristics, 448
 - Volume control, 449
 - Rate mechanism and I:E ratio, 449
 - Oxygen system, 450
 - Sigh system, 450
 - SIMV/IMV system, 451
 - PEEP/CPAP system, 451
 - Monitoring and alarm systems, 451
