

CONTENTS

Chapter I	FUNDAMENTAL EQUATIONS	1
1.1	Maxwell's Equations and Constitutive Relations	1
1.2	Wave Equations and Wave Solutions	9
1.3	Polarization	14
1.4	Conservation Theorems	22
1.5	Boundary Conditions	25
	Problems	29
Chapter II	PROPAGATION IN HOMOGENEOUS MEDIA	45
2.1	Time-Harmonic Fields	46
2.2	Plane Wave Solutions	53
2.3	Plane Waves in Homogeneous Media and the kDB System	62
2.4	Plane Waves in Uniaxial Media	69
2.5	Plane Waves in Gyrotropic Media	75
2.6	Plane Waves in Bianisotropic Media	81
2.7	Plane Waves in Nonlinear Media	84
	Problems	91
Chapter III	REFLECTION, TRANSMISSION, GUIDANCE, AND RESONANCE	109
3.1	Phase Matching	110
3.2	Reflection and Transmission at a Plane Boundary	116
3.3	Reflection and Transmission by a Layered Medium	126

3.4	Guidance by Conducting Parallel Plates	138
3.5	Guided Waves in Layered Media	156
3.6	Cylindrical Waveguides	170
3.7	Cavity Resonators	188
	Problems	200
Chapter IV	RADIATION	223
4.1	Čerenkov Radiation	224
4.2	Green's Functions	229
4.3	Hertzian Dipoles	235
4.4	Linear Dipole Arrays	243
4.5	Linear Antennas	269
4.6	Biconical Antennas	277
4.7	Contour Integration Methods	294
4.8	Integral Formulations for Dipoles in Layered Media	312
4.9	Dipole on a Two-Layer Medium	322
	Problems	331
Chapter V	THEOREMS OF WAVES AND MEDIA	363
5.1	Equivalence Principle	364
5.2	Duality and Complementarity	373
5.3	Mathematical Formulations of Huygens' Principle	382
5.4	Fresnel and Fraunhofer Diffraction	391
5.5	Reaction and Reciprocity	402
5.6	Stationary Formulas and Rayleigh-Ritz Procedure	411
5.7	Geometrical Optics Limit	421
5.8	Paraxial Limit	443
5.9	Quasi-Static Limits	450
5.10	Quantization of Electromagnetic Waves	454
	Problems	467
Chapter VI	SCATTERING	489
6.1	Scattering by Spheres	490
6.2	Scattering by Conducting Cylinders	497
6.3	Scattering by Periodic Rough Surfaces	503
6.4	Scattering by Periodic Media	515

Contents**xi**

6.5	Scattering by Random Media	525
6.6	Scattering by Random Rough Surfaces	535
6.7	Effective Permittivity for a Volume Scattering Medium	558
	Problems	571

Chapter VII	ELECTROMAGNETIC THEORY AND SPECIAL RELATIVITY	585
--------------------	--	------------

7.1	Maxwell–Minkowski Theory	586
7.2	Lorentz Transformation Formulas	593
7.3	Waves in Moving Media	610
7.4	Four-Dimensional Notations	622
7.5	Hamilton’s Principle and Noether’s Theorem	632
	Problems	639

	REFERENCES	653
