<b>Chapter 1</b>	<b>The Riemann Integral</b>	<b>1</b>
1	Definition of the Riemann Integral	1
2	Properties of the Riemann Integral	6
3	Examples	7
4	Drawbacks of the Riemann Integral	8
5	Exercises	9
<b>Chapter 2</b>	<b>Measurable Sets</b>	<b>13</b>
6	Introduction	13
7	Outer Measure	17
8	Measurable Sets	21
9	Exercises	26
<b>Chapter 3</b>	<b>Properties of Measurable Sets</b>	<b>29</b>
10	Countable Additivity	29
11	Summary	32
*12	Borel Sets and the Cantor Set	33
*13	Necessary and Sufficient Conditions for a Set to be Measurable	36
14	Lebesgue Measure for Bounded Sets	38
*15	Lebesgue Measure for Unbounded Sets	40
16	Exercises	41

<b>Chapter 4</b>	<b>Measurable Functions</b>	<b>47</b>
17	Definition of Measurable Functions	47
18	Preservation of Measurability for Functions	50
19	Simple Functions	53
20	Exercises	55
<b>Chapter 5</b>	<b>The Lebesgue Integral</b>	<b>59</b>
21	The Lebesgue Integral for Bounded Measurable Functions	59
22	Simple Functions	60
23	Integrability of Bounded Measurable Functions	62
24	Elementary Properties of the Integral for Bounded Functions	65
25	The Lebesgue Integral for Unbounded Functions	68
26	Exercises	73
<b>Chapter 6</b>	<b>Convergence and The Lebesgue Integral</b>	<b>77</b>
27	Examples	77
28	Convergence Theorems	78
*29	A Necessary and Sufficient Condition for Riemann Integrability	82
*30	Egoroff's and Lusin's Theorems and an Alternative Proof of the Lebesgue Dominated Convergence Theorem	85
31	Exercises	88
<b>Chapter 7</b>	<b>Function Spaces and <math>\mathcal{L}^2</math></b>	<b>93</b>
32	Linear Spaces	93
33	The Space $\mathcal{L}^2$	101
34	Exercises	108
<b>Chapter 8</b>	<b>The <math>\mathcal{L}^2</math> Theory of Fourier Series</b>	
35	Definition and Examples	113
36	Elementary Properties	118
37	$\mathcal{L}^2$ Convergence of Fourier Series	120
38	Exercises	127

<b>Chapter 9</b>	<b>Pointwise Convergence of Fourier Series</b>	<b>133</b>
39	An Application: Vibrating Strings	133
40	Some Bad Examples and Good Theorems	137
41	More Convergence Theorems	140
42	Exercises	144
<b>Appendix</b>		<b>147</b>
	Logic and Sets	147
	Open and Closed Sets	148
	Bounded Sets of Real Numbers	148
	Countable and Uncountable Sets (and discussion of the Axiom of Choice)	149
	Real Functions	151
	Real Sequences	153
	Sequences of Functions	153
<b>Bibliography</b>		<b>155</b>
<b>Index</b>		<b>157</b>
