Preface ix

Acknowledgments xv

1 Prelude to Differential Calculus 1

1-1 Introduction 2
1-2 Real Numbers and Functions 3
1-3 The Coordinate Plane and Straight Lines 9
1-4 Graphs of Equations and Functions 14
1-5 Tangent Lines and the Derivative 19
1-6 The Derivative and Rates of Change 27
1-7 Combinations of Functions and Inverse Functions 32
1-8 Limits and the Limit Laws 38
1-9 Continuous Functions 48
*1-10 An Appendix: Proofs of the Limit Laws 55

Review: Concepts, Definitions, Results 61

2 Differentiation 63

2-1 Introduction 64
2-2 Basic Differentiation Rules 65
2-3 Simple Maximum and Minimum Problems 74
2-4 Derivatives of Algebraic Functions 84
2-5 The Mean Value Theorem and Applications 91
2-6 Curve Sketching and the First Derivative Test 97
2-7 The Chain Rule 105
2-8 Implicit Differentiation 112
2-9 Derivatives of Sines and Cosines 117

Review: Formulas, Concepts, Definitions 127

3 Applications of Derivatives and Antiderivatives 131

3-1 Introduction 132
3-2 Increments and Differentials 132
3-3 Related Rates 137
3-4 Successive Approximations and Newton's Method 141
3-5 Higher Derivatives and Concavity 150
3-6 Curve Sketching and Asymptotes 158
3-7 Antiderivatives 165
3-8 Velocity and Acceleration 173
*3-9 Applications to Economics 183

Review: Definitions, Concepts, Results 187

4 The Integral 189

4-1 Introduction 190
4-2 Elementary Area Computations 190
4-3 Riemann Sums and the Integral 199
4-4 The Fundamental Theorem of Calculus 207
4-5 Integration by Substitution 214
4-6 Computing Areas by Integration 218
4-7 Numerical Integration 226

Review: Definitions, Concepts, Results 236

5 Applications of the Integral 239

5-1 Introduction: Setting Up Integral Formulas 240
5-2 Volumes by the Method of Cross Sections 245
5-3 Volumes by the Method of Cylindrical Shells 252
5-4 Arc Length and Surface Area of Revolution 256
5-5 Force and Work 263
*5-6 Centroids of Plane Regions and Curves 270
*5-7 Additional Applications 277
*5-8 Appendix on Approximations and Riemann Sums 283

Review: Definitions, Concepts, Results 286

6 Exponential and Logarithmic Functions 289

6-1 Introduction 290
6-2 The Natural Logarithm 294
6-3 The Exponential Function 301
6-4 General Exponential and Logarithmic Functions 307
6-5 Natural Growth and Decay 312
*6-6 Linear First Order Differential Equations and Applications 320
*6-7 Applications to Economics 328
*6-8 Separable Differential Equations and Applications 333

Review: Definitions, Concepts, Results 338

7 Trigonometric and Hyperbolic Functions 341

7-1 Introduction 342
7-2 Derivatives and Integrals of Trigonometric Functions 342
7-3 Inverse Trigonometric Functions 347
*7-4 Periodic Phenomena and Simple Harmonic Motion 354
7-5 Hyperbolic Functions 362
*7-6 Inverse Hyperbolic Functions 367

Review: Definitions and Formulas 375

8 Techniques of Integration 377

8-1 Introduction 378
8-2 Integral Tables and Simple Substitutions 378
8-3 Trigonometric Integrals 381
8-4 Integration by Parts 385
8-5 Trigonometric Substitution 390
8-6 Integrals Involving Quadratic Polynomials 394
8-7 Rational Functions and Partial Fractions 399
*8-8 Rationalizing Substitutions 406

Summary 411

9 Conic Sections and Polar Coordinates 415

9-1 Analytic Geometry and the Conic Sections 416
9-2 The Parabola 421
9-3 The Ellipse 426
9-4 The Hyperbola 431
9-5 Rotation of Axes and Second-Degree Curves 438
9-6 Polar Coordinates 443
*9-7 Conic Sections in Polar Coordinates 448
9-8 Area in Polar Coordinates 452

Review: Properties of Conic Sections 455

10 Parametric Curves and Vectors in the Plane 457

10-1 Parametric Curves 458
10-2 Integral Computations with Parametric Curves 465
10-3 Vectors in the Plane 470
10-4 Motion and Vector-Valued Functions 476
*10-5 Projectiles and Uniform Circular Motion 482
10-6 Curvature and Acceleration 486
*10-7 Orbits of Planets and Satellites 492

Review: Definitions and Concepts 498

11 Indeterminate Forms, Taylor's Formula, and Improper Integrals 501

11-1 Indeterminate Forms and L'Hôpital's Rule 502
11-2 Taylor's Formula and Polynomial Approximations 509
*11-3 Error Estimates for Numerical Integration Rules 518
11-4 Improper Integrals 524
11-5 Further Applications of Taylor's Formula 531

Review: Definitions, Concepts, Results 536

12 Infinite Series 539

12-1 Introduction 540
12-2 Infinite Sequences 540
12-3 Convergence of Infinite Series 547
12-4 The Integral Test 556
12-5 Comparison Tests for Positive-Term Series 561
12-6 Alternating Series and Absolute Convergence 566
12-7 Power Series 574
12-8 Power Series Computations 584
*12-9 The Simple Pendulum Again 589

Review: Definitions, Concepts, Results 592

13 Vectors, Curves, and Surfaces in Space 595

13-1 Rectangular Coordinates and Three-Dimensional Vectors 596
13-2 The Vector Product of Two Vectors 604
13-3 Lines and Planes in Space 611
13-4 Curves and Motion in Space 616
13-5 Cylinders and Quadric Surfaces 623
13-6 Cylindrical and Spherical Coordinates 630

Review: Definitions, Concepts, Results 634

14 Partial Differentiation 637

14-1 Introduction 638
14-2 Functions of Several Variables 639
14-3 Partial Derivatives 646
14-4 Maxima and Minima of Functions of Several Variables 653
*14-5 Least Squares and Applications to Economics 659
14-6 Increments and Differentials 666
14-7 The Chain Rule 672
14-8 Directional Derivatives and the Gradient Vector 680
14-9 Lagrange Multipliers and Constrained Maximum-Minimum Problems 687
14-10 The Second Derivative Test for Functions of Two Variables 695

Review: Definitions, Concepts, Results 700

15 Multiple Integrals 703

15-1 Double Integrals 704
15-2 Area and Volume by Double Integration 713
15-3 Double Integrals in Polar Coordinates 717
15-4 Applications of Double Integrals 723
15-5 Triple Integrals 730
15-6 Integration in Cylindrical and Spherical Coordinates 736
15-7 Surface Area 742
*15-8 Change of Variables in Multiple Integrals 748

Review: Definitions, Concepts, Results 754

UNIVERSIDAD NACIONAL DE ENTRE RIOS
FACULTAD DE INGENIERIA
CENTRO DE MEDIOS
BIBLIOTECA

16 Vector Analysis 757

16-1 Introduction 758
16-2 Line Integrals 758
16-3 Green's Theorem 767
16-4 Surface Integrals 775
16-5 The Divergence Theorem 782
16-6 Stokes' Theorem 789

Review: Definitions, Concepts, Results 796

17 Differential Equations 799

17-1 Introduction 800
17-2 Linear First Order Equations and Applications 802
17-3 Higher Order Linear Equations 809
17-4 Complex Numbers and Functions 814
17-5 Homogeneous Linear Equations with Constant Coefficients 819
*17-6 Mechanical Vibrations 824
*17-7 Periodic Temperature Oscillations 830

Review: Concepts and Methods 834

References for Further Study 835

Appendices 837

A Units of Measurement and Conversion Factors 838
B Formulas from Algebra and Geometry 839
C Formulas from Trigonometry 841
D Greek Alphabet 841
E Tables 842

Answers to Odd-Numbered Problems 847

Index 881
