№ 208

Preface	page ix
Principal Symbols	xiii
1 Purpose of the Book and Method of Use	1
2 Fundamentals; the Measurement of Temperature	5
2.1 Introduction	
2.2 The Kinetic Theory of Heat	
2.3 The Structure of Engineering Thermodynamics: Thermodynamic Systems	
2.4 Thermodynamic Properties: Temperature	
2.5 The First Law of Thermodynamics	
2.6 The Second Law of Thermodynamics	
2.7 A Model Analogy of the Kinetic Theory of Heat	
2.8 The Technique of Temperature Measurement	
2.8.1 The International Practical Temperature Scale of 1968 (IPTS-68)	
2.8.2 Types of Temperature Measuring Instrument	
2.8.3 Liquid-in-Glass Thermometers	
2.8.4 Thermocouples	
2.8.5 Exercises in Temperature Measurement	
3 Heat Transfer	34
3.1 Brief Summary of Theory: Conduction	
3.2 Convection	
3.2.1 Dimensionless Numbers associated with Free and Forced Convection	
3.2.2 The Temperature Boundary Layer	
3.2.3 Flow Perpendicular to a Cylinder	
3.2.4 Free Convection from Horizontal Tube	
3.2.5 Boiling and Condensing Heat Transfer	
3.2.6 Boiling Heat Transfer	
3.2.7 Condensing Heat Transfer	
3.3 Radiation	
3.3.1 Solar Radiation	
3.3.2 Solar Energy Collectors	
3.4 Heat exchange between Solid Bodies and Gases of Very Low Density	
3.5 Experiment 1: Thermal Boundary Layer on a Flat Plate	
3.5.1 Measurements and Calculations	
3.5.2 Discussion of Results	
3.5.3 Further Experiments and Questions	
3.6 Experiment 2: Heat Transfer by Forced Convection from a Single Tube and a Tube Bank	

3.6.1	Measurements and Calculations	
3.6.2	Discussions of Results	
3.6.3	Further Experiments and Questions	
3.7	Experiment 3: Boiling Heat Transfer	
3.7.1	Measurements and Calculations	
3.7.2	Discussion of Results	
3.7.3	Further Experiments and Questions	
3.8	Experiment 4: Combined Heat Transfer by Free Convection and Radiation	
3.8.1	Measurements and Calculations	
3.8.2	Discussion of Results	
3.8.3	Further Experiments and Questions	
4	The First Law of Thermodynamics	85
4.1	The Steady-flow Energy Equation	
4.2	Classification of Sources of Mechanical Power	
4.3	Experiment 5: Energy Conversion in a Compressed-air Motor	
4.3.1	Measurements and Calculations	
4.3.2	Discussion of Results	
4.3.3	Further Experiments and Questions	
5	The Second Law of Thermodynamics	95
5.1	Reversibility and Availability	
5.2	Entropy	
5.3	The Carnot Cycle	
5.4	Availability	
5.5	Experiment 6: The Heat Pump	
5.5.1	Measurements and Calculations	
5.5.2	Discussion of Results	
5.5.3	Further Experiments and Questions	
6	Properties of Working Fluids: Thermodynamic Cycles	117
6.1	Properties of Fluids	
6.2	Steam Power Plant: the Rankine Cycle	
6.3	Experiment 7: Performance of a Steam Power Plant	
6.3.1	Measurements and Calculations	
6.3.2	Discussion of Results	
6.3.3	Further Experiments and Questions	
6.3.4	Determination of Dryness Fraction by the Throttling Calorimeter	
6.4	The Vapour Compression Refrigeration Cycle	
6.4.1	Experiment 6: Further Analysis	
7	Gaseous Mixtures; Psychrometry	135
7.1	The Gibbs–Dalton Law of Gaseous Mixtures	
7.2	Psychrometry	
7.3	The Psychrometric Chart	
7.4	Experiment 8: Air Conditioning Apparatus	
7.4.1	Measurements and Calculations	
7.4.2	Discussion of Results	
7.4.3	Further Experiments and Questions	
8	Combustion	151
8.1	Combustion Processes	
8.2	Combustion Equations	
8.3	The Combustion Process	
8.4	The Enthalpy–Temperature Diagram for Combustion Processes	
8.5	Flue Gas Analysis	

8.6	Experiment 9: Flow and Combustion Processes in a Gas Combustion Chamber	
8.6.1	Measurements and Calculations	
8.6.2	Discussion of Results	
8.6.3	Further Experimental Possibilities	
9	Properties of Gases; Air as a Working Fluid	165
9.1	General Considerations	
9.2	Properties of Gases	
9.3	Compression and Expansion Flow Processes for Air	
9.4	The Polytropic Process	
9.5	Experiment 5: Further Analysis	
9.6	Air Compression	
9.7	Experiment 10: Performance of a High-speed Centrifugal Compressor	
9.7.1	Measurements and Calculations	
9.7.2	Discussion of Results	
9.7.3	Further Experiments	
9.8	The Gas Turbine	
9.9	The Internal Combustion Engine	
9.9.1	The Indicator Diagram	
9.9.2	Air Standard Cycles	
9.9.3	Engine Testing	
9.9.4	Experiment 11: Performance of a Small Diesel Engine	
9.9.5	Measurements and Calculations	
9.9.6	Discussion of Results	
9.10	The Performance of the Petrol Engine	
9.10.1	Experiment 12: Performance of a Variable Compression Ratio Petrol Engine	
9.10.2	Measurements and Calculations	
9.10.3	Discussion of Results	
9.10.4	Further Experiments and Questions	
10	Amplification of Some Earlier Sections	209
10.1	Quasi-static and Real Processes	
10.2	The Steady-flow Energy Equation: Modification to take into account Potential and Kinetic Energy	
10.3	Heat Transfer at High Gas Velocities	
10.4	Further Comments on the Second Law; Entropy, a Property	
10.5	The Kinetic Theory of Heat	
Appendix	Laboratory Practice and Experimental Method	222
