FACULTAD DE INGENIERÍA

Contents

Nº 2199

Introduction	1
Part I: Historical Development	5
The Brownian Movement and Spontaneous Fluctuations of Electricity, <i>D.K.C. MacDonald (Research, February 1948)</i>	7
Electronic Noise: The First Two Decades, <i>J. B. Johnson (IEEE Spectrum, February 1971)</i>	17
Some Perspectives on Receiver Noise Performance and its Measurement, <i>M.T. Lehenbaum (Microwave Journal, January 1973)</i>	22
Noise and Random Processes, <i>J. R. Ragazzini and S. S. L. Chang (Proceedings of the IRE, May 1962)</i>	25
A Bibliography on Noise, <i>P. L. Chessin (IRE Transactions on Information Theory, September 1955)</i>	31
Part II: General Introduction	49
Physical Sources of Noise, <i>J. R. Pierce (Proceedings of the IRE, May 1956)</i>	51
Electronic Fluctuations in Semiconductors, <i>R. E. Burgess (British Journal of Applied Physics, June 1955)</i>	59
Methods of Solving Noise Problems, <i>W. R. Bennett (Proceedings of the IRE, May 1956)</i>	65
Random Processes, <i>Y. K. Lin (Applied Mechanics Review, December 1969)</i>	95
Applications of Electrical Noise, <i>M. S. Gupta (Proceedings of the IEEE, July 1975)</i>	101
Bibliography for Part II	
A. Non-Serial Literature on Noise	116
B. Books on Probability Theory and Stochastic Processes.	120
Part III: Physical Theory of Noise.	125
Thermal and Quantum Noise, <i>B. M. Oliver (Proceedings of the IEEE, May 1965)</i>	129
Noise in Semiconductors and Photoconductors, <i>K. M. van Vliet (Proceedings of the IRE, June 1958)</i>	148
Discussion of Recent Experiments on $1/f$ Noise, <i>F. N. Hooge (Physica, July 1972)</i>	163
$1/ f $ Noise in Physical Measurements, <i>V. Radeka (IEEE Transactions on Nuclear Science, October 1969)</i>	178
Bibliography for Part III	
A. Thermal Noise	197
B. $1/f$ Noise.	200
C. Burst or Popcorn Noise	215
Part IV: Noise in Electron Devices	217
History and Problems of Microwave Tube Noise, <i>J. R. Whinnery (Scientia Electronica, December 1959)</i>	219
Noise in Solid-State Devices and Lasers, <i>A. van der Ziel (Proceedings of the IEEE, August 1970)</i>	237
Noise in Photomultipliers, <i>T. A. Kovaleva, A. E. Melamid, A. N. Pertsev, and A. N. Pisarevskii (Instruments and Experimental Techniques, September-October 1966)</i>	266
Bibliography for Part IV	
A. Noise in Microwave Tubes	279
B. Noise in Other Devices: Tutorial Reviews and Bibliographies.	290

Part V: Generation of Noise	293
Noise Standards, Measurements, and Receiver Noise Definitions, <i>C. K. S. Miller, W. C. Daywitt, and M. G. Arthur (Proceedings of the IEEE, June 1967)</i>	297
Standard Noise Sources, <i>P. A. H. Hart (Philips Technical Review, 1961/62)</i>	310
Noise of a Self-Sustaining Avalanche Discharge in Silicon: Studies at Microwave Frequencies, <i>R. H. Haitz and F. W. Voltmer (Journal of Applied Physics, June 1968)</i>	327
Standard L. F. Noise Sources Using Digital Techniques and their Application to the Measurement of Noise Spectra, <i>H. Sutcliffe and K. F. Knott (The Radio and Electronic Engineer, September 1970)</i>	333
A Low-Frequency Pseudo-Random Noise Generator, <i>C. Kramer (Electronic Engineering, July 1965)</i>	338
Bibliography for Part V	
A. Gas-Discharge Noise Sources	341
B. Temperature Limited Diode Noise Sources	344
C. Resistive Loads as Noise Sources	344
D. Avalanche Diodes as Noise Sources	347
E. Frequency-Translated Noise Sources	349
F. Pseudo-Random Noise Sources	350
G. Other Papers on Noise Sources	353
Author Index	356
Subject Index	357
Editor's Biography	361
