1	PREFACE	xiii	
0	INTRODUCTION—MODELING	1	
	References	5	
1	MODELS OF NEURONS	6	
	1-1 Basic Biophysics Tools		6
	1-1-1 Diffusion of uncharged particles in aqueous solutions	7	
	1-1-2 Drift of charged particles in aqueous solutions	10	
	1-1-3 The Einstein relationship	13	
	1-2 Equilibrium in a One-Ion System		14
	1-3 Donnan Equilibrium		17
	1-4 Space-Charge Neutrality		18
	1-5 Voltage Across a Membrane with Nonzero Permeability for All Ions		21

	Contents
1-6	The Goldman Equation 23
1-7	Ion Pumps 26
1-8	Membrane Potentials for Biological Membranes 27
1-9	The Hodgkin-Huxley Model 31
1-10	The Iron-Wire Model 38
1-11	Summary 39
	References 40
	Problems 42
2	BIOINSTRUMENTATION 45
2-1	Electrodes 46
2-1-1	<i>The electrode-electrolyte model</i> 46
2-1-2	<i>The half-cell potential</i> 47
2-1-3	<i>Silver-silver chloride electrodes</i> 49
2-1-4	<i>Electrode models</i> 50
2-1-5	<i>Microelectrodes</i> 53
2-2	Amplifiers 55
2-2-1	<i>Differential amplifiers</i> 55
2-2-2	<i>Operational amplifiers</i> 57
2-3	Digital Techniques 66
2-4	Patient Lead Devices 67
2-4-1	<i>Diode circuits</i> 68
2-4-2	<i>JFET limiters</i> 70
2-4-3	<i>Isolated leads</i> 72
2-5	Summary 73
	References 75
	Problems 76
3	OPEN-LOOP SYSTEMS 79
3-1	Why Use Laplace Transforms? 79
3-2	The Impulse Response 83

	Contents	ix
3-3	The Identification Problem	84
3-4	Laplace Transform of a Time Delay	89
3-5	Transfer Function of a Crayfish Photoreceptor Ganglion	91
3-6	Mathematical Analysis of Linear Second-Order Systems	96
3-6-1	<i>The transfer function</i>	96
3-6-2	<i>Poles and zeros</i>	98
3-6-3	<i>Pole-zero plots on the complex plane</i>	102
3-6-4	<i>Step response of a second-order system</i>	103
3-6-5	<i>Frequency response of a second-order system</i>	107
3-7	Models for Human Movement	112
3-7-1	<i>The eye-movement control system</i>	112
3-7-2	<i>Four eye-movement systems</i>	113
3-7-3	<i>Quantitative eye-movement models</i>	115
3-7-4	<i>Techniques for validating models</i>	153
3-7-5	<i>Validation of other physiological models</i>	175
3-7-6	<i>Parameter estimation</i>	176
3-7-7	<i>Linearizing the model</i>	177
3-8	Summary	187
	References	188
	Problems	195
4	CLOSED-LOOP SYSTEMS 201	
4-1	Why Use Closed-Loop Systems?	203
4-1-1	<i>Reduction of sensitivity to plant-parameter variations</i>	203
4-1-2	<i>Reduction of sensitivity to output disturbances</i>	206
4-2	Speed of Response	209
4-3	Stability	211
4-3-1	<i>Root-locus plots</i>	212
4-3-2	<i>Opening the loop</i>	214
4-3-3	<i>Bode diagrams</i>	215
4-3-4	<i>Nyquist plots</i>	217
4-3-5	<i>Instability in nonlinear systems</i>	221

4-4 The Neuromuscular System	221
4-4-1 The stretch reflex	221
4-4-2 The antagonist muscle	224
4-4-3 Two control mechanisms	225
4-4-4 Golgi tendon organs	228
4-4-5 Experimental validation of the model	231
4-4-6 Parkinson's syndrome	233
4-5 Thermoregulation Systems	234
4-5-1 Model of the plant	237
4-5-2 Controller model	238
4-5-3 Model validation	240
4-5-4 Model variations	242
4-5-5 Industrial applications	244
4-6 Summary	244
References	245
Problems	247
5 ELECTRICAL SAFETY	255
5-1 Types of Hazards	255
5-1-1 Physiological harm	255
5-1-2 Static electricity	257
5-1-3 Explosion hazard	258
5-1-4 Interruption of power	258
5-2 Ways of Ameliorating the Situation	258
5-2-1 The three-wire electrical distribution system	258
5-2-2 Ground integrity	260
5-2-3 Single-point grounding	261
5-2-4 Grounding in critical care area	264
5-2-5 Isolation transformers	268
5-2-6 Double insulation	269
5-2-7 Good engineering design	270
5-3 Leakage Current	271
5-3-1 Dangers of leakage currents	272
5-3-2 Leakage current testing	274

5-4 Plugs and Receptacles	278
5-4-1 Receptacle wiring	278
5-4-2 Receptacle force testing	281
5-4-3 Pin configurations	281
5-4-4 Grades of plugs and receptacles	283
5-5 Ground Fault Monitors	284
5-5-1 Current monitors	285
5-5-2 Voltage monitors	286
5-5-3 Ground-fault interruptors	288
5-6 Human Subjects	288
5-7 Medical Device Amendments of 1976	290
References	291
Problems	293
6 LABORATORIES	295
6-1 Electrocardiology	295
6-2 Circuit Design Constraints	296
6-3 Electromyogram (EMG)	296
6-4 Electroencephalogram (EEG)	296
6-5 Electro-oculogram (EOG) and Photoelectric Measurements	297
6-6 Clinical Engineering	297
6-7 Radiology	297
6-8 Blood Flows	298
6-9 Pressure	298
6-10 Digital Computer Techniques	298
6-11 Electrode Impedance	298
References	299
