

Foreword	ix
Introduction	xi
Part 1: Gaussian Beams	1
1. On the Propagation of Gaussian Beams of Light Through Lenslike Media Including Those with a Loss or Gain Variation, <i>H. Kogelnik (Applied Optics, December 1965)</i>	3
2. Laser Beams and Resonators, <i>H. Kogelnik and T. Li (Proceedings of the IEEE, October 1966)</i>	11
3. Focal Shift in Focused Truncated Gaussian Beams, <i>Y. Li and E. Wolf (Optics Communications, July 1, 1982)</i>	29
4. Changes in the Characteristics of a Gaussian Beam Weakly Diffracted by a Circular Aperture, <i>P. Belland and J. P. Crenn (Applied Optics, February 1, 1982)</i>	35
5. Focusing Characteristics of a Truncated and Aberrated Gaussian Beam Through a Hemispherical Microlens, <i>K. S. Lee (Applied Optics, October 15, 1986)</i>	41
Part 2: Coupling Theories for Laser Diodes to Single-Mode Optical Fibers	47
6. Coupling and Conversion Coefficients for Optical Modes, <i>H. Kogelnik (Proceedings of the Symposium on Quasi-Optics, June 1964)</i>	49
7. Excitation of the Dominant Mode of a Round Fiber by a Gaussian Beam, <i>D. Marcuse (Bell Systems Technical Journal, October 1970)</i>	61
8. Design of a Miniature Lens for Semiconductor Laser to Single-Mode Fiber Coupling, <i>J.-I. Sakai and T. Kimura (IEEE Journal of Quantum Electronics, October 1980)</i>	70
9. Alignment of Gaussian Beams, <i>W. B. Joyce and B. C. De Loach, Jr. (Applied Optics, December 1, 1984)</i>	78
10. Alignment-Tolerant Optical-Fiber Tips for Laser Transmitters, <i>W. B. Joyce and B. C. De Loach, Jr. (Journal of Lightwave Technology, August 1985)</i>	88
11. Lens Coupling in Fiber-Optic Devices: Efficiency Limits, <i>A. Nicia (Applied Optics, September 15, 1981)</i>	91
12. Lens Coupling of Laser Diodes to Single-Mode Fibers, <i>M. Sumida and K. Takemoto (Journal of Lightwave Technology, June 1984)</i>	101
13. Influence of Lens Imperfections with LD and LED to Single-Mode Fiber Coupling, <i>B. Hillerich (Journal of Lightwave Technology, January 1989)</i>	107
14. Power Coupling from GaAs Injection Lasers into Optical Fibers, <i>L. G. Cohen (Bell System Technical Journal, March 1972)</i>	117
15. Semiconductor Laser to Single-Mode Fiber Coupler, <i>M. Saruwatari and K. Nawata (Applied Optics, June 1, 1979)</i>	139
Part 3: Fabrication Techniques for Single Microlenses	149
Section 3.1: Photolithography	151
16. Microlenses for Coupling Junction Lasers to Optical Fibers, <i>L. G. Cohen and M. V. Schneider (Applied Optics, January 1974)</i>	151
17. Microlenses for Coupling Single-Mode Fibers to Single-Mode Thin-Film Waveguides, <i>P. D. Bear (Applied Optics, September 1, 1980)</i>	157
18. Light Coupling from a Junction Laser into a Monomode Fibre with a Glass Cylindrical Lens on the Fibre End, <i>E. Weidel (Optics Communications, September 1974)</i>	161
19. Microlenses on the End of Single-Mode Optical Fibers for Laser Applications, <i>K. S. Lee and F. S. Barnes (Applied Optics, October 1, 1985)</i>	166
Section 3.2: Chemical Etching	173
20. Improved Coupling Between Laser Diode and Single-Mode Fibre Tipped with a Chemically Etched Self-Centred Diffracting Element, <i>P. Kayoun, C. Puech, M. Papuchon, and H. J. Arditty (Electronics Letters, June 11, 1981)</i>	173

21. Chemically Etched Conical Microlenses for Coupling Single-Mode Lasers into Single-Mode Fibers, <i>G. Eisenstein and D. Vitello (Applied Optics, October 1, 1982)</i>	175
22. Microlens for Coupling a Semiconductor Laser to a Single-Mode Fiber, <i>H. Ghafoori-shiraz and T. Asano (Optics Letters, August 1986)</i>	180
Section 3.3: Thermal Melting	183
23. Light Coupling from a Stripe-Geometry GaAs Diode Laser into an Optical Fiber with Spherical End, <i>D. Kato (Journal of Applied Physics, June 1973)</i>	183
24. Efficient Coupling of Laser Diodes to Tapered Monomode Fibres with High-Index End, <i>G. D. Khoe, J. Poulissen, and H. M. de Vrieze (Electronics Letters, March 17, 1983)</i>	186
25. Characteristics of a Hemispherical Microlens for Coupling Between a Semiconductor Laser and Single-Mode Fiber, <i>J.-I. Yamada, Y. Murakami, J.-I. Sakai, and T. Kimura (IEEE Journal of Quantum Electronics, October 1980)</i>	189
26. Efficient Coupling from Semiconductor Lasers into Single-Mode Fibers with Tapered Hemispherical Ends, <i>H. Kuwahara, M. Sasaki, and N. Tokoyo (Applied Optics, August 1, 1980)</i>	195
27. Lens-Ended Fibers for Medical Applications: A New Fabrication Technique, <i>V. Russo, G. C. Righini, S. Sottini, and S. Trigari (Applied Optics, October 1, 1984)</i>	201
Section 3.4: Mechanical Polishing	209
28. Power Coupling from Laser Diodes into Single-Mode Fibres with Quadrangular Pyramid-Shaped Hemiellipsoidal Ends, <i>H. Sakaguchi, N. Seki, S. Yamamoto (Electronics Letters, June 11, 1981)</i>	209
29. Simple Side Coupler for Coupling Between Laser Diode and Single-Mode Optical Fiber, <i>K. S. Lee and F. S. Barnes (Applied Optics, June 15, 1987)</i>	211
Part 4: The Use of Multiple Lenses for Coupling Laser Diodes to Single-Mode Fibers	215
30. Efficient Laser Diode to Single-Mode Fiber Coupling Using a Combination of Two Lenses in Confocal Condition, <i>M. Saruwatari and T. Sugie (IEEE Journal of Quantum Electronics, June 1981)</i>	217
31. A New Confocal Combination Lens Method for a Laser-Diode Module Using a Single-Mode Fiber, <i>K. Kawano, M. Saruwatari, and O. Mitomi (Journal of Lightwave Technology, August 1985)</i>	224
32. Combination Lens Method for Coupling a Laser Diode to a Single-Mode Fiber, <i>K. Kawano, O. Mitomi, and M. Saruwatari (Applied Optics, April-1, 1985)</i>	231
33. Coupling Characteristics of Lens Systems for Laser Diode Modules Using Single-Mode Fiber, <i>K. Kawano (Applied Optics, August 1, 1986)</i>	237
34. Laser Diode Module for Single-Mode Fiber Based on New Confocal Combination Lens Method, <i>K. Kawano, O. Mitomi, and M. Saruwatari (Journal of Lightwave Technology, September 1986)</i>	243
35. An Effective Nonreciprocal Circuit for Semiconductor Laser-to-Optical-Fiber Coupling Using a YIG Sphere, <i>T. Sugie and M. Saruwatari (Journal of Lightwave Technology, March 1983)</i>	250
36. High-Efficiency Two Lens Laser Diode to Single-Mode Fiber Coupler with a Silicon Plano Convex Lens, <i>H. Karstensen and R. Frankenberger (Journal of Lightwave Technology, February 1989)</i>	260
Part 5: Integrated Microlenses	267
37. A Semiconductor Laser with a Converging Output Beam, <i>S. Mukai, H. Yajima, M. Watanabe, H. Itoh, Y. Takabe, and Y. Tsunekawa (Applied Physics Letters, May 1, 1985)</i>	269
38. Monolithic Integration of a Lens Inside a Diode-Laser Cavity for Beam Convergence, <i>S. Mukai, H. Yajima, Y. Tsunekawa, and Y. Takabe (Applied Physics Letters, August 1, 1985)</i>	271
39. Diode Lasers with Cylindrical Mirror Facets and Reduced Beam Divergence, <i>J. N. Walpole, Z. L. Liao, L. J. Missaggia, and D. Yap (Applied Physics Letters, May 4, 1987)</i>	274
40. Integration of a Diode Laser and an Electronic Lens for Controlling the Beam Focus Position, <i>S. Mukai, M. Watanabe, H. Itoh, and H. Yajima (Applied Physics Letters, January 23, 1989)</i>	277
Part 6: Microlens Arrays	279
41. A Distributed-Index Planar Micro-Lens Made of Plastics, <i>M. Oikawa, K. Iga, and T. Sanada (Japanese Journal of Applied Physics, January 1981)</i>	281
42. Array of Distributed-Index Planar Micro-Lenses Prepared from Ion Exchange Technique, <i>M. Oikawa, K. Iga, T. Sanada, N. Yamamoto, and K. Nishizawa (Japanese Journal of Applied Physics, April 1981)</i>	285
43. Distributed-Index Planar Microlens Array Prepared from Deep Electromigration, <i>M. Oikawa, K. Iga, and T. Sanada (Electronics Letters, June 25, 1981)</i>	288

44. Photolytic Technique for Producing Microlenses in Photosensitive Glass, <i>N. F. Borrelli, D. L. Morse, R. H. Bellman, and W. L. Morgan (Applied Optics, August 15, 1985)</i>	290
45. Stacked Planar Optics: An Application of the Planar Microlens, <i>K. Iga, M. Oikawa, S. Misawa, J. Banno, and Y. Kokubun (Applied Optics, October 1, 1982)</i>	296
46. Technique for Monolithic Fabrication of Microlens Arrays, <i>Z. D. Popovic, R. A. Sprague, and G. A. N. Connell (Applied Optics, April 1, 1988)</i>	301
47. Estimation of a Planar Microlens by Oblique Ray Tracing, <i>S. Misawa and K. Iga (Applied Optics, February 1, 1988)</i>	305
Part 7: Techniques for Reducing Optical Feedback	311
48. Beam-to-Fiber Coupling with Low Standing Wave Ratio, <i>R. Ulrich and S. C. Rashleigh (Applied Optics, July 15, 1980)</i>	313
49. Characterization of Laser-to-Fiber Coupling Techniques by Their Optical Feedback, <i>W. Bludau and R. Rossberg (Applied Optics, June 1, 1982)</i>	317
50. Noise and Distortion Characteristics of Semiconductor Lasers in Optical Fiber Communication Systems, <i>K. Peterman and G. Arnold (IEEE Journal of Quantum Electronics, April 1982)</i>	324
51. Comparison of Efficiency and Feedback Characteristics of Techniques for Coupling Semiconductor Lasers to Single-Mode Fiber, <i>G. Wenke and Y. Zhu (Applied Optics, December 1, 1983)</i>	336
52. Optical Output Power Fluctuation due to Reflected Lightwaves in Laser Diode Modules, <i>K. Kawano, T. Mukai, and O. Mitomi (Journal of Lightwave Technology, November 1986)</i>	344
53. Distributed Feedback Laser Diode (DFB-LD) to Single-Mode Fiber Coupling Module with Optical Isolator for High Bit Rate Modulation, <i>T. Sugie and M. Saruwatari (Journal of Lightwave Technology, February 1986)</i>	352
Part 8: Characterization of Measurement Techniques	363
54. Near- and Far-Field Characterization of Diode Lasers, <i>S. Peled (Applied Optics, January 15, 1980)</i>	365
55. Techniques for Measuring 1- μm Diam Gaussian Beams, <i>D. K. Cohen, B. Little, and F. S. Luecke (Applied Optics, February 15, 1984)</i>	370
56. Knife-Edge Scanning Measurements of Subwavelength Focused Light Beams, <i>A. H. Firester, M. E. Heller, and P. Sheng (Applied Optics, July 1977)</i>	374
57. Measuring the Spot Size of a Gaussian Beam with an Oscillating Wire, <i>E. Stijns (IEEE Journal of Quantum Electronics, December 1980)</i>	378
58. Spot Size Measurements for Single-Mode Fibers—A Comparison of Four Techniques, <i>W. T. Anderson and D. L. Philen (Journal of Lightwave Technology, March 1983)</i>	380
59. Cylindrical Lenses: Testing and Radius of Curvature Measurement, <i>R. Diaz-Urbe, J. Pedraza-Contreras, O. Cardona-Nunez, A. Cordero-Davila, and A. Cornejo-Rodriguez (Applied Optics, May 15, 1986)</i>	387
Part 9: Laser Diodes to Single-Mode Fiber Modules	391
60. Optical Componentry Utilized in Field Trial of Single-Mode Fiber Long-Haul Transmission, <i>J.-I. Minowa, M. Saruwatari, and N. Suzuki (IEEE Journal of Quantum Electronics, April 1982)</i>	393
61. Progress in Monomode Optical-Fiber Interconnection Devices, <i>G.-D. Khoe, H. G. Kock, D. Küppers, J. H. F. M. Poulissen, and H. M. De Vrieze (Journal of Lightwave Technology, June 1984)</i>	406
62. Low-Loss Lens Connector for Single-Mode Fibers, <i>S. Masuda and T. Iwama (Applied Optics, October 1, 1982)</i>	417
63. Laser-to-Monomode-Fiber Coupling and Encapsulation in a Modified TO-5 Package, <i>G.-D. Khoe and H. G. Kock (Journal of Lightwave Technology, December 1985)</i>	426
Part 10: Coupling from Light-Emitting Diodes to Optical Fibers	433
64. Small-Area, Double-Heterostructure Aluminum-Gallium Arsenide Electroluminescent Diode Sources for Optical-Fiber Transmission Lines, <i>C. A. Burrus and B. I. Miller (Optics Communications, December 1971)</i>	435
65. Efficient Power Coupling Between an MH LED and a Taper Ended Multimode Fiber, <i>Y. Uematsu, T. Ozeki, and Y. Unno (IEEE Journal of Quantum Electronics, February 1979)</i>	438
66. Coupling of Spherical-Surfaced LED and Spherical-Ended Fiber, <i>O. Hasegawa, R. Namazu, M. Abe, and Y. Tōyama (Journal of Applied Physics, January 1980)</i>	445
67. Preparation and Properties of Monolithically Integrated Lenses on InGaAsP/InP Light-Emitting Diodes, <i>J. Heinen (Electronics Letters, September 16, 1982)</i>	452

68. Photoelectrochemical Etching of Integral Lenses on InGaAsP/InP Light-Emitting Diodes, <i>F. W. Ostermayer, Jr., P. A. Kohl, and R. H. Burton</i> (<i>Applied Physics Letters</i> , October 1, 1983)	454
69. Calculations for Integral Lenses on Surface-Emitting Diodes, <i>P. P. Deimel</i> (<i>Applied Optics</i> , February 1, 1985)	457
70. Theory of LED Coupling to Single-Mode Fibers, <i>D. N. Christodoulides, L. A. Reith, and M. A. Saifi</i> (<i>Journal of Lightwave Technology</i> , November 1987)	463
71. Efficiency and Alignment Tolerances of LED to Single-Mode Fibre Coupling—Theory and Experiment, <i>B. Hillerich</i> (<i>Optical and Quantum Electronics</i> , 1987).....	470
