
Contents

Chapter 1	Sample Spaces	1
	Introduction	1
1.1	Experiments with Random Outcomes	1
1.2	Sample Spaces, Events, and Random Variables	3
	Exercises	6
Chapter 2	Probabilities	7
	Introduction	7
2.1	Relative Frequency of Events	7
2.2	Axioms of Probability	13
2.3	Conditional Probability and Bayes' Formula	24
2.4	Stochastic Independence	29
2.5	Repeated Independent Trials	32
	Exercises	40
Chapter 3	Distributions and Expectations of Random Variables	45
	Introduction	45
3.1	Distribution Function of a Random Variable	45
3.2	Discrete Random Variables	47
3.3	Continuous Random Variables	52
3.4	Expectation of a Random Variable	57

3.5	Functions of a Random Variable	61
3.6	Simulation of a Random Variable	66
	Exercises	71
Chapter 4	Joint Distributions of Random Variables	75
	Introduction	75
4.1	Joint Mass Functions and Densities	75
4.2	Independent Random Variables	82
4.3	Moment-generating Functions	89
4.4	Families of Random Variables	92
4.5	Markov and Chebyshev Inequalities	95
4.6	Law of Large Numbers	98
4.7	Central Limit Theorem	102
	Exercises	108
Chapter 5	Conditional Expectations	113
	Introduction	113
5.1	Conditional Distributions (Discrete Case)	113
5.2	Conditional Expectations	115
5.3	Conditional Expectations (Continuous Case)	118
5.4	Sum of a Random Number of Random Variables	122
	Exercises	124
Chapter 6	Markov Chains	127
	Introduction	127
6.1	State Spaces and Transition Diagrams	127
6.2	Joint Probabilities	133
6.3	More Examples	139
6.4	n -Step Transition Probabilities	146
6.5	Classification of States	151
6.6	Absorbing Chains	157
6.7	Regular Chains	164
6.8	Stationary Distributions	169
6.9	Time Averages	172
6.10	Sojourn Times and First Entrance Times	176
	Exercises	182

Chapter 7 The Poisson Process 187

Introduction 187

- 7.1 Memoryless Random Variables 187
 - 7.2 Replacement Models 193
 - 7.3 Simulation of a Poisson Process 194
 - 7.4 Fundamental Properties of a Poisson Process 196
 - 7.5 Differential Equations for a Poisson Process 200
- Exercises 203

Chapter 8 Continuous-Time Stochastic Processes 207

Introduction 207

- 8.1 Stochastic Processes 207
 - 8.2 Characterization of the Poisson Process 209
 - 8.3 Discrete-Time Approximation to the Poisson Process 213
 - 8.4 Compound Poisson Process 215
 - 8.5 Nonhomogeneous Poisson Process 218
 - 8.6 Queueing Processes 221
 - 8.7 $M/M/1$ Queue and Exponential Models 224
- Exercises 227

Chapter 9 Birth and Death Processes 231

Introduction 231

- 9.1 Linear Growth Model 231
 - 9.2 Birth–Death Processes 232
 - 9.3 State-Transition Diagrams 234
 - 9.4 Transition Probabilities 237
 - 9.5 Differential Equations for Transition Probabilities 241
 - 9.6 Pure Birth Processes 245
- Exercises 247

Chapter 10 Steady-State Probabilities 251

Introduction 251

- 10.1 Approach to Equilibrium 251
- 10.2 Steady-State Equations 252
- 10.3 Limiting Probabilities 254
- 10.4 Balance Equations 258

10.5	Time-Averages	260
10.6	Steady-State Analysis of the $M/M/1$ Queue	264
10.7	Machine Repair Model	266
	Exercises	267
Chapter 11	General Queueing Systems	271
	Introduction	271
11.1	Long-Term Average Queue Characteristics	272
11.2	Little's Formula	274
11.3	Steady-State Behavior of $M/M/1$ Queue	275
11.4	Service in Stages	278
11.5	Jackson's Theorem	282
11.6	$M/M/s$ Queue Statistics	284
11.7	Optimization Problems	291
11.8	Examples of Queue Simulation	296
	Exercises	305
Chapter 12	Renewal Processes	313
	Introduction	313
12.1	Failure Rates	314
12.2	Renewal Model	317
12.3	Random Stopping Rules and Wald's Identity	321
12.4	Renewals with Rewards	324
12.5	Age-Replacement Model	328
12.6	Regeneration Points	332
12.7	Lifetime Sampling and the Inspection Paradox	338
12.8	Waiting Times for the $M/G/1$ Queue	343
	Exercises	346
	Table 1. Discrete Probability Distributions	352
	Table 2. Continuous Probability Distributions	353
	Table 3. Cumulative Normal Distribution Function	354
	Table 4. Random Numbers	355
	Suggestions for Further Reading	356
	Numerical Solutions to Selected Exercises	358
	Index	364
