PREFACE	xi
<hr/>	
CHAPTER 1	1
<hr/>	
Overview of Signals and Systems	
Introduction	1
1.1 Signals	2
1.2 Systems	6
<hr/>	
CHAPTER 2	9
<hr/>	
Continuous-Time and Discrete-Time Signals	
Introduction	9
PART A Continuous-Time Signals	10

2.1	Basic Continuous-Time Signals	10
2.2	Modification of the Variable t	18
2.3	Continuous-Time Convolution	24
	PART B Discrete-Time Signals	31
2.4	Basic Discrete-Time Signals	31
2.5	Modification of the Variable n	36
2.6	Discrete-Time Convolution	42
	Summary	49
	Problems	49

CHAPTER 3 59

Linear Time-Invariant Systems

	Introduction	59
	PART A Continuous-Time Systems	60
3.1	System Attributes	60
3.2	Continuous-Time LTI Systems	65
3.3	Properties of LTI Systems	72
3.4	Differential Equations and Their Implementation	78
	PART B Discrete-Time Systems	90
3.5	System Attributes	90
3.6	Discrete-Time LTI Systems	94
3.7	Properties of LTI Systems	103
3.8	Difference Equations and Their Implementation	109
	Summary	120
	Problems	121

CHAPTER 4 137

Fourier Analysis for Continuous-Time Signals

	Introduction	137
4.1	The Eigenfunctions of Continuous-Time LTI Systems	138
4.2	Periodic Signals and the Fourier Series	140
4.3	The Continuous-Time Fourier Transform	153
4.4	Properties and Applications of the Fourier Transform	161
	APPLICATION 4.1 Amplitude Modulation	163
	APPLICATION 4.2 Sampling	169

4.5	Frequency Response of LTI Systems	176
	APPLICATION 4.3 Filtering	188
	Summary	194
	Problems	194

CHAPTER 5**209****The Laplace Transform**

	Introduction	209
5.1	The Region of Convergence	210
5.2	The Inverse Laplace Transform	220
5.3	Properties of the Laplace Transform	224
5.4	The System Function for LTI Systems	232
5.5	Differential Equations	239
	APPLICATION 5.1 Butterworth Filters	246
5.6	Structures for Continuous-Time Filters	255
	Summary	263
	APPENDIX 5A The Unilateral Laplace Transform	264
	APPENDIX 5B Partial-Fraction Expansion for Multiple Poles	266
	Problems	270

CHAPTER 6**285****The z Transform**

	Introduction	285
6.1	The Eigenfunctions of Discrete-Time LTI Systems	286
6.2	The Region of Convergence	288
6.3	The Inverse z Transform	296
6.4	Properties of the z Transform	306
6.5	The System Function for LTI Systems	314
6.6	Difference Equations	322
	APPLICATION 6.1 Second-Order IIR Filters	334
	APPLICATION 6.2 Linear-Phase FIR Filters	338
6.7	Structures for Discrete-Time Filters	343
	Summary	349
	APPENDIX 6A The Unilateral z Transform	350
	APPENDIX 6B Partial-Fraction Expansion for Multiple Poles	352
	Problems	356

CHAPTER 7 **371**

Fourier Analysis for Discrete-Time Signals

Introduction	371
7.1 The Discrete-Time Fourier Transform	372
7.2 Properties of the DTFT	376
APPLICATION 7.1 Windowing	380
7.3 Sampling	388
7.4 Filter Design by Transformation	401
7.5 The Discrete Fourier Transform/Series	406
APPLICATION 7.2 FFT Algorithm	416
Summary	420
Problems	421

CHAPTER 8 **435**

State Variables

Introduction	435
8.1 Discrete-Time Systems	436
8.2 Continuous-Time Systems	448
8.3 Operational-Amplifier Networks	457
Summary	465
Problems	465

BIBLIOGRAPHY **473****INDEX** **477**
