

## CONTENTS

	<u>Page</u>
PREFACE.....	v
ACKNOWLEDGEMENTS.....	vii
SECTION I—PERSPECTIVES	
1. Biomaterials From a Surface Science Perspective ( <i>B. Kasemo and J. Lausmaa</i> ).....	1
2. Surface Characterization of Biomaterials: How Finely Can We Resolve Surface Structure? ( <i>B. D. Ratner</i> ).....	13
SECTION II—TUTORIAL ARTICLES	
3. Introduction to X-ray Photoelectron Spectroscopy ( <i>R. W. Paynter</i> ).....	37
4. The Determination of the Surface Tensions of Solid Films ( <i>E. Sacher</i> ).....	53
5. Static Secondary Ion Mass Spectrometry: A New Technique for the Characterization of Biomedical Polymer Surfaces ( <i>D. G. Castner and B. D. Ratner</i> ).....	65
SECTION III—TECHNIQUES FOR CHARACTERIZATION OF BIOMOLECULES AT INTERFACES	
6. Scanning Electron Stimulated Desorption Microscopy of Biological and Organic Surfaces ( <i>J. H. Abrams and H. F. Dylla</i> ).....	83
7. Surface Characterization of Protein-Coated Polymer Materials ( <i>D. R. Absolom</i> ).....	101
8. Weak and Strong Lipid-Protein Interactions Characterized by the Monolayer Technique ( <i>F. Lamarche, J. J. Max, and R. M. Leblanc</i> ).....	117
9. Waste Microbial Biomass as a De-Emulsifying Agent ( <i>R. P. Lyng and N. Kosaric</i> ).....	135
SECTION IV—SURFACE CHARACTERIZATION OF BIOMATERIAL INTERFACES	
10. Electron and Vibrational Spectroscopic Studies of the Surfaces of Biocompatible Materials ( <i>J. A. Gardella Jr., T. G. Vargo, T. J. Hook, G. L. Grobe III, L. Salvati Jr., and J. Hautaniemi</i> ).....	145
11. Preparation, Surface Spectroscopic and Electron Microscopic Characterization of Titanium Implant Materials ( <i>J. Lausmaa, B. Kasemo, U. Rolander, L. M. Bjursten, L. E. Ericson, L. Rosander, and P. Thomsen</i> ).....	161

12. Surface Spectroscopy of Calcium Phosphate Ceramic and Titanium Implant Materials ( <i>P. Ducheyne and K. E. Healy</i> ) .....	175
13. XPS and Related Studies of a Plasma Modified Contact Lens Co-Polymer ( <i>D. W. Fakes, J. F. Watts, and J. M. Newton</i> ) .....	193

#### SECTION V—CELL INTERACTIONS WITH CHARACTERIZED SURFACES

14. The Effect of Surface Topography on Cell Migration and Adhesion ( <i>D. M. Brunette</i> ) .....	203
15. The Importance and Measurement of Surface Charge Species in Cell Behavior at the Biomaterial Interface ( <i>J. E. Davies</i> ) .....	219
16. Erythrocyte Adhesion to Polymer Surfaces: Physicochemical and Hydrodynamic Factors ( <i>D. R. Absolom</i> ) .....	235

#### SECTION VI—SURFACE CHARACTERIZATION OF BLOCK COPOLYMERS OF BIOMEDICAL INTEREST

17. Surface Analysis of Polyether and Polysiloxane Soft Segment Polyurethanes ( <i>K. G. Tingey, J. D. Andrade, R. J. Zdrahala, K. K. Chittur, and R. M. Gendreau</i> ) .....	255
18. Surface Characteristics and Antithrombogenicity of Segmented Copolymers With Crystalline/Amorphous Microdomains ( <i>N. Yui, K. Kataoka, and Y. Sakurai</i> ) .....	271
19. Surface and Bulk Morphology of Polyurethanes by Electron Microscopies ( <i>S. L. Goodman, C. Li, J. B. Pawley, S. L. Cooper, and R. M. Albrecht</i> ) .....	281
20. Surface Degradation of Biomedical Polyurethanes ( <i>R. E. Marchant, Q. Zhao, J. M. Anderson, A. Hiltner, and R. S. Ward</i> ) .....	297
21. ESCA and Static SIMS Studies of Polyurethane Surfaces ( <i>B. D. Ratner, D. Briggs, M. J. Hearn, S. C. Yoon, and P. G. Edelman</i> ) .....	317
