

Blueprint^{ONE}

Blueprint One is a fully-integrated course for students of English who are complete beginners, and for those who already have some knowledge of the language.

Blueprint enables students to see clearly what they are learning and why:

- Preview sections contextualise the language which is to follow.
- Focus boxes in each unit highlight the language content.
- Check exercises help students to monitor their progress.
- A Language Review reference section provides a complete grammar summary.

Blueprint encourages students to explore the language and to learn efficiently:

- Inductive grammar questions stimulate students to reflect on how the language works.
- Learning to learn sections give students advice on how to improve their learning skills.

Blueprint relates to students' lives and challenges them to think:

- Topics emphasise international and cross-cultural themes.
- Characters give a living dimension to the language.

Blueprint One components:

Students' Book

Workbook

Teacher's Book

Student Cassette

Set of two Class Cassettes
