

CONTENTS

Introduction to the Series	iii
Preface	v
1 ONE-COMPARTMENT MODEL	1
I Intravenous Injection	2
II Intravenous Infusion	27
III First-order Absorption	33
References	43
2 MULTICOMPARTMENT MODELS	45
I Two-compartment Model	48
II Other Two-compartment Models	86
III Three-compartment Model	89
References	95
3 MULTIPLE DOSING	97
I One-compartment Model	97
II Two-compartment Model	119
References	127
4 BIOAVAILABILITY	129
I Rate of Drug Absorption	130
II Extent of Absorption	145
III Sustained Release	166
References	173
5 APPARENT VOLUMES OF DISTRIBUTION	175
References	187

6	KINETICS OF REVERSIBLE PHARMACOLOGIC EFFECTS	189
	I Direct Effects	189
	II Indirect Effects	204
	References	213
7	NONLINEAR PHARMACOKINETICS	215
	References	227
8	ROUTE OF ADMINISTRATION AND DRUG DISPOSITION	229
	I Introduction	229
	II First-pass Effects	232
	III Influence of First-pass Effects on Body Clearance in Multicompartment Systems	243
	References	251
9	RENAL IMPAIRMENT	253
	I Dosage Regimen Adjustments	255
	References	265
	APPENDIX 1	
	Method of Laplace Transforms	267
	APPENDIX 2	
	Method for Solving Linear Mammillary Models	273
	APPENDIX 3	
	Method of Residuals	281
	APPENDIX 4	
	Trapezoidal Rule	293
	APPENDIX 5	
	Principle of Superposition	297
	APPENDIX 6	
	Experimentally Determined Rates	301

CONTENTS	xi
APPENDIX 7	
Computer Programs	307
APPENDIX 8	
Estimation of Absolute Drug Bioavailability Without Comparison to Parenteral Dose	309
APPENDIX 9	
Glossary	311
AUTHOR INDEX	319
SUBJECT INDEX	323
