## SECTION I Interaction of Ultrasound with Tissue

- |   |   |  |    |
|---|---|--|----|
| 1 | Some Basic Ideas in Scattering Theory and their Application to Ultrasonic Tissue Characterisation                 | M J W Povey  |    |
| 2 | Recent Progress in B-Mode Texture Analysis and Speckle Reduction  | J C Bamber<br>G Cook-Martin<br>J V Phelps<br>D K Nassiri<br>C R Hill | 9  |
| 3 | Echo Production and Transmission at Interfaces  | R C Chivers  | 12 |
| 4 | Defocussing Studies in Model Systems  | J Adach<br>R C Chivers   | 20 |
| 5 | An Intercomparison of Discrete-Frequency and Broadband Techniques for the Determination of Ultrasonic Attenuation | B Zeqiri   | 27 |
| 6 | Calorimetric Assessment of Propagation Parameters, Exposure and Dose Rate   | S Reantragoon<br>R C Chivers   | 36 |
| 7 | Pulse Distortion in Tissue - mimicking Test Objects   | J A Evans<br>R Price<br>S Kirk                                       | 45 |

## SECTION II Measurement of Acoustic Output Parameters

- |    |   |  |    |
|----|---|--|----|
| 8  | The Performance of the NPL Ultrasound Beam Calibrator   | R C Preston                            | 53 |
| 9  | Initial Experience in Using the Nuclear Enterprises NPL Ultrasound Beam Calibrator                                  | P D Clark                              | 61 |
| 10 | The Significance of Nonlinear Propagation in Determining Ultrasonic Exposure  | D R Bacon                              | 70 |
| 11 | A Comparison of the Frequency Response of Membrane and Needle Probe PVDF Hydrophones                                | S P Robinson                           | 79 |
| 12 | A New Approach Towards Measurement of Three-Dimensional Pulses: Linear and Nonlinear Fields                         | E T Costa<br>S Leeman<br>J C Hoddinott | 87 |
| 13 | A European Protocol for the Comparative Assessment of Diagnostic Ultrasound Imaging Equipment — Preliminary Details | K McCarty                              | 94 |

### **SECTION III Doppler Ultrasound**

- |           |   |  |     |
|-----------|---|--|-----|
| <b>14</b> | The Electrical Impedance and Matching of Doppler Transducers                                      | D H Follett<br>D Peake   | 101 |
| <b>15</b> | Real Time Spectral Analysis of Doppler Signals Using a Digital Signal Processor and Microcomputer | F S Schlindwein<br>D H Evans                                       | 112 |
| <b>16</b> | The Effect of Acoustic Speckle on Ultrasonic Doppler Studies of Blood Flow                        | N P Luckman<br>R Skidmore<br>J M Evans<br>D Jenkins<br>P N T Wells | 119 |
| <b>17</b> | Classification of Doppler Ultrasound Waveforms as an Aid to Clinical Diagnosis                    | C P Oates  | 125 |

### **SECTION IV New Techniques**

- |           |  |  |     |
|-----------|--|--|-----|
| <b>18</b> | Modelling of Ultrasonic Wave Propagation in Waveguides | N C Nicholson<br>W N McDicken                        | 135 |
| <b>19</b> | Attenuation Images: Removing the Artefacts             | J C Hoddinott<br>D A Seggie<br>S Leeman<br>E T Costa | 144 |

- |                     |  |  |     |
|---------------------|--|--|-----|
| <b>Contributors</b> |  |  | 151 |
|---------------------|--|--|-----|
