

Contents

Preface

Acknowledgements

Section I: Basic Doppler Physics

Hans-J. Smith, M.D.

UNIVERSIDAD NACIONAL DE ENTRE RIOS
FACULTAD DE INGENIERIA
CENTRO DE MEDIOS
BIBLIOTECA

1.	The Doppler Effect	1
2.	Reflection of Ultrasound from Blood	5
3.	The Doppler Equation.....	9
4.	Doppler Frequency Shift vs. Blood Flow Velocity	18
5.	Transmission and Reception of Sound Beams in Doppler Ultrasound.....	20
6.	Transformation of the Echo Signal to the Doppler Frequency Shift Signal.....	26
7.	Display Modes of the Doppler Frequency Shift and Flow Velocity.....	39
8.	The Bandwidth of the Frequency Spectrum	50
9.	Pulsed Doppler and Shannon's Sampling Theorem.....	57
10.	Beyond the Nyquist Limit: Aliasing.....	62
11.	Alternative Measurements of High Velocities: CW Doppler and High PRF	69
12.	Volume Blood Flow.....	73
	References for Section I.....	81

Section II: Color Flow Imaging

James A. Zagzebski, Ph.D.

13.	Introduction to Color Flow Imaging	85
14.	Pulse Echo B-Mode Scanning.....	86
15.	Color Flow Using Doppler Processing.....	96
16.	Aliasing in Color Flow Imaging.....	107
17.	Estimating Velocities Using Time Domain Correlation .	110
	References for Section II	114
	Index	117
