

■ Contents

Preface	v	3449
About This Book		
Chapter Overview	xiii	
About the Examples	xiv	
Notation and Terminology	xv	
The <i>Programming in Mathematica Web Site</i>	xvi	
Teaching <i>Mathematica</i> Programming	xvi	
1 Introduction		
1.1 From Calculations to Programs	3	
1.2 Basic Ingredients of a Package	8	
1.3 A Second Function in the Package	12	
1.4 Options	15	
1.5 Defaults for Positional Arguments	21	
1.6 Parameter Type Checking	25	
2 Packages		
2.1 Contexts	31	
2.2 Packages That Use Other Packages	36	
2.3 Protection of Symbols in a Package	41	
2.4 Package Framework and Documentation	45	
2.5 Loading Packages	49	
2.6 Large Projects	58	
3 Defaults and Options		
3.1 Default Values	63	
3.2 Options for Your Functions	67	
3.3 Setting Options of Several Commands	74	
4 Functional and Procedural Programming		
4.1 Procedures and Local Variables	81	
4.2 Loops	83	
4.3 Structured Iteration	88	
4.4 Iterated Function Application	94	
4.5 Map and Apply	103	
4.6 Application: The Platonic Solids	107	
4.7 Operations on Lists and Matrices	113	
5 Evaluation		
5.1 Evaluation of the Body of a Rule	123	
5.2 Pure Functions	130	

5.3 Nonstandard Evaluation	135
5.4 Nonlocal Flow of Control	143
5.5 Definitions	146
5.6 Advanced Topic: Scopes of Names	153
6 Transformation Rules	
6.1 Simplification Rules and Normal Forms	161
6.2 Application: Trigonometric Simplifications	166
6.3 Globally Defined Rules	173
6.4 Pattern Matching for Rules	177
6.5 Traversing Expressions	185
7 Numerical Computations	
7.1 Numbers	191
7.2 Numerical Evaluation	197
7.3 Numeric Quantities	203
7.4 Application: Differential Equations	208
8 Interaction with Built-in Rules	
8.1 Modifying the Main Evaluation Loop	217
8.2 User-Defined Rules Take Precedence	223
8.3 Modifying System Function	227
8.4 Advanced Topic: A New Mathematical Function	231
9 Input and Output	
9.1 Input and Output Formatting	239
9.2 Input from Files and Programs	243
9.3 Running <i>Mathematica</i> Unattended	249
9.4 Session Logging	257
9.5 Advanced Topic: Typesetting Mathematics	264
10 Graphics Programming	
10.1 Graphics Packages	273
10.2 Animated Graphics	277
10.3 The Chapter Pictures	282
11 Notebooks	
11.1 Packages and Notebooks	289
11.2 The Structure of Notebooks	294
11.3 Frontend Programming	299
12 Application: Iterated Function Systems	
12.1 Affine Maps	311
12.2 Iterated Function Systems	317
12.3 Examples of Invariant Sets	327
12.4 Documentation: Help Notebooks and Manuals	331

Appendix A Exercises

A.1 Programming Exercises 337
A.2 Solutions 339

Appendix B Bibliography

B.1 Background Information and Further Reading 347
B.2 References 350

Index

Programs 355
Subjects and Names 356
