| ACKNOWLEDGEMENTS | |
| DEDICATION | |
| PREFACE | |
| GLOSSARY OF PACEMAKER MANUFACTURERS | |
| 1. The rationale for rate responsive cardiac pacing | 1 |
| 2. Physiologic basis for rate responsive cardiac pacing | 5 |
| 3. Development of implantable physiologic sensors for rate responsive cardiac pacing | 7 |
| 4. Rate responsive systems | 11 |
| 5. Activity | 13 |
| 6. QT interval — ventricular endocardial paced evoked response | 29 |
| 7. Respiratory rate | 37 |
| 8. Minute ventilation | 41 |
| 9. Central venous temperature | 49 |
| 10. Central venous pH | 57 |
| 11. P wave averaging | 59 |
| 12. Right ventricular dP/dt | 63 |
| 13. Central or mixed venous oxygen saturation | 65 |
| 14. Right ventricular stroke volume | 69 |
| 15. Right ventricular pre-ejection period | 71 |
| 16. Ventricular depolarisation gradient (QRS) | 73 |
| 17. Mean right atrial pressure | 77 |
| 18. Comparative studies with sensors | 79 |
| 19. Combined sensors | 87 |
| 20. Rate responsive dual chamber pacing | 89 |
| 21. Conclusions | 93 |
