

Table of Contents

1.0	Introduction	5
2.0	Principles of Laser Surgery	2-9
3.0	Instrumentation	10-12
4.0	Preparation for Surgery	13
5.0	Anesthesia	
6.0	Safety Measures	
6.1	Emergency measures to be taken if tubes catch on fire	14
7.0	Fields of Application	
7.1	Larynx	
7.1.1	Recurrent Respiratory Laryngeal Papilloma	15-16
7.1.2	Laryngotracheal Stenosis	17-19
7.1.3	Recurrent Nerve Paralysis	20-21
7.1.4	Benign Laryngeal and Hypopharyngeal Lesions (Cysts, Polyps, Reinke's Edema, Vocal Cord Nodules, Hemangioma, Pheochromocytoma)	22-24
7.1.5	Hypopharyngeal Diverticulum	25-26
7.1.6	Laryngeal and Hypopharyngeal Carcinoma	
7.1.6.1	Vocal Cord Carcinoma	
7.1.6.1.1	Limited Vocal Cord Carcinoma	27
7.1.6.1.2	Advanced Vocal Cord Carcinoma	
7.1.6.2	Supraglottic Carcinoma	28-30
7.1.6.2.1	Small Carcinoma of the Border of the Epiglottis	
7.1.6.2.2	Carcinoma of the Supra- and Infrahyoid Epiglottis	31-35
7.1.6.2.3	Carcinoma of the Vestibular Fold	36
7.1.6.3	Hypopharyngeal Carcinoma	37-39
7.2	Lesions of the Oral Cavity and Oropharynx	
7.2.1	Oral Cavity and Oropharyngeal Carcinoma	39-42
7.3	Use of the Carbon Dioxide Laser in the Nose	
7.3.1	Hyperplasia of the Lower Turbinates and Nasal Polyps	
7.3.2	Bilateral Choanal Atresia in Neonates	43
7.4	Use of the Carbon Dioxide Laser in the Ears	44
	Suggested Reading	45
