

Contents

I Introduction to Physiology: The Cell and General Physiology

1. Functional Organization of the Human Body and Control of the "Internal Environment" 3
2. The Cell and Its Function 9
3. Genetic Control of Protein Synthesis, Cell Function, and Cell Reproduction 22
4. Transport Through the Cell Membrane. 34

II Nerve and Muscle

5. Membrane Potentials and Action Potentials 47
6. Contraction of Skeletal Muscle. 59
7. A. Neuromuscular Transmission; B. Function of Smooth Muscle 71
A. *Transmission of Impulses from Nerves to Skeletal Muscle Fibers: The Neuromuscular Junction, 71*
B. *Smooth Muscle and Its Contraction, 74*

III The Heart

8. Heart Muscle; The Heart as a Pump 85
9. Rhythmical Excitation of the Heart. 94
10. The Electrocardiogram and Electrocardiographic Interpretation of Heart Abnormalities 100

IV The Circulation

11. Overview of the Circulation: Physics of Pressure, Flow, and Resistance. 115
12. Special Functions of the Systemic Circulation—Arteries, Veins, and Capillaries 122
13. Capillary Fluid Exchange, Interstitial Fluid Dynamics, and Lymph Flow. 130
14. Local Control of Blood Flow by the Tissues; and Humoral Regulation. 142
15. Nervous Regulation of the Circulation, and Rapid Control of Arterial Pressure. 149

16.	Role of the Kidneys in Long-Term Regulation of Arterial Pressure and in Hypertension.	157
17.	Cardiac Output and Circulatory Shock	169
18.	Muscle Blood Flow and Cardiac Output During Exercise; The Coronary Circulation; Ischemic Heart Disease	180
19.	Heart Sounds; Valvular and Congenital Heart Disease; Cardiac Failure	189
V	The Body Fluids and the Kidneys	
<hr/>		
20.	The Body Fluid Compartments: Extracellular and Intracellular Fluids and Edema.	201
21.	Urine Formation by the Kidneys	212
	<i>A. Glomerular Filtration, Renal Blood Flow, and Their Control, 212</i>	
	<i>B. Tubular Processing of the Glomerular Filtrate, 223</i>	
22.	Renal and Associated Mechanisms for Controlling the Body Fluids and Their Constituents	236
23.	Regulation of Acid-Base Balance; Micturition; Renal Disease	254
VI	Blood Cells, Immunity, and Blood Clotting	
<hr/>		
24.	Red Blood Cells, White Blood Cells, and Resistance of the Body to Infection.	275
25.	Immunity, Allergy, Blood Groups, and Transfusion	288
26.	Hemostasis and Blood Coagulation	299
VII	Respiration	
<hr/>		
27.	Pulmonary Ventilation and Pulmonary Circulation.	311
28.	Transport of Oxygen and Carbon Dioxide Between the Alveoli and the Tissue Cells	324
29.	Regulation of Respiration; and Respiratory Insufficiency	337
VIII	Aviation, Space, and Deep Sea Diving Physiology	
<hr/>		
30.	Aviation, Space, and Deep Sea Diving Physiology.	351
IX	The Nervous System: (A) Basic Organization; and Sensory Physiology	
<hr/>		
31.	Organization of the Nervous System; Basic Functions of Synapses and Transmitter Substances	363

32.	Sensory Receptors; Neuronal Circuits for Processing Information; Tactile and Position Senses.	376
33.	Pain, Headache, and Thermal Sensations	392
34.	The Eye: I. Optics of Vision; The Fluids of the Eye; Function of the Retina	400
35.	The Eye: II. Neurophysiology of Vision	415
36.	The Sense of Hearing; the Chemical Senses of Taste and Smell	427

X The Nervous System: (B) Motor and Integrative Neurophysiology

37.	The Spinal Cord and Brain Stem Reflexes; and Function of the Vestibular Apparatus.	441
38.	Control of Muscle Function by the Motor Cortex, the Basal Ganglia, and the Cerebellum	455
39.	The Cerebral Cortex and Intellectual Functions of the Brain	471
40.	Activation of the Brain; Wakefulness and Sleep; Behavioral Functions of the Brain	482
41.	The Autonomic Nervous System; Cerebral Blood Flow; and Cerebrospinal Fluid.	495

XI The Gastrointestinal Tract

42.	The Gastrointestinal Tract: Nervous Control, Movement of Food Through the Tract, and Blood Flow	511
43.	Secretory Functions of the Alimentary Tract	524
44.	Digestion and Absorption in the Gastrointestinal Tract; Gastrointestinal Disorders	537

XII Metabolism and Temperature Regulation

45.	Metabolism of Carbohydrates, and Formation of Adenosine Triphosphate	551
46.	Lipid and Protein Metabolism	560
47.	Energetics, Metabolic Rate, and Regulation of Body Temperature	571
48.	Dietary Balances, Regulation of Feeding, Obesity, and Vitamins	583

XIII Endocrinology and Reproduction

49.	Introduction to Endocrinology; The Pituitary Hormones	595
50.	The Thyroid Metabolic Hormones	607
51.	The Adrenocortical Hormones	616

52.	Insulin, Glucagon, and Diabetes Mellitus.	625
53.	Parathyroid Hormone, Calcitonin, Calcium and Phosphate Metabolism, Vitamin D, Bone, and Teeth	634
54.	Male Reproductive Functions; the Male Sex Hormones (and the Pineal Gland).	648
55.	Female Physiology before Pregnancy; and the Female Hormones	658
56.	Pregnancy; Lactation; and Fetal and Neonatal Physiology	670

XIV Sports Physiology

57.	Sports Physiology	687
	Index.	701
