

39 10

Table of Contents

Chapter 1	
Computational Aspects of the Protein-Folding Problem	1
<i>John M. Zachary and S. S. Iyengar</i>	
Chapter 2	
Distributed Genetic Algorithms on PARAM for Conformational Search.....	15
<i>V. Sundararajan and A. S. Kolaskar</i>	
Chapter 3	
A Genetic Coding Structure and Algorithms for Image Segmentation	27
<i>Guna S. Seetharaman</i>	
Chapter 4	
Cancer: A Challenge for Control Theory and Computer Modeling	49
<i>Werner Düchting, Waldemar Ulmer, and Thomas Ginsberg</i>	
Chapter 5	
A Model of HIV Infection and Its Blockers: From Complex to Simple.....	67
<i>John L. Spouge</i>	
Chapter 6	
Modeling of HIV Infection Kinetics.....	79
<i>Dimitar S. Dimitrov</i>	
Chapter 7	
Mathematical Models of Cell Cycles.....	101
<i>Kurt W. Kohn and Dimitar S. Dimitrov</i>	
Chapter 8	
Recent Advances in Modeling Stochastic Population Growth.....	125
<i>Thomas R. Kiffe and James H. Matis</i>	
Chapter 9	
A Reconstructability Analysis Approach to Biological Systems Modeling.....	135
<i>S. K. Trivedi, B. Jones, and S. S. Iyengar</i>	
Chapter 10	
Computer Simulation of Bimodal Neurons and Networks: Integrating Infrared and Visual Stimuli	163
<i>Terry L. Huntsberger and John R. Rose</i>	
Index	187
