

Preface	xi
----------------	-----------

1

RENAL FUNCTIONS, ANATOMY, AND BASIC PROCESSES	1
--	----------

Objectives	1
-------------------	----------

Functions	2
------------------	----------

Anatomy of the Kidneys and Urinary System	4
--	----------

The Nephron	6
--------------------	----------

The Renal Corpuscle	7
----------------------------	----------

The Tubule	8
-------------------	----------

Blood Supply to the Nephrons	11
-------------------------------------	-----------

Categories of Nephrons	13
-------------------------------	-----------

Nephron Heterogeneity	13
------------------------------	-----------

The Juxtaglomerular Apparatus	14
--------------------------------------	-----------

Renal Innervation	14
--------------------------	-----------

Introduction to Basic Renal Processes	14
--	-----------

Glomerular Filtration	14
------------------------------	-----------

Tubular Reabsorption and Tubular Secretion	16
---	-----------

Metabolism by the Tubules	19
----------------------------------	-----------

Intrarenal Chemical Messengers	20
---------------------------------------	-----------

Methods in Renal Physiology	20
------------------------------------	-----------

Notes	22
--------------	-----------

2

RENAL BLOOD FLOW AND GLOMERULAR FILTRATION	24
---	-----------

Objectives	24
-------------------	-----------

Flow, Resistance, and Pressure in the Kidneys	25
--	-----------

Glomerular Filtration	26
------------------------------	-----------

Formation of Glomerular Filtrate	26
---	-----------

Direct Determinants of GFR	28
-----------------------------------	-----------

K_f	30
-------------------------	-----------

P_{GC}	31
P_{BC}	33
Π_{GC}	33
Mean Arterial Pressure and Autoregulation	33
Renal Sympathetic Nerves	38
Reflexes Involving the Renal Sympathetic Nerves	39
Angiotensin II	41
Control of Renin Secretion	41
Intrarenal Baroreceptors	41
Macula Densa	41
Renal Sympathetic Nerves	43
Angiotensin II	44
Adaptive Value of Increased Renin Release	44
Prostaglandins	45
Other Factors	45
Notes	48

3

RENAL CLEARANCE **51**

Objectives	51
Measurement of GFR	51
Definition of Clearance	54
Basic Clearance Formula	55
Quantitation of Tubular Reabsorption and Secretion	
Using Clearance	57
Plasma Creatinine and Urea Concentrations as	
Indicators of GFR Changes	58
Notes	60

4

BASIC MECHANISMS OF TUBULAR REABSORPTION AND SECRETION **62**

Objectives	62
Classification of Transport Mechanisms	63
Diffusion	63
Facilitated Diffusion	63
Primary Active Transport	63
Secondary Active Transport (Cotransport and Countertransport)	64
Endocytosis	64
Solvent Drag	64

Transport Mechanisms in Reabsorption	64
Fluid Uptake by Peritubular Capillaries	69
Transport Maximum	71
Transport Mechanisms in Tubular Secretion	72
Bidirectional Transport	73
Regulation of Membrane Channels and Transporters	76
Tubular Division of Labor	77
Notes	77

5**RENAL HANDLING OF ORGANIC SUBSTANCES 79**

Objectives	79
Active Proximal Reabsorption of Organic Nutrients:	
Glucose, Amino Acids, etc.	79
Proteins and Peptides	80
Urea	82
Active Proximal Secretion of Organic Anions	82
Urate	84
Active Proximal Secretion of Organic Cations	84
Passive Reabsorption or Secretion of Weak	
Organic Acids and Bases	85
Notes	88

6**BASIC RENAL PROCESSES FOR SODIUM, CHLORIDE, AND WATER 89**

Objectives	89
Overview	91
Sodium Reabsorption	92
Chloride Reabsorption	94
Water Reabsorption	95
Individual Tubular Segments	97
Proximal Tubule	97
Henle's Loop	101
Distal Convoluted Tubule and Collecting-Duct System	102
Urinary Concentration: the Medullary Countercurrent Multiplier System	104
The Role of Interstitial Urea in Balancing Collecting-Duct Urea	109
Countercurrent Exchange: Vasa Recta	110
Summary	112
Notes	113

7

CONTROL OF SODIUM AND WATER EXCRETION: REGULATION OF PLASMA VOLUME AND OSMOLARITY 116

Objectives	116
Control of GFR in Response to Changes in Body Sodium Content and Extracellular Volume	120
Control of Tubular Sodium Reabsorption	120
Glomerulotubular Balance	122
Aldosterone	123
Control of Aldosterone Secretion	124
Peritubular-Capillary Starling Factors and the Role of Renal Interstitial Hydraulic Pressure	126
Direct Tubular Effects of Renal Sympathetic Nerves	129
Direct Tubular Effects of Angiotensin II	129
Pressure Natriuresis	130
Atrial Natriuretic Factor (ANF)	130
Antidiuretic Hormone	130
Other Hormones	131
Summary of the Control of Sodium Excretion	132
Abnormal Sodium Retention	133
Control of Water Excretion	134
Baroreceptor Control of ADH Secretion	135
Osmoreceptor Control of ADH Secretion	135
Thirst and Salt Appetite	139
Summary of the Effects of Angiotensin II	142
Notes	142

8

RENAL REGULATION OF POTASSIUM BALANCE 145

Objectives	145
Regulation of Internal Potassium Distribution	146
Basic Renal Mechanisms	147
Mechanism of Potassium Secretion in the Cortical Collecting Duct	149
Homeostatic Control of Potassium Secretion by the Cortical Collecting Duct	151
Potassium Secretion and Fluid Delivery to the Cortical Collecting Duct	154
Effects of Diuretics	154
ADH and Water Diuresis	157
The Effects of Acid-Base Changes on Potassium Secretion	157
Notes	160

9**RENAL REGULATION OF HYDROGEN-ION BALANCE****162****Objectives****162****Bicarbonate Excretion****166**

Bicarbonate Filtration and Reabsorption

167

Bicarbonate Secretion

170

Addition of New Bicarbonate to the Blood**(Renal Excretion of Hydrogen Ions)****171**Hydrogen-Ion Secretion and Excretion on
Urinary Buffers

172

Phosphate and Organic Acids as Buffers

173

Qualitative Integration of Bicarbonate Reabsorption
and Hydrogen-Ion Excretion on Nonbicarbonate
Buffers

174

Glutamine Catabolism and NH_4^+ Excretion

176

Quantitation of Renal Acid-Base Compensation**177****Homeostatic Control of Renal Acid-Base Compensation****178**Control of Renal Glutamine Metabolism and
 NH_4^+ Excretion

179

Control of Tubular Hydrogen-Ion Secretion

179

Control of Bicarbonate Secretion

181

Specific Categories of Acid-Base Disorders

181

Renal Compensation for Respiratory Acidosis
and Alkalosis

181

Renal Compensation for Metabolic Acidosis
and Alkalosis

182

**Factors Causing the Kidneys to Generate or Maintain
a Metabolic Alkalosis****183**

Influence of Extracellular-Volume Contraction

183

Influence of Chloride Depletion

184

Influence of Aldosterone Excess and Potassium
Depletion

184

Notes**186****10****REGULATION OF CALCIUM AND PHOSPHATE BALANCE****190****Objectives****190****Effector Sites for Calcium Homeostasis****191**

Gastrointestinal Tract

191

Kidneys

192

Bone

193

Hormonal Control of Effector Sites	194
Parathyroid Hormone	194
1,25-dihydroxyvitamin D ₃	196
Calcitonin	197
Other Hormones	197
Overview of Renal Phosphate Handling	198
Notes	199
Study Questions	201
Appendix A	
Table 1: Summary of Reabsorption and Secretion by Major Tubular Segments	217
Table 2: Major Functions of the Various Collecting-Duct Cells	218
Appendix B	
Classes of Diuretics	219
Suggested Readings	220
Index	231
