Device Cross Reference	5
Abstracts of Applications Documents	7
Applications Documents	
AN483B 15 to 60 Watt Audio Amplifiers Using Complementary Darlington Output Transistors	15
AN569 Transient Thermal Resistance — General Data and its Use	23
AN703 Designing Digitally-Controlled Power Supplies	39
AN737A Switched Mode Power Supplies: Highlighting a 5V 40A Inverter Design	49
AN784A Transient Power Capability of Zener Diodes	65
AN789 Characterizing the SCR for Crowbar Applications	67
AN803 The Effect of Emitter-Base Avalanching on High-Voltage Power Switching Transistors	79
AN828 The Effects of Base Drive Conditions on RBSOA	95
AN843 A Review of Transients and Their Means of Suppression	109
AN845 New Power Bipolars Compare Favourably with FETs for Switching Efficiency	121
AN860 Power MOSFETs versus Bipolar Transistors	127
AN861 Power Transistor Safe Operating Area: Special Considerations for Motor Drives	133
AN873 Understanding Power Transistor Dynamic Behaviour: dv/dt Effects on Switching RBSOA	141
AN875 Power Transistor Safe Operating Area: Special Considerations for Switching Power Supplies	145
AN876 Using Power MOSFETs in Stepping Motor Control	151
AN913 Designing with TMOS Power MOSFETs	157
AN914 SCR Turn-Off Characteristics	175
AN915 Characterizing Collector-to-Emitter and Drain-to-Source Diodes for Switchmode Applications	187
AN916 Applications of the MOC3031 and MOC3041 Zero-Crossing Triac Drivers	197
AN918 Paralleling Power MOSFETs in Switching Applications	205
AN920 Theory and Applications of the MC34063 and μ A78S40 Switching Regulator Control Circuits	217
AN929 Insuring Reliable Performance from Power MOSFETs	255
AN934 The GEMFET: A New Option for Power Control	261
AN938 Mounting Techniques for PowerMacro Transistor	269
AN951 Drive Optimization for 1.0kV Off-Line Converter Transistors	275
AN952 Ultrafast Recovery Rectifiers Extend Power Transistor SOA	281
AN954 A Unique Converter Configuration	287
AN964 Trigger Design Ideas for DIAC Replacements	291
AN976 A New High Performance Current Mode Controller Teams Up with Current Sensing Power MOSFETS	297
AN1040 Mounting Considerations for Power Semiconductors	305
AN1041 Mounting Procedures for Very High Power RF Transistors	325
AN1042 High Fidelity Switching Audio Amplifiers Using TMOS Power MOSFETs	327
AN1045 Series Triacs in AC High Voltage Switching Circuits	339
ANE402 130W Ringing Choke Power Supply Using TDA4601	349
ANE424 50W Current Mode Controlled Offline Switch Mode Power Supply Working over 50% Duty Cycle Using the UC3842A	371
AR120 Speeding Up the Very High Voltage Transistor	399

Contents (continued)

AR145	DPAK: The Power Package for Surface Mount Applications	405
AR157	Commutating SOA in Monolithic Freewheeling Diodes	409
AR159	A Unique Alternative to High Peak Power Switching Applications - The GTO	415
AR162	Paralleling High-Current Darlingtons	425
AR163	Bipolar Transistors Excel in Off-Line Resonant Converters	435
AR167	Current Sensing Power MOSFETs Simplify Current-Mode Control	441
AR169	Sense-Cell MOSFET Eliminates Losses in Source Circuit	447
AR170	Characterizing Overvoltage Transient Suppressors	457
AR174	Current-Mirror FETs Cut Costs and Sensing Losses	469
AR175	A Power FET SPICE Model From Data Sheet Specs	477
AR302	Thermal Management of Surface Mount Power Devices	483
AR303	Power FET SPICE Models Are Easy and Accurate	487
AR304	Power Transistor Packaging — Recent Developments Provide New Levels of Performance	493
AR322	High-Voltage Schottky Rectifiers for Power Conversion	499
AR323	Managing Heat Dissipation in DPAK Surface-Mount Power Packages	503
AR326	High-Voltage MOSFETs Simplify Flyback Design	509
EB85A	Full-Bridge Switching Power Supplies	515
EB91	The Use of Inverse-Parallel SCRs	517
EB124	MOSFETs Compete with Bipolars in Flyback Power Supplies	519
EB125	Testing Power MOSFET Gate Charge	521
TDT102	Two Integrated Circuit Drivers for Power MOSFETs	523
TDT103	Drive Considerations for Power MOSFETs	527
TDT104	Paralleling Power MOSFETs in a Very Fast High Voltage Current Switch	529
TDT105	Using the Motorola TMOS Designer's Data Sheet	533
