### Preface

ix

<b>1 Momentum transport</b>	1
<b>M1 Laminar boundary layer flow</b>	3
<b>M2 Unsteady laminar flow in a circular tube</b>	25
<b>M3 Nonlinear, front-sharpening convective systems</b>	55
<b>2 Heat transport</b>	87
<b>H1 Heat conduction in a semi-infinite system</b>	89
<b>H2 One-dimensional heat conduction</b>	107
<b>H3 Heat transfer in a circular fin</b>	135
<b>H4 The Graetz problem with constant wall heat flux</b>	167
<b>H5 The Graetz problem with constant wall temperature</b>	207
<b>H6 Heat exchanger dynamics</b>	289
<b>3 Mass transport</b>	327
<b>MA1 A dynamic mass transfer model</b>	329
<b>MA2 Mass transfer with simultaneous convection and diffusion</b>	370
<b>MA3 Transient multicomponent diffusion</b>	418
Appendix A Main program RKF45M to call ODE integrator RKF45	437
Appendix B Main program MEM and ODE integrator EULER.M	443
Appendix C Subroutine DSS024	449
<i>Index</i>	453
