List of illustrations	xiii
Acknowledgements	xv
1 Methods of investigating brain function	1
Introduction	1
Neuroanatomical techniques	1
<i>Electron microscopy</i>	2
<i>Chemical staining</i>	3
<i>Brain scans</i>	4
Neurophysiological techniques	5
<i>Lesioning</i>	6
<i>Brain stimulation</i>	6
<i>Recording methods</i>	7
<i>Neurochemical methods</i>	8
Chapter summary	9
2 The neuron	11
Introduction	11
The structure of the neuron	11
The neuronal membrane	13
The resting membrane potential	13

The action potential	14		
Neurotransmitters	16		
The synapse	18		
<i>Summation</i>	19		
<i>Autoreceptors</i>	20		
Chapter summary	20		
3 Organisation of the central nervous system		23	
Introduction	23		
Divisions of the mammalian nervous system	24		
The spinal cord	25		
The brain	25		
<i>Hindbrain</i>	28		
<i>Midbrain</i>	28		
<i>Forebrain</i>	30		
Functions of the CNS	34		
<i>Arousal</i>	35		
<i>Emotion</i>	35		
<i>Language</i>	35		
Chapter summary	36		
4 The autonomic nervous system		39	
Introduction	39		
Structure of the ANS	39		
<i>Sympathetic and parasympathetic branches</i>	39		
<i>Anatomy of the ANS</i>	40		
Central control of the ANS	41		
Functions of the ANS	42		
<i>'Executive stress' and the formation of ulcers</i>	42		
<i>Fight or flight</i>	44		
Chapter summary	45		
5 The endocrine system		47	
Introduction	47		
Hormone release by the endocrine system	48		
<i>The hypothalamus and pituitary gland</i>	48		
<i>Glandular hormones</i>	50		
Feedback mechanisms	54		
Functions of the endocrine system	56		
<i>Endocrine reactions to stress</i>	56		
<i>Endocrine control of the menstrual cycle</i>	57		
<i>Other aspects of sexual behaviour</i>	57		
Chapter summary	58		
6 Homeostasis			61
Introduction	61		
What is homeostasis?	62		
Temperature regulation	63		
<i>Control mechanisms of temperature regulation</i>	63		
<i>Behavioural changes in anticipation of temperature requirements</i>	64		
Eating	64		
<i>Metabolism</i>	64		
<i>Hunger</i>	65		
<i>The glucostatic hypothesis</i>	66		
<i>The lipostatic theory</i>	67		
<i>The ischymetric hypothesis</i>	68		
<i>Satiety</i>	68		
<i>Summary of eating mechanisms</i>	70		
Drinking	70		
<i>Water compartments</i>	70		
<i>Osmotic thirst</i>	72		
<i>Volumetric thirst</i>	73		
<i>Drinking satiety</i>	74		
<i>Summary of drinking mechanisms</i>	75		
Chapter summary	75		
7 How drugs affect the brain			79
Introduction	79		
Types of effect that could occur	80		
Possible sites for drug effects	81		
Examples of drugs and their synaptic effects	83		
<i>Diazepam</i>	83		
<i>Alcohol</i>	84		
Chapter summary	84		
8 Classifying psychoactive drugs			87
Introduction	87		

CONTENTS

Sedative hypnotics	88
Stimulants	89
Opiate narcotics	91
Hallucinogens and psychedelics	92
Antipsychotic tranquillisers	93
Tolerance, dependence and withdrawal	94
<i>Tolerance</i>	95
<i>Dependence and withdrawal</i>	95
Chapter summary	96

9 Drugs and behaviour **99**

Introduction	99
Depression and the antidepressants	99
<i>Types of depression</i>	100
<i>Features of depression</i>	100
<i>The monoamine theory of depression</i>	101
<i>Drug treatments of depression</i>	101
Schizophrenia and the antipsychotics	103
<i>Features of schizophrenia</i>	103
<i>The dopamine hypothesis of schizophrenia</i>	104
<i>The serotonin link</i>	105
<i>Drug therapies of schizophrenia</i>	105
<i>The treatment of manic depression</i>	106
Chapter summary	106

10 Study aids **109**

Improving your essay writing skills	109
<i>Practice essay 1</i>	110
<i>Practice essay 2</i>	112
<i>Practice essay 3</i>	114
Key research summary	117

Glossary	119
Bibliography	131
Index	137
