TABLE OF CONTENTS

INTRODUCTION

OUTLINE OF SYLLABUS

SECTION I PRINCIPLES AND APPLICATIONS OF ELECTROPHORESIS AND IMMUNOELECTROPHORESIS ... 1

Application 3
Stabilizing Media Electrophoresis 3
Molecular Sieve Methods 5
Immunoelectrophoresis 6
Discussion 7

SECTION II TECHNIQUES AND APPLICATIONS

1. Agar-Gel Electrophoresis 12
2. Cellulose Acetate Electrophoresis 18
3. Acrylamide Electrophoresis 24
4. Immunoelectrophoresis 35
5. Semi-Automated Immunoelectrophoresis 58
6. Analytical Agar-Gel Electrophoresis 67

SECTION III SPECIFIC APPLICATIONS FOR THE DIAGNOSTIC LABORATORY

1. Immunochemical Characterization of Gammopathies 71
   A. Qualitative Studies 71
   B. Quantitative Analysis of Immunoglobulin 84
2. Hemoglobin Electrophoresis 86
3. LDH Isoenzyme Electrophoresis 93
4. Alkaline Phosphatase Isoenzymes 101
5. Electrophoretic Identification of Myoglobin 108
6. Electrophoretic Characterization of Lipoprotein Phenotypes 111
7. Spinal Fluid and Urine Electrophoresis 115
8. Immunochemical Characterization of Complement C'3 (B_1C) 121
9. Screening for $Alpha_1$ Antitrypsin Deficiency 124
