Preface	xi
The team that wrote this redbook	xii
Notice	xiv
Comments welcome	xiv
Chapter 1. WebSphere Application Server roadmap	1
1.1 WebSphere Application Server	2
1.2 Various WebSphere Application Server environments	3
1.2.1 Why do we need separate environments	3
Chapter 2. Understanding the WebSphere family	7
2.1 The WebSphere family	8
2.2 WebSphere: The architecture	8
2.3 WebSphere platform architecture	9
2.4 Foundation and Tools	10
2.4.1 IBM WebSphere Application Server V4.0 Advanced Edition	11
2.4.2 WebSphere Application Server V4.1 Enterprise Edition	12
2.4.3 WebSphere Application Server, V5.0	12
2.4.4 WebSphere Application Server Enterprise, V5.0	16
2.4.5 WebSphere Application Server - Express, V5.0	16
2.4.6 WebSphere Application Server for z/OS, V5.0	17
2.4.7 WebSphere Studio	18
2.4.8 Host Access	19
2.5 Reach and User Experience	20
2.5.1 Reach and User Experience: WebSphere Commerce	21
2.5.2 Reach and User Experience: WebSphere Portal	22
2.5.3 Reach and User Experience: Pervasive	23
2.6 Business Integration	26
2.6.1 Business Integration: Process Integration	27
2.6.2 Business Integration: Application Connectivity	32
2.7 Transaction Servers and Tools	35
2.7.1 Transaction Servers and Tools: Enterprise Modernization	35
2.7.2 Transaction Servers and Tools: transaction processing	37
2.7.3 Transaction Servers and Tools: traditional tools	37
2.8 Distributed computing and WebSphere Application Server	39
2.8.1 Three-tiered client/server computing	39

2.8.2	Transactions	41
2.8.3	Security	42
2.9	Competitive comparison	43
Chapter 3. IBM and ISV e-business applications and offerings		45
3.1	Setting the stage and foundation for stages of e-business adoption.	46
3.1.1	Whole Product Concept	47
3.1.2	Business scenario: Getting started in e-business	48
3.1.3	Business scenario: Dynamic e-business.	49
3.1.4	Business scenario: High-volume Web site	50
3.1.5	Business scenario: High-volume Web site for z/OS	51
3.1.6	Business scenario: Enhancing your e-business with Web services .	52
3.1.7	Business scenario: Enterprise modernization/integration	54
3.1.8	Business scenario: Enhance ROI through improved programmer productivity	55
3.1.9	Business scenario: Gain flexibility to compete in the dynamic e-business environment	57
3.1.10	Business scenario: Rational offering- liberated development.	57
3.1.11	Business scenario: Accelerating and simplifying enterprise application development.	58
3.2	IBM PartnerWorld for Software	59
3.3	Developer partnership programs.	60
3.3.1	PartnerWorld for Developers (PWD).	61
3.3.2	developerWorks: Outreach to individual developers.	62
3.4	Global Solutions Directory.	64
Chapter 4. Planning considerations		67
4.1	Assessment.	68
4.2	Do you need a development environment?	68
4.2.1	Build a staging/test environment	69
4.3	Build and implement the solution	70
4.3.1	IBM @server solutions	70
4.3.2	Why IBM platforms for the e-business infrastructure?	77
4.3.3	IBM @server xSeries	77
4.3.4	IBM @server pSeries	78
4.3.5	IBM @server iSeries	78
4.3.6	IBM @server zSeries	79
4.3.7	Requests for sizing and capacity planning	80
4.3.8	IBM @server planning, installation and configuration tools	81
4.3.9	Operating systems	82
4.3.10	Web servers	83
4.3.11	Databases	84
4.3.12	Third-party JDBC driver managers	85

4.3.13	Web browsers	86
4.3.14	Java	87
4.3.15	Java specifications	88
4.3.16	XML/XSL	89
4.3.17	MQSeries	89
4.3.18	Security	90
4.3.19	WebSphere Application Server Advanced Edition hardware and software requirements	91
4.3.20	WebSphere Application Server Enterprise Edition hardware and software requirements	95
4.3.21	IBM MQSeries V5.2.1 (WebSphere MQ)	96
4.3.22	MA88: MQSeries classes for Java and MQSeries classes for Java Message Service requirements	98
4.3.23	IBM MQSeries Integrator (WebSphere MQ Integrator)	99
4.3.24	IBM MQSeries Workflow (WebSphere MQ Workflow)	101
4.3.25	IBM development server hardware and software prerequisites	103
4.3.26	IBM staging server hardware and software prerequisites	105
4.4	WebSphere Application Server performance tools	106
4.5	Security	108
4.6	System management	108
4.6.1	IBM Tivoli Monitoring for Web Infrastructure	108
4.6.2	IBM Tivoli Storage Manager for Application Servers	109
4.6.3	IBM Tivoli Access Manager for Business Integration	109
4.6.4	IBM Tivoli Access Manager for e-business	110
4.6.5	IBM Tivoli Web Site Analyzer	111
Chapter 5. Skills planning and education		115
5.1	Installers and system administrators	116
5.2	Application developers and system architects	117
5.3	Developing solutions for e-business	117
5.3.1	Course roadmaps	117
Chapter 6. Build your WebSphere development environment		125
6.1	Development environment setup	126
6.1.1	Software used for our development environment	126
6.1.2	Hardware used for our development environment	126
6.2	WebSphere Studio Application Developer Integration Edition installation	126
6.2.1	Starting the WebSphere Studio Application Developer Integration Edition	133
6.3	IBM DB2 Personal Developer Edition installation	135
6.3.1	Updating DB2 to latest FixPak	143
6.3.2	Configure DB2	149
6.4	Install IBM MQSeries classes for Java and MQSeries classes for Java	

Message Service ⁴	151
6.4.1 Configure SupportPac MA88	158
6.5 Sample application	159
6.5.1 Create POENTRY queue	159
6.5.2 Create WebSphere Studio Application Developer projects	160
6.5.3 Coding WSADMQDemoWeb application	163
6.5.4 Setting up environment variables for WSADMQDemoWeb	191
6.5.5 Configuring the WebSphere Application Server in WebSphere Studio Application Developer	194
6.5.6 Running the application	198
6.5.7 Exporting the demo application to an .ear file	199
Chapter 7. Build your WebSphere staging environment	201
7.1 Staging environment setup	202
7.1.1 Software used for our staging environment	203
7.1.2 Hardware used in our development environment	203
7.2 DB2 Universal Database Enterprise Edition V7.2 installation	203
7.2.1 DB2 FixPak installation	211
7.2.2 Verifying the database is running	215
7.3 WebSphere Application Server V4.0 Advanced Edition installation	215
7.3.1 Pre-installation tasks	216
7.3.2 Installing WebSphere Application Server V4.0.1 Advanced Edition	217
7.3.3 Installing FixPak for WebSphere Application Server V4.0 Advanced Edition (PTF2)	224
7.3.4 Configuring WebSphere service for auto start on reboot	228
7.4 WebSphere Application Server V4.1 Enterprise Edition installation	229
7.5 IBM MQSeries V5.2.1 (WebSphere MQ) installation	233
7.5.1 Pre-installation tasks	234
7.5.2 Installing MQSeries V5.2.1	234
7.5.3 Post installation task	253
7.5.4 Installing SupportPac MA88 (MQSeries Class for Java and JMS)	259
7.6 MQSeries Workflow V3.3.2 (WebSphere MQ Workflow) installation	264
7.6.1 Configuring MQSeries Workflow	272
7.7 WebSphere MQ Integrator V2.1 installation	290
7.7.1 Installing CSD 00 (FPU200167) for MQ Integrator V2.1	295
7.7.2 Configuring the databases for MQ Integrator V2.1	298
7.7.3 Creating and configuring Configuration Manager and Broker	302
7.7.4 Autostarting Broker and Configuration Manager on reboot	310
7.7.5 Configuring WebSphere MQ Integrator V2.1	311
7.8 Creation of the POENTRY queue	318
7.9 Configuring the sample application in our WebSphere Application Server staging environment	318
7.9.1 Running the sample application	329

Chapter 8. Build your WebSphere production environment	331
8.1 Software used in our production environment	332
8.2 Hardware used in our production environment	332
8.3 IBM DB2 UDB V7.2 Enterprise Edition installation	332
8.3.1 Updating DB2 to latest FixPak	347
8.3.2 Post-installation tasks	351
8.4 IBM WebSphere Application Server V4.0 Advanced Edition installation	352
8.4.1 Pre-installation tasks	352
8.4.2 Installing IBM WebSphere Application Server V4.0	353
8.4.3 Installing IBM WebSphere Application Server FixPak	360
8.4.4 Post installation setup	362
8.5 IBM WebSphere Application Server V4.1 Enterprise Edition - Enterprise Services installation	368
8.6 IBM MQSeries V5.2 (WebSphere MQ) installation	372
8.6.1 Post installation tasks	372
8.7 IBM WebSphere MQ Integrator V2.1 installation	374
8.7.1 Pre-installation tasks	374
8.7.2 Installing WebSphere MQ Integrator	374
8.7.3 Install FixPak	375
8.7.4 Post installation configuration	376
8.8 IBM MQSeries Workflow V3.3.2 installation	378
8.8.1 Pre-installation	378
8.8.2 Install IBM MQSeries Workflow	380
8.8.3 Configure MQSeries Workflow	380
8.8.4 Install MQSeries Java classes	387
8.9 Deploying and testing the demo application	388
8.9.1 Starting the demo application	393
8.9.2 Create a queue	395
8.9.3 Running the application	395
 Appendix A. Additional material	 397
Locating the Web material	397
Using the Web material	397
System requirements for downloading the Web material	398
How to use the Web material	398
