

Neural Networks and Artificial Intelligence for Biomedical Engineering

Hudson, Donna L.

ISBN: 9780470545355

Overview

Part I Neural Networks

Foundations of Neural Networks

Biological Foundations of Neural Networks

Early Neural Models

Precursor to Current Models: Pattern Classification

Resurgence of the Neural Network Approach

Basic Concepts

Summary

References.

Classes of Neural Networks

Basic Network Properties

Classification Models

Association Models

Optimization Models

Self-Organization Models

Radial Basis Functions (RBFs)

Summary

References.

Classification Networks and Learning

Network Structure

Feature Selection

Types of Learning

Interpretation of Output

Summary

References

Supervised Learning

Decision Surfaces

Two-Category Separation, Linearly Separable Sets

Nonlinearly Separable Sets

Multiple Category Classification Problems

Relationship to Neural Network Models

Comparison of Methods

Applications

Summary

References

Unsupervised Learning
Background
Clustering
Kohonen Networks and Competitive Learning
Hebbian Learning
Adaptive Resonance Theory (ART)
Applications
Summary
References

Design Issues
Introduction
Input Data Types
Structure of Networks
Implications of Network Structures
Choice of Learning Algorithm
Summary
References

Comparative Analysis
Introduction
Input Data Considerations
Supervised Learning Algorithms
Unsupervised Learning
Network Structures
Interpretation of Results
Summary
References.

Validation and Evaluation
Introduction
Data Checking
Validation of Learning Algorithm
Evaluation of Performance
Summary
References.

Part II Artificial intelligence

Foundations of Computer Assisted Decision Making

Motivation for Computer-Assisted Decision Making
Databases and Medical Records
Mathematical Modeling and Simulation
Pattern Recognition
Bayesian Analysis
Decision Theory
Symbolic Reasoning Techniques
Summary
References

Knowledge representation
Production Rules
Frames
Databases
Predicate Calculus and Semantic Nets
Temporal Data Representations
Summary
References

Knowledge Acquisition
Introduction
Expert Input
Learned Knowledge
Meta-Knowledge
Knowledge Base Maintenance
Summary
References

Reasoning Methodologies
Introduction
Problem Representations
Blind Searching
Ordered Search
AND/OR Trees
Searching Game Trees
Searching Graphs
Rule Base Searching
Higher-Level Reasoning Methodologies
Examples in Biomedical Expert Systems
Summary
References

Validation and Evaluation
Introduction
Algorithmic Evaluation
Knowledge Base Evaluation
System Evaluation
Summary
References.

Part III Alternative Approaches

Genetic Algorithms
Foundations
Representation Schemes
Evaluation Functions
Genetic Operators
Evolution Strategies
Biomedical Examples
Summary
References

Probabilistic Systems
Introduction
Bayesian Approaches
Parameter Estimation
Discriminant Analysis
Statistical Pattern Classification
Unsupervised Learning
Regression Analysis
Biomedical Applications
Summary
References.

Fuzzy Systems
Introduction
Fuzzy Information
Fuzzy Neural Networks
Fuzzy Approaches for Supervised Learning Networks
Fuzzy Generalizations of Unsupervised Learning Methods
Reasoning with Uncertain Information
Pre-Processing and Post-Processing Using Fuzzy Techniques
Applications in Biomedical Engineering
Summary
References

Hybrid Systems
Hybrid Systems Approaches
Components of Hybrid Systems
Use of Complex Data Structures
Design Methodologies
Summary
References.

HyperMerge, A Hybrid Expert System
Introduction
Knowledge-Based Component
Neural Network Component
Analysis of Time Series Data
Combined System
Application: Diagnosis of Heart Disease
Summary
References.

Future Perspectives
Introduction
Effects of Hardware Advances
Effects of Increase in Knowledge
The Future of Software
References

Index
About the Authors
