

Medical nanotechnology and nanomedicine

Tibbals, Harry F

ISBN: 9781439808740

Part I: Perspectives

Nanomedicine: Scientific Basis and Societal Implications

Medicine

Nanotechnology

What Is Nanoscience and Where Does It Fit in the Sciences?

Origins of Nanotechnology

Molecular and Cell Biology and Protein Bioscience: A Model of Life as Organic

Nanomachinery

Nanotechnology Leads to a Fundamentally New Approach to Engineering Design

Societal and Economic Impacts

Impact of Nanotechnology on Medicine

The Grand Challenge of Nanotechnology

Some Definitions and Nanomedical Areas of Emphasis

Healthcare Crisis: How Can Nanotechnology Contribute to a Solution?

Historical Perspectives and Technological Breakthroughs

Brief Highlights of Nanomedicine History

Medical Milestones

Emerging National and Global Nanomedicine Initiatives

Some Developments in Nanomedicine

Current Examples of Nanomedicine in Practice and Research

NIH Nanomedicine Initiative

Putting Medical Nanoscience into Practice: Medical Nanotechnology and

Nanomedicine

Part II: Beginnings of Medical Nanotechnology

Nanomedicine: Proposals and Promise

Introduction and Overview

Impacts of Nanotechnology on Medicine

An Overview of the Architecture of Medical Nanotechnology and Nanomedicine

Nanoscience: Bridging the Gap between Biochemistry and Cell Biology

Medication: Nanoparticles for Imaging and Drug Delivery

Introduction: The Emergence of Nanotechnology Applications in Medicine

Nanoparticles for Medical Imaging

Nanoparticles for Targeted Imaging and Delivery of Energy

Nanoparticles for Delivery of Drugs

Some Therapeutic Application Areas for Nanoparticles Theranostics

Conclusion: Nanomedicines Have a Broad Impact Throughout Medicine

Intervention: Nanotechnology in Reconstructive Intervention and Surgery
Nanoengineered Materials in Surgical and Restorative Applications
Bridging the Gap between Drugs and Surgery with Endoscopic MEMS
Robotics in Surgery: The Technology
Robotics in Surgical Practice
Recent Advances and Emerging Technologies in Surgical and Endoscopic Navigation
Summary of Translational Development of Nanoengineered Regenerative Tissue Therapy
Regeneration: Nanomaterials for Tissue Regeneration
Introduction: The Role of Nanotechnology in Tissue Regeneration
Biomaterials for Tissue Regeneration
Nanotechnology and Tissue Engineering
Tissue Engineering for Nerve Regeneration
Nanotechnology for Regeneration of the Brain
Use of Nanoengineered Scaffolding with Cells for Central Nervous System Regeneration
New Developments in Cell Therapy Accelerated by Nanoscience and Nanotechnology
Conclusion: Toward Clinical Therapies Based on Integrated Medical Nanoscience
Restoration: Nanotechnology in Tissue Replacement and Prosthetics
Nanoscale Biomaterials and Technologies for Tissue Engineering
Application of Tissue Engineering in Medicine
Nanotechnology and Prosthetics
Summary of Nanoengineered Restorative Tissue Engineering and Prosthetics
Diagnosis: Nanosensors in Diagnosis and Medical Monitoring
Sensors: Nanotechnology-Driven Advances in Diagnostic and Monitoring Technology
Technologies for Genomics and Proteomics
Applied Genomics and Proteomics: From Personalized Medicine to Global Epidemiology
Real-Time and In Vivo Medical Monitoring

Part III: Future Directions and Transformations

Thesis, Antithesis, Synthesis: Integrated Biomolecular Nanoscience
Maturation of Medical Nanotechnologies
Continued Impacts of Nanotechnology—Driven Capabilities
Nanotechnologies in Translation from Research
Indirect Impacts of Nanotechnology-Enabled Systems on Practice
Translation of Medical Nanotechnologies into Clinical Practice
Challenging Boundaries: Life and Material, Self and Environment
Nanotechnology and Medicine: A Powerful Confluence

Historical Origins of Medical Traditions

Knowledge of the Genome

Replacement Parts for the Body

Augmentation of Human Characteristics and Abilities

Extension of Life

Issues with Transplanted Cells for Regeneration

Medicalization of Normal Conditions

Other Boundaries Yet More Weird

Sustainability and Future Choices for Societies

Nanotechnology and Medicine as a Socioeconomic Activity

Questions of Change

Index
