

## **Principles of Molecular Virology, 5th Edition**

Cann, A.

ISBN: 9780123849397

### **Chapter 1 Introduction**

Viruses are Distinct from Living Organisms

The History of Virology

Living Host Systems

Cell Culture Methods

Serological/Immunological Methods

Ultrastructural Studies

'Molecular Biology'

Further Reading

### **Chapter 2 Particles**

The Function and Formation of Virus Particles

Capsid Symmetry and Virus Architecture

Helical capsids

Icosahedral (isometric) capsids

Enveloped Viruses

Complex Virus Structures

Protein-Nucleic Acid Interactions and Genome Packaging

Virus Receptors - Recognition and Binding

Other Interactions of the Virus Capsid with the Host Cell

Summary

Further Reading

### **Chapter 3 Genomes**

The Structure and Complexity of Virus Genomes

Molecular Genetics

Virus Genetics

Virus Mutants

Types of mutant virus

Suppression

Genetic Interactions between Viruses

Non-genetic Interactions between Viruses

'Large' DNA Genomes

'Small' DNA Genomes

Positive-Strand RNA Viruses

Negative-Strand RNA Viruses  
Segmented and Multipartite Virus Genomes  
Reverse Transcription and Transposition  
Evolution and Epidemiology  
Summary  
Further Reading

#### **Chapter 4 Replication**

Overview of Virus Replication  
Investigation of Virus Replication  
The Replication Cycle  
Summary  
Further Reading

#### **Chapter 5 Expression**

Expression of Genetic Information  
Control of Prokaryote Gene Expression  
Control of Expression in Bacteriophage  $\phi$   
Control of Eukaryote Gene Expression  
Genome Coding Strategies  
Transcriptional Control of Expression  
Post-Transcriptional Control of Expression  
Summary  
Further Reading

#### **Chapter 6 Infection**

Virus Infections of Plants  
Immune Responses to Virus Infections in Animals  
Virus-Host Interactions  
The Course of Virus Infections  
Prevention and Therapy of Virus Infection  
Virus Vectors and Gene Therapy  
Chemotherapy of Virus Infections  
Summary  
Further Reading

#### **Chapter 7 Pathogenesis**

Mechanisms of Cellular Injury  
Viruses and Immunodeficiency

Virus-Related Diseases

Bacteriophages and Human Disease

Cell Transformation by Viruses

Viruses and Cancer

New and Emergent Viruses

Zoonoses

Bioterrorism

Summary

Further Reading

**Chapter 8 Subviral Agents: Genomes Without Viruses, Viruses Without Genomes**  
Satellites and Viroids

Prions

Summary

Further Reading

Appendix 1 Glossary and Abbreviations

Appendix 2 Classification of Subcellular Infectious Agents

Appendix 3 The History of Virology

Index
