Preface	xiii
1 Introduction	1
1.1 What is HPLC?	1
1.2 Comparison between high-performance liquid chromatography and gas chromatography	2
1.3 Liquid chromatography separation modes	4
1.4 Apparatus for HPLC	6
1.5 Safety in the HPLC area	6
1.6 Pressure units	7
1.7 Length units	8
1.8 Bibliography on HPLC	8
2 Theoretical principles	15
2.1 The chromatographic process	15
2.2 Band broadening	17
2.3 The chromatogram and its uses	20
2.4 Factors affecting resolution	27
2.5 Extra-column volumes (dead volumes)	31
2.6 Tailing	33
2.7 Peak capacity	37
2.8 Effect of temperature in HPLC	38
2.9 Limits of HPLC	39
3 Pumps	44
3.1 Gas-driven discontinuous displacement systems	44
3.2 Discontinuous displacement pumps	45
3.3 Membrane pumps (membrane piston pumps)	46
3.4 Short-stroke piston pumps	47
3.5 Pneumatic amplifier pumps	48

4 Preparation of equipment up to sample injection	50
4.1 Selection of mobile phase	50
4.2 Preparation of mobile phase	51
4.3 Gradient systems	54
4.4 Tubing, manometers and pulse dampers	55
4.5 Sample injectors	57
4.6 Sample solution and sample volume	60
5 Detectors	63
5.1 General	63
5.2 UV detectors	67
5.3 Refractive index detectors	70
5.4 Fluorescence detectors	73
5.5 Electrochemical (amperometric) detectors	73
5.6 Other detectors	75
5.7 Multiple detection	76
5.8 Indirect detection	77
6 Columns and stationary phases	79
6.1 Columns for HPLC	79
6.2 Pre-columns	81
6.3 General information on column packings	81
6.4 Silica gel	83
6.5 Chemically modified silica gel	85
6.6 Styrene-divinylbenzene	87
6.7 Some other stationary phases	89
7 Column packing and regeneration	93
7.1 Packing	93
7.2 Column regeneration	97
7.3 Column emptying	99
8 HPLC column tests	100
8.1 Simple tests for HPLC columns	100
8.2 Determination of particle size	102
8.3 Determination of breakthrough time	103
8.4 The test mixture	104
8.5 Dimensionless values for HPLC column characterization	107
8.6 Van Deemter equation from reduced values and its use in column diagnosis	109
8.7 Calculation of diffusion coefficients	110
8.8 Appendix: Diffusion coefficients of macromolecules	112
9 Adsorption chromatography	114
9.1 What is adsorption?	114

9.2	The eluotropic series	116
9.3	Choice of mobile phase	117
9.4	Optimization of mobile phase	120
9.5	Use of deactivators	124
9.6	Change of mobile phase	128
9.7	Applications	130
10	Reversed-phase chromatography	132
10.1	Principle	132
10.2	Mobile phases in reversed-phase chromatography	134
10.3	Special selectivity effects from ternary solvent mixtures	136
10.4	Selectivity triangle in reversed-phase chromatography	136
10.5	Stationary phases	137
10.6	Applications	139
10.7	Hydrophobic interaction chromatography	141
11	Liquid-liquid partition chromatography	144
11.1	Principle	144
11.2	Phase systems	144
11.3	Support materials	145
11.4	Column preparation	145
11.5	Liquid-liquid partition chromatography in practice	148
11.6	Applications	150
12	Chromatography with chemically bonded phases	151
12.1	Introduction	151
12.2	Properties of some stationary phases	151
12.3	Prospects	156
13	Ion-exchange chromatography	157
13.1	Introduction	157
13.2	Principle	157
13.3	Types of ion exchanger	158
13.4	Influence of the mobile phase	161
13.5	Special possibilities of ion exchange	162
13.6	Practical hints	164
13.7	Applications	168
14	Ion-pair chromatography	169
14.1	Introduction	169
14.2	Ion-pair chromatography in practice	170
14.3	Applications	172
14.4	Appendix: UV detection using ion-pair reagents	172

15 Ion chromatography	175
15.1 Introduction	175
15.2 Ion chromatography in practice	176
15.3 Conductivity detection with chemical suppression (dual-column ion chromatography)	176
15.4 Conductivity detection with electronic suppression (single-column ion chromatography)	178
15.5 Indirect UV detection	180
16 Size-exclusion chromatography	182
16.1 Principle	182
16.2 The calibration chromatogram	185
16.3 Molecular mass determination by means of size-exclusion chromatography	187
16.4 Coupled size-exclusion columns	189
16.5 Phase systems	190
16.6 Applications	191
17 Affinity chromatography	195
17.1 Principle	195
17.2 Affinity chromatography as a special case of HPLC	196
17.3 Applications	197
18 Choice of method	200
19 Solving the elution problem	205
19.1 The elution problem	205
19.2 Solvent gradients	206
19.3 Column coupling	209
19.4 Optimization of an isocratic chromatogram using four solvents	211
19.5 Optimization of other parameters	213
19.6 Mixed stationary phases	217
20 Analytical HPLC	218
20.1 Qualitative analysis	218
20.2 Trace analysis	219
20.3 Quantitative analysis	221
20.4 Peak-height and peak-area measurement for quantitative analysis	223
20.5 Derivatization	230
20.6 Special detection possibilities	232
20.7 Unexpected peaks: ghost and system peaks	235

20 Preparative HPLC	236
20.1 Problem	236
20.2 Preparative HPLC in practice	236
20.3 Overloading effects	239
20.4 Sampling	242
20.5 Recycling	243
20.6 Displacement chromatography	244
21 Separation of enantiomers	246
21.1 Introduction	246
21.2 Chiral mobile phases	248
21.3 Chiral liquid stationary phases	249
21.4 Chiral solid stationary phases	250
22 New prospects	254
22.1 Micro and capillary HPLC	254
22.2 High-speed and super-speed HPLC	256
22.3 HPLC with supercritical mobile phases	260
23 Review papers on the separation of individual classes of compounds	263
24 Commercially available stationary phases for HPLC	269
24.1 Porous layer bead adsorbents	269
24.2 Silica gels	270
24.3 Aluminas	272
24.4 Other adsorbents	272
24.5 Non-polar phases chemically bonded to silica (reversed phases)	273
24.6 Medium-polar phases chemically bonded to silica	277
24.7 Porous layer bead ion exchangers (PLBs)	280
24.8 Anion exchangers on silica	280
24.9 Cation exchangers on silica	281
24.10 Anion exchangers on styrene-divinylbenzene	282
24.11 Cation exchangers on styrene-divinylbenzene	283
24.12 Ion chromatography phases	283
24.13 Stationary phases for size-exclusion chromatography ..	285
24.14 Affinity chromatography phases	286
24.15 Special phases for biopolymer separations	287
24.16 Special phases for sugar separations	290
24.17 Phases for special compounds	291
24.18 Chiral phases	293
24.19 List of manufacturers	296

Index of separations	303
Index	305
