General aspects in classification and data analysis

Classification and Clustering: Problems for the Future <i>H.H. Bock</i>	3
From classifications to cognitive categorization: the example of the road lexicon <i>D. Dubois, D. Fleury</i>	25
A review of graphical methods in Japan—from histogram to dynamic display <i>M. Mizuta</i>	36
New Data and New Tools: A Hypermedia Environment for Navigating Statistical Knowledge in Data Science <i>N. Ohsumi</i>	45
On the logical necessity and priority of a monothetic conception of class, and on the consequent inadequacy of polythetic accounts of category and categorization <i>J.P. Sutcliffe</i>	55
Research and Applications of Quantification Methods in East Asian Countries <i>Y. Tanaka, T. Tarumi, M.-H. Huh</i>	64

Section 1: Methodological aspects of classification

1.1 Dissimilarity analysis, hierarchical and tree-like classification

Algorithms for a geometrical P.C.A. with the L_1 -norm <i>M. Benayade, B. Fichet</i>	75
Comparison of hierarchical classifications <i>T. Benkaraache, B. Van Cutsem</i>	85
On quadripolar Robinson dissimilarity matrices <i>F. Critchley</i>	93
An Ordered Set Approach to Neutral Consensus Functions <i>G.D. Crown, M.F. Janowitz, R.C. Powers</i>	102
From Apresjan Hierarchies and Bandelt-Dress Weak hierarchies to Quasi-hierarchies <i>J. Diatta, B. Fichet</i>	111
Spanning trees and average linkage clustering <i>A. Guénoche</i>	119
Adjustments of tree metrics based on minimum spanning trees <i>B. Leclerc</i>	128
The complexity of the median procedure for binary trees <i>F.R. McMorris, M.A. Steel</i>	136

1.2 Probabilistic and statistical approaches for clustering

A multivariate analysis of a series of variety trials with special reference to classification of varieties <i>T. Caliński, S. Czajka, Z. Kaczmarek</i>	141
---	-----

Quality control of mixture. Application: The grass <i>P. Trcourt</i>	149
Mixture Analysis with Noisy Data <i>M.P. Windham, A. Cutler</i>	155
Locally optimal tests on spatial clustering <i>W. Vach</i>	161

1.3 Assessment of classifications and the number of clusters

Choosing the Number of Clusters, Subset Selection of Variables, and Outlier Detection in the Standard Mixture-Model Cluster Analysis <i>H. Bozdogan</i>	169
An examination of procedures for determining the number of clusters in a data set <i>A. Hardy</i>	178
The gap test: an optimal method for determining the number of natural classes in cluster analysis <i>J.-P. Rasson, T. Kubushishi</i>	186

1.4 Clustering methods and computational aspects

Mode detection and valley seeking by binary morphological analysis of connectivity for pattern classification <i>C. Botte-Lecocq, J.-G. Postaire</i>	194
Interactive Class Classification Using Types <i>C. Capponi</i>	204
K-means clustering in a low-dimensional Euclidean space <i>G. De Soete, J.D. Carroll</i>	212
Complexity relaxation of dynamic programming for cluster analysis <i>Y. Dodge, T. Gafner</i>	220
Partitioning Problems in Cluster Analysis: A Review of Mathematical Programming Approaches <i>P. Hansen, B. Jaumard, E. Sanlaville</i>	228
Clusters and factors: neural algorithms for a novel representation of huge and highly multidimensional data sets <i>A. Lelu</i>	241
Graphs and structural similarities <i>M. Liquière</i>	249
A generalisation of the diameter criterion for clustering <i>P. Pr�ea</i>	257
Percolation and multimodal data structuring <i>R.C. Tr�emoli�eres</i>	263

1.5 Discrimination and learning

Classification and Discrimination Techniques Applied to the Early Detection of Business Failure <i>M. Bardos</i>	269
Recursive Partition and Symbolic Data Analysis <i>A. Ciampi, E. Diday, J. Lebbe, R. Vignes</i>	277
Interpretation Tools For Generalized Discriminant Analysis <i>A. Faraj</i>	285
Inference about rejected cases in discriminant analysis <i>D.J. Hand, W.E. Henley</i>	292
Structure Learning of Bayesian Networks by Genetic Algorithms <i>P. Larrañaga, M. Poza</i>	300
On the representation of observational data used for classification and identification of natural objects <i>J. Le Renard, N. Conruyt</i>	308
Alternative strategies and CATANOVA testing in two-stage binary segmentation <i>F. Mola, R. Siciliano</i>	316

Section 2: Data-specific approaches

2.1 Sequence analysis in molecular biology

Alignment, Comparison and Consensus of Molecular Sequences <i>W.H.E. Day, F.R. McMorris</i>	327
An Empirical Evaluation of Consensus Rules for Molecular Sequences <i>W.H.E. Day, A.D. Gordon</i>	347
A Probabilistic Approach To Identifying Consensus In Molecular Sequences <i>A.D. Gordon</i>	356
Applications of Distance Geometry to Molecular Conformation <i>T.L. Hayden</i>	362
Classification of aligned biological sequences <i>I.C. Lerman, J. Nicolas, B. Tallur, P. Peter</i>	370

2.2 Symbolic data for classification and data analysis

Use of Pyramids in Symbolic Data Analysis <i>P. Brito</i>	378
Proximity Coefficients between Boolean symbolic objects <i>F. de A.T. de Carvalho</i>	387
Conceptual Clustering in Structured Domains: A Theory Guided Approach <i>F. Esposito</i>	395
Automatic Aid to Symbolic Cluster Interpretation <i>M. Gettler Summa, E. Périnel, J. Ferraris</i>	405
Symbolic Clustering Algorithms using Similarity and Dissimilarity Measures <i>K. Chidananda Gowda, E. Diday</i>	414

Feature Selection for Symbolic Data Classification <i>M. Ichino</i>	423
Towards extraction method of knowledge founded by symbolic objects <i>S. Smadhi</i>	430
One Method of Classification based on an Analysis of the Structural Relationship between Independent Variables <i>S. Takakura</i>	438
The Integration of Neural Networks with Symbolic Knowledge Processing <i>A. Ultsch</i>	445

2.3 Uncertainty handling and fuzzy data

Ordering of Fuzzy k -Partitions <i>S. Bodjanova</i>	455
On the Extension of Probability Theory and Statistics to the Handling of Fuzzy Data <i>R. Kruse</i>	463
Fuzzy Regression <i>W. Näther</i>	470
Clustering and Aggregation of Fuzzy Preference Data: Agreement vs. Information <i>J.W. Owsinski</i>	478
Rough Classification with Valued Closeness Relation <i>R. Słowiński, J. Stefanowski</i>	482

Section 3: Multivariate analysis and statistical methods

3.1 Visual Representation of data

Representing proximities by network models <i>K.C. Klauer</i>	493
An Eigenvector Algorithm to Fit l_p -Distance Matrices <i>R. Meyer</i>	502

3.2 Analysis of contingency tables

A non linear approach to Non Symmetrical Data Analysis <i>J.-F. Durand, Y. Escoufier</i>	510
An Algorithmic Approach to Bilinear Models for Two-Way Contingency Tables <i>A. de Falguerolles, B. Francis</i>	518

3.3 Statistical methods

New Approaches Based on Rankings in Sensory Evaluation <i>Y. Baba</i>	525
Estimating failure times distributions from censored systems arranged in series <i>M. Bacha, G. Celeux, J. Diebolt, E. Idée</i>	533

Calibration Used as a Nonresponse Adjustment <i>F. Dupont</i>	539
Least Squares Smoothers and Additive Decomposition <i>U. Halekoh, P.O. Degens</i>	549
Section 4: Applications and information processing	
4.1 Knowledge-based systems and textual data	
High Dimensional Representations and Information Retrieval <i>G.F. Furnas</i>	559
Experiments of Textual Data Analysis at Electricité de France <i>G. Hébrail, J. Marsais</i>	569
Conception of a Data Supervisor in the Prospect of Piloting Management Quality of Service and Marketing <i>M. Jambu</i>	577
Discriminant Analysis Using Textual Data <i>L. Lebart, C. Callant</i>	584
Recent Developments in Case Based Reasoning: Improvements of Similarity Measures <i>M.M. Richter</i>	594
4.2 Medical data and image analysis	
Contiguity in discriminant factorial analysis for image clustering <i>L. Abdessemed, B. Escofier</i>	602
Exploratory and Confirmatory Discrete Multivariate Analysis in a Probabilistic Approach for Studying the Regional Distribution of Aids in Angola <i>H. Bacelar-Nicolau, F.C. Nicolau</i>	610
Factor Analysis of Medical Image Sequences (FAMIS): Fundamental principles and applications <i>H. Benali, I. Buvat, F. Frouin, J.P. Bazin, J. Chabriaais, R. di Paola</i> . .	619
Multifractal Segmentation of Medical Images <i>J.-P. Berroir, J. Levy Vehel</i>	628
The Human Organism—a Place to Thrive for the Immuno-Deficiency Virus <i>A.W.M. Dress, R. Wetzel</i>	636
Comparability and usefulness of newer and classical data analysis techniques. Application in medical domain classification <i>E. Krusińska, J. Stefanowski, J.-E. Strömberg</i>	644
4.3 Astronomy	
The Classification of IRAS Point Sources <i>J.A.D.L. Blommaert, W.E.C.J. van der Veen, H.J. Habing</i>	653
Astronomical classification of the Hipparcos input catalogue <i>M. Hernández-Pajares, R. Cubarsí, J. Floris</i>	663

Group identification and individual assignation of stars from kinematical and luminosity parameters <i>X. Luri, M.-O. Mennessier, F. Figueras, J. Torra</i>	672
Specific numerical and symbolic analysis of chronological series in view to classification of long period variable stars <i>M.-O. Mennessier, H. Boughaleb, D. Barthes</i>	680
Author and Subject Index	689
