

Generative social science: studies in agent-based computational modeling

Epstein, Joshua M.

ISBN 9780691125473

Contents

Introduction

Prelude to Chapter 1. The Generativist Manifesto

Chapter 1. Agent-Based Computational Models and Generative Social Science

Prelude to Chapter 2. Confession of a Wandering Bark

Chapter 2. Remarks on the Foundations of Agent-Based Generative Social Science

Prelude to Chapter 3. Equilibrium, Explanation, and Gauss's Tombstone

Chapter 3. Non-Explanatory Equilibria: An Extremely Simple Game with (Mostly)

Unattainable Fixed Points

Appendix to Chapter 3. Large Effect of a Subtle Rule Change

Prelude to Chapters 4-6. Generating Civilizations: The 1050 Project and the Artificial Anasazi Model

Chapter 4. Understanding Anasazi Culture Change Through Agent-Based Modeling

Chapter 5. Population Growth and Collapse in a Multiagent Model of the Kayenta

Anasazi in Long House Valley

Chapter 6. The Evolution of Social Behavior in the Prehistoric American Southwest

Prelude to Chapter 7. Generating Patterns in the Timing of Retirement

Chapter 7. Coordination in Transient Social Networks: An Agent-Based Computational

Model of the Timing of Retirement

Prelude to Chapter 8. Generating Classes without Conquest

Chapter 8. The Emergence of Classes in a Multi-Agent Bargaining Model

Prelude to Chapter 9. Generating Zones of Cooperation in the Prisoner's Dilemma Game

Chapter 9. Zones of Cooperation in Demographic Prisoner's Dilemma

Appendix to Chapter 9. Generating Norm Maps in the Demographic Coordination Game

Prelude to Chapter 10. Generating Thoughtless Conformity to Norms

Chapter 10. Learning to be Thoughtless: Social Norms and Individual Computation

Prelude to Chapter 11. Generating Patterns of Spontaneous Civil Violence

Chapter 11. Modeling Civil Violence: An Agent-Based Computational Approach

Prelude to Chapter 12. Generating Epidemic Dynamics

Chapter 12. Toward a Containment Strategy for Smallpox Bioterror: An Individual-

Based Computational Approach

Prelude to Chapter 13. Generating Optimal Organizations

Chapter 13. Growing Adaptive Organizations: An Agent-Based Computational Approach

Coda
