

Clinical engineering handbook

Dyro, Joseph F

ISBN 9780122265709

Section I Clinical Engineering I

1. Clinical Engineering: Evolution of a Discipline
2. History of Engineering and Technology in Health Care
3. The Health Care Environment
4. Enhancing Patient Safety: The Role of Clinical Engineering
5. A Model Clinical Engineering Department
6. Clinical Engineering in an Academic Medical Center
7. Regional Clinical Engineering Shared Services and Cooperatives
8. Nationwide Clinical Engineering System
9. Clinical Engineering and Biomedical Maintenance in the United States Military
10. Careers, Roles and Responsibilities
11. Clinical Engineering at the Bedside
12. The Clinical Engineer as Consultant
13. The Clinical Engineer as Investigator and Expert
14. Careers in Facilities

Section II Worldwide Clinical Engineering Practice

15. World Clinical Engineering Survey
16. Clinical Engineering in the United Kingdom
17. Clinical Engineering in Canada
18. Clinical Engineering in Estonia
19. Clinical Engineering in Germany
20. Clinical Engineering in Brazil
21. Clinical Engineering in Columbia
22. Clinical Engineering in Ecuador
23. Clinical Engineering in Mexico
24. Clinical Engineering in Paraguay
25. Clinical Engineering in Peru
26. Clinical Engineering in Venezuela
27. Clinical Engineering in Japan
28. Clinical Engineering in Mozambique
29. Clinical Engineering in the Middle East

Section III Health Technology Management

30. Introduction to Medical Technology Management
31. Good Management Practice for Medical Equipment
32. Health Care Strategic Planning Utilizing Technology Assessment
33. Technology Evaluation
34. Technology Procurement
35. Equipment Control and Asset Management
36. Computerized Maintenance Management Systems
37. Maintenance and Repair of Medical Devices
38. A Strategy to Maintain Essential Medical Equipment in Developing Countries
39. Outsourcing Clinical Engineering Service
40. New Strategic Directions in Acquiring and Outsourcing High-Tech Services by Hospitals and Implications for Clinical Engineering Organizations and ISOs.
41. Vendor and Service Management
42. Health Care Technology Replacement Planning
43. Donation of Medical Device Technologies
44. National Health Technology Policy

45. The Essential Health Care Technology Package
46. Impact Analysis

Section IV Management

47. Industrial/Management Engineering in Healthcare
48. Financial Management of Clinical Engineering Services
49. Cost-Effectiveness and Productivity
50. Clinical Engineering Program Indicators
51. Personnel Management
52. Skills Identification
53. Management Styles and Human Resource Development
54. Quality

Section V Safety

55. Patient Safety and the Clinical Engineer
56. Risk Management
57. Patient Safety Best Practices Model
58. Hospital Safety Programs
59. Systems Approach to Medical Device Safety
60. Interactions Between Medical Devices
61. Single Use Injection Devices
62. Electromagnetic Interference with Medical Devices: In Vitro Laboratory Studies and Electromagnetic Compatibility Standards
63. Electromagnetic Interference in the Hospital
64. Accident Investigation
65. The Great Debate on Electrical Safety – in Retrospect

Section VI Education and Training

66. Academic Programs in North America
67. Clinical Engineering Education in Germany
68. Clinical Engineering Internship
69. Biomedical Engineering Technology Program
70. Advanced Clinical Engineering Workshops
71. Advanced Health Technology Management Workshop
72. Distance Education
73. Emerging Technologies: Internet and Interactive Video Conferencing
74. In-Service Education
75. Technical Service Schools
76. Clinical Engineering and Nursing
77. Retraining Programs
78. Techno-Bio-Psycho-Socio-Medical Approach to Health Care

Section VII Medical Devices: Design, Manufacturing, Evaluation, and Control

79. Evolution of Medical Device Technology
80. Technology in Health Care
81. Medical Device Design and Control in the Hospital
82. Medical Device Research and Design
83. Human Factors: Environment
84. Medical Devices: Failure Modes, Accidents, and Liability
85. Medical Device Software Development
86. Comparative Evaluations of Medical Devices
87. Evaluating Investigational Devices for Institutional Review Boards

Section VIII Medical Devices: Utilization and Service

- 88. Intensive Care
- 89. Operating Room
- 90. Anaesthesiology
- 91. Imaging Devices
- 92. Machine Vision
- 93. Perinatology
- 94. Cardiovascular Techniques and Technology
- 95. General Hospital Devices: Beds, Stretchers, and Wheelchairs
- 96. Medical Device Troubleshooting

Section IX Information

- 97. Information Systems Management
- 98. Physiologic Monitoring and Clinical Information Systems
- 99. Advanced Diagnostics and Artificial Intelligence
- 100. Real-Time Executive Dashboards and Virtual Instrumentation: Solutions for Health Care Systems
- 101. Telemedicine: Clinical and Operational Issues
- 102. Picture Archiving and Communication Systems (PACS)
- 103. Wireless Medical Telemetry: Addressing the Interference Issue and the New Wireless Medical Telemetry Service
- 104. Health Insurance Portability and Accountability Act and its Implications for Clinical Engineering
- 105. YSK and Clinical Engineering
- 106. The Integration and Convergence of Medical and Information Technologies

Section X Engineering the Clinical Environment

- 107. Physical Plant
- 108. Heating, Ventilation, and Air Conditioning
- 109. Electrical Power
- 110. Medical Gas Systems
- 111. Support Services
- 112. Construction and Renovation
- 113. Radiation Safety
- 114. Sanitation
- 115. Water Systems in Health Care Facilities
- 116. Disaster Planning

Section XI Medical Device Standards, Regulations, and the Law

- 117. Primer on Standards and Regulations
- 118. Medical Device Regulatory and Technology Assessment Agencies
- 119. Health Care Quality and IS 9001:2000
- 120. Hospital Facilities Safety Standards
- 121. JCAHO Accreditation
- 122. Medical Equipment Management Program and ANSI/AAMI EQ56
- 123. Clinical Engineering Standards of Practice for Canada
- 124. Regulations and the Law
- 125. European Union Medical Device Directives and Vigilance System
- 126. United States Food & Drug Administration
- 127. Tort Liability for Clinical Engineers and Device Manufacturers

Section XII Professionalism and Ethics

- 128. Professionalism
- 129. Clinical Engineering Advocacy
- 130. American College of Clinical Engineering
- 131. The New England Society of Clinical Engineering
- 132. New York City Metropolitan Area Clinical Engineering Directors Group
- 133. Clinical Engineering Certification in the United States
- 134. Clinical Engineering Certification in Germany

Section XIII The Future

- 135. The Future of Clinical Engineering: The Challenge of Change
- 136. Virtual Instrumentation – Applications to Health Care
- 137. Clinical Engineers in Non-Traditional Roles
- 138. Clinical Support: The Forgotten Function
- 139. Postmarket Surveillance and Vigilance on Medical Devices
- 140. Small Business Development: Business Plan Development Fundamentals for the Entrepreneur
- 141. Engineering Primary Health Care: The Sickle Cell Business Case
- 142. Global Hospital in 2050 – A Vision

Appendices

Index
