

Contents

Section I. Microwave Processing, Challenges, and Opportunities

Key Issues in Microwave Process Technology3

W.H. Sutton

Results of the Workshop on Microwave-Absorbing Materials for Accelerators (MAMA): A Personal View19

L.E. Campisi

Microwave Material Interactions and Process Design Modeling.....29

W.R. Tinga

Key Issues in Microwave Processing, Research, and Commercialization—An Open Forum45

W.R. Tinga and W.H. Sutton

Section II. Microwave Remediation of Nuclear and Hazardous Waste

Applications of Microwave Radiation in Environmental Remediation Technologies53

T.R. Krause and J.E. Helt

Microwave Processing of Geopolymer-Cement-Based Waste Forms61

I. Davidovits, R.-E. Schmitt, and V. Friehmelt

Microwave Applications to Process Nuclear and Hazardous Waste73

S.J. Oda

Microwave Destruction/Vitrification of Electronic Components	81
R.L. Schulz, D.C. Folz, D.E. Clark, and G.G. Wicks	
Microwave Processing of Simulated Nuclear Waste Glass II	89
R.L. Schulz, D.E. Clark, R.M. Hutcheon, and G.G. Wicks	
 Section III. Microwave Sintering	
Microwave Sintering of ZrO₂-12 Mol% CeO₂	101
M.A. Janney, M.L. Jackson, and H.D. Kimrey	
Microwave Sintering of Calcium Strontium Zirconium Phosphate Ceramics.....	109
Y. Fang, D.K. Agrawal, D.M. Roy, and R. Roy	
Microwave Processing of Rare Earth Oxide Doped ZnO Varistors	115
H.K. Varma, S. Ananthakumar, P. Perumal, P.P. Rao, K.G.K. Warriar, and A.D. Damodaran	
Microwave Sintering of Ni-Zn Ferrites	123
A.J. Pigram, M.G. Hamlyn, R. Freer, and A.L. Bowden	
Temperature Gradients in Microwave Processing: Boon and Bane	133
D.L. Johnson, D.J. Skamser, and M.S. Spatz	
Some Activities of Microwave Processing of Ceramics in Germany.....	147
D. Vollath	
Microwave Densification of Porous Silica Gel	157
J.P. Zhong, Z. Fathi, G.P. LaTorre, D.C. Folz, and D.E. Clark	

Section IV. Process Modeling, Simulation, and Microwave Interaction Effects

- Modeling the Microwave Process—Challenges and
New Directions.....167**
M.F. Iskander
- Transient Temperature Behavior of a Sphere Heated
by Microwaves.....189**
H.W. Jackson, M. Barmatz, and P. Wagner
- Numerical Model for the Modes of a Lossy, Coaxially
Loaded Cylindrical Cavity201**
E.B. Manring and J. Asmussen, Jr.
- Studies of Microwave Field Effects on Ionic Transport
in Ionic Crystalline Solids.....213**
S.A. Freeman, J.H. Booske, R.F. Cooper, B. Meng, J. Kieffer, and
B.J. Reardon
- Formation of Hot Spots in Microwave-Heated Ceramic
Rods221**
G.A. Kriegsmann and P. Varatharajah
- Experimental Validation of Numerical Simulations of
the Microwave Sintering Process.....229**
J.D. Newman, L. Walsh, R. Evans, T. Tholen, O.M. Andrade,
M.F. Iskander, K.J. Bunch, and H.D. Kimrey
- Analysis of the Microwave Sintering Effect in NaCl
Using Molecular Dynamic Simulations239**
B.J. Reardon, J. Kieffer, J.H. Booske, and R.F. Cooper
- Thermal Analysis of Microwave Processing of Ceramics.....247**
R.K. Singh, J. Viatella, Z. Fathi, and D.E. Clark

Section V. Novel Microwave Processing

- Crystallization of Grain Boundary Phases in Silicon Nitride with Low Additive Contents by Microwave Annealing**259
T.N. Tiegs, K.L. Ploetz, J.O. Kiggans, and R.L. Yeckley
- Processing of Complex Sintered Reaction-Bonded Silicon Nitride Parts by Microwave Heating**.....269
J.O. Kiggans, T.N. Tiegs, H.D. Kimrey, and C.E. Holcombe
- Reaction-Rate Controlled Microwave Processing of Ceramic Materials**277
M. Willert-Porada
- Effect of Microwave Heating on the Mass Transport in Ceramics**.....287
I. Ahmad and D.E. Clark
- Microwave Hybrid Heating of Alumina Filaments**297
G.J. Vogt and W.P. Unruh
- Microwave Application in Precision Investment Casting Operations**307
Y.A. Owusu and P.J. Gielisse
- Crystallization of Sol-Gel-Derived Barium Aluminosilicate in a 2.45-GHz Microwave Field**.....317
A.D. Cozzi, Z. Fathi, and D.E. Clark
- Removal of Polymethyl Methacrylate Binder from Alumina Using Conventional and/or Microwave Heating**...325
E.H. Moore, D.E. Clark, and R. Hutcheon
- Surface Modification of Sodium Aluminosilicate Glasses Using Microwave Energy II**333
Z. Fathi, D.C. Folz, D.E. Clark, and R. Hutcheon

Repair of Glass by Sol-Gel Coating Using Either Conventional or Microwave Heating.....	341
A. Boonyapiwat, Z. Fathi, D.C. Folz, and D.E. Clark	
Microwave Susceptor Materials in the (Mg_xNi_{1-x})O System for High-Temperature Use in Air.....	351
P. Komarenko and D.E. Clark	
Microwave Heating of Ceramics in a Single-Mode Mitered Bend Cavity	359
H.S. Sa'adaldin, W.M. Black, Y.-L. Tian, I. Ahmad, and R. Silberglitt	
Application of Microwave Heating to Combustion Synthesis and Sintering of Al₂O₃-TiC Ceramics.....	365
M. Willert-Porada, B. Fischer, and T. Gerdes	
Diamond Chemical Vapor Deposition via Microwave-Excited Plasma from Water-Ethanol Solutions.....	377
R.A. Rudder, R.C. Hendry, G.C. Hudson, R.J. Markunas, A.C. Johnson, L.T. Thigpen, R.S. Garard, and C.A. Everleigh	

Section VI. Microwave Processing of Composites and Joining

Ceramic Matrix Composites by Microwave-Assisted CVI ...	387
R.P. Currier and D.J. Devlin	
Microwave Sintering of Hydroxyapatite-Based Composites	397
Y. Fang, D.M. Roy, J. Cheng, R. Roy, and D.K. Agrawal	
Microwave Joining of Dissimilar SiC Ceramics	409
I. Ahmad, R. Silberglitt, W.M. Black, H.S. Sa'adaldin, Y.-L. Tian, and J.D. Katz	
Problems and Opportunities in Microwave Joining of Ceramics.....	417
R.E. Loehman	

- Microwave Processing of Ni-Al₂O₃ Composites**.....431
M.D. Mathis, H.S. Dewan, D.K. Agrawal, R. Roy, and R.H. Plovnick
- Microwave Joining of Bi-Based 2223 Superconductor
and Its Microstructure Features**.....439
J. Cai, Y.L. Tian, and J.K. Guo

Section VII. Scale-Up of Microwave Processing

- Scaling Up the Microwave Firing of Ceramics**.....449
F.C.R. Wroe
- Microwave Sintering of Large Alumina Bodies**459
R.D. Blake and J.D. Katz

Section VIII. Dielectric Properties and Measurements

- The High-Temperature Microwave Response of Industrial Ferrites**.....469
R.M. Hutcheon, G.F. Morin, B.H. Smith, M.S. de Jong, and F.P. Adams
- High-Temperature Dielectric Property Measurements of Engineering Ceramics**.....483
M. Arai, J.G.P. Binner, G.E. Carr, and T.E. Cross
- Dielectric Property Measurement of Ceramic Bodies**.....493
V.F. Janas, C.J. Malarkey, M.F. Iskander, O. Andrade, and S. Bringham
- New Metallized Ceramic Coaxial Probe for High-Temperature Broadband Dielectric Properties Measurements**.....503
S. Bringham, M.F. Iskander, and O.M. Andrade

Electric Field Strength/Power Density and Temperature Measurements in an Electromagnetic Field	511
H.E. Berek and E.M. Jensen	
New Self-Oscillating, Self-Heating Microwave Active Dielectrometer	517
B. Tian and W.R. Tinga	
Temperature Measurement in a 2.45-GHz Microwave Furnace	529
D.J. Grellinger and M.A. Janney	
Elevated Temperature Dielectric Property Measurements: Results of a Parallel Measurement Program.....	539
M. Arai, J.G.P. Binner, A.L. Bowden, T.E. Cross, N.G. Evans, M.G. Hamlyn, R. Hutcheon, G. Morin, and B. Smith	

Section IX. Microwave Equipment Design

Applicators for Industrial Microwave Processing.....	549
A.C. Metaxas	
Use of a Variable-Frequency Microwave Furnace for Large-Area, Uniform Processing	563
A.C. Johnson, R.J. Espinosa, W.A. Lewis, L.T. Thigpen, C.A. Everleigh, and R.S. Garard	
Materials Processing Using a Variable-Frequency Microwave Furnace.....	571
R.J. Lauf, D.W. Bible, S.R. Maddox, C.A. Everleigh, R.J. Espinosa, and A.C. Johnson	
Application of the Boltzmann-Ehrenfest Principle to Containerless Microwave Processing in Microgravity	581
C. McDonough, M. Barmatz, and H.W. Jackson	
Index	591
