

NMR Spectroscopy in Pharmaceutical Analysis / Edited by:Ulrike Holzgrabe, Iwona Wawer and Bernd Diehl

ISBN: 9780444531735

Part I: Fundamentals and Techniques

Chapter 1 - Principles in NMR Spectroscopy

Chapter 2 - Quantitative NMR in the Solution State NMR

Chapter 3 - qNMR in Solid State

Chapter 4 - Microcoil Nuclear Magnetic Resonance Spectroscopy

Chapter 5 - qNMR Spectroscopy in Drug Analysis – A General View

Part II: General Applications

Chapter 1 - Investigation of Multi-Component Drugs by NMR Spectroscopy

Chapter 2 - NMR Applications for Polymer Characterisation

Chapter 3 - NMR Spectroscopy of Natural Substances

Chapter 4 - Solid-State Measurements of Drugs and Drug Formulations

Chapter 5 - Metabolic Profiling

Chapter 6 - DOSY NMR for Drug Analysis

Chapter 7 - The Use of qNMR for the Analysis of Agrochemicals

Part III: Special Applications

Chapter 1 - NMR-Based Mixture Analysis on the Example of Fruit Juice Quality Control Using Statistics and Quantification

Chapter 2 - NMR Assays for Carbohydrate-Based Vaccines

Chapter 3 - Fluorine-19 or Phosphorus-31 NMR Spectroscopy: A Powerful Technique for Biofluid Metabolic Studies and Pharmaceutical Formulation Analysis of Fluorinated or Phosphorylated Drugs

Chapter 4 - Quantitative 2D NMR Analysis of Glycosaminoglycans

Chapter 5 - The Use of Proton NMR as an Alternative for the Amino Acid Analysis as Identity Test for Peptides

Chapter 6 - Assessment of the Inhibitory Potency of Antibiotics by MRI

Chapter 7 - Hypernation and Concatenation: Multiple On-Line Spectroscopic Analysis for Drug and Natural Product Characterisation

Chapter 8 - Quantitative High-Resolution Online NMR Spectroscopy in Pharmaceutical Reaction and Process Monitoring

Index

Pages 493-501
